Reading and Writing with English Learners SEIDLITZ EDUCATION, LLC

Academic Writing in a Global Context addresses the issue of the pressure on academics worldwide to produce their work in English in scholarly publishing, and why the growth of the use of academic English matters. Drawing on an eight year 'text-ethnographic' study of the experiences of fifty scholars working in Europe, this book discusses these questions at both a macro and micro level - through discussions of knowledge evaluation systems on all levels, and analysis of the progress of a text towards publication. In addition to this, case studies of individual scholars in their local institutions and countries are used to illustrate experiences of using English in the academic world. Academic Writing in a Global Context examines the impact of the growing dominance of English on academic writing for publication globally. The authors explore the ways in which the global status attributed to English is impacting on the lives and practices of multilingual scholars working in contexts where English is not the official language of communication and throws into relief the politics surrounding academic publishing. This book will be of interest to postgraduates and professionals in the fields of World Englishes, language and globalization and English Language Teaching.

This version has been fully re-checked for accuracy and re-formatted to make it even more user-friendly, following feedback after a full year of classroom use by thousands of teachers across the

world. Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-authored by two modern languages educators with over 40 years of extensive classroom experience between the two, both in the UK and internationally. This 'no-frills' book contains 19 units of work on very popular themes, jam-packed with graded vocabulary-building, reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns and structures are recycled and interleaved throughout. Each unit includes: 1) A sentence builder modelling the target constructions; 2) A set of vocabulary building activities; 3) A set of narrow reading texts exploited through a range of tasks focusing on both the meaning and structural levels of the text; 4) A set of retrieval-practice translation tasks; 5) A set of writing tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and communication of meaning. Based on the Extensive Processing Instruction (E.P.I.) principle that learners learn best from comprehensible and highly patterned input flooded with the target linguistic features, the authors have carefully designed each and every text and activity to enable the student to process and produce each item many times over. This occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.
