VALERIE BALLARD

Report BRILL

Based on extensive archival research in South Africa and drawing on the most recent scholarship, this book is an original and lucid exposition of the ideological, political and administrative origins of Apartheid. It will add substantially to the understanding of contemporary South Africa.

Skills Shortages in South Africa Oxford University Press, USA
Evaluates the successes and failures of the 1996 South African Constitution following the twentieth anniversary of its enactment.

The South African Mining and Engineering Journal AOSIS
This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. The Open Access version of this book, available at <https://doi.org/10.4324/9781003007043>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Report Hassell Street Press

This book critically investigates the flourishing monument phenomenon in post-apartheid South Africa, notably the political

discourses that fuel it; its impact on identity formation, its potential benefits, and most importantly its ambivalences and contradictions.

A Dictionary of South African English on Historical Principles
Cambridge University Press

Geologists, physicists and ecologists currently promote the idea of a post-Holocene epoch – the Anthropocene. As a result of constant innovation and modernisation in the fields of engineering, natural science, management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics, to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere – from the smallest pool of water to the earth's atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater, and recycled wastewater, as well as special attention being given to capturing and preserving rainwater, bear evidence of a timely response to climate change, population growth and rapid development in many water-stressed regions of the world. The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a time when the Union of South Africa was formed, in 1910, up to 2008, a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa, notable for increasing levels of aridity and more erratic rainfall patterns. This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation. The focus is on the Water-Energy-Food nexus, a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water, energy and food as resources.

Canadian Journal of Earth Sciences Springer Nature

This is the first full-length book to deal with Scottish emigration to

South Africa and the resulting conflicts and relationships with African peoples. It deals with the full range of activities of Scots in exploration, scientific endeavour, military campaigns, Christian missions, intellectual institutions, technical developments and enterprise.

Papers Springer

A central thesis of this study is that freedom of the press- the right to talk serious politics and to report and criticize government with impunity- now nonexistent for the black majority, has been steadily declining for the white population as well. Some South African journalists believe that the indistinct line between meaningful press freedom and unacceptable government control has already been crossed.

This series of publications aims to fill the gaps in our history, highlighting in particular the significant roles played by black leaders from all walks of life.

Annual Report Readme Publishing

This is a scholarly book that commemorates the legacy of Rev. Nicholas Bhekinkosi Hepworth Bhengu who was born on 05 September 1909 at eNtumeni, KwaZulu-Natal, South Africa. He was the founder of the Back to God Crusade in the 1950s that has become institutionalised within the Assemblies of God. He taught his church to be self-sustaining and also encouraged material independence through hard work. He died on 07 October 1985 at Groote Schuur Hospital in Cape Town, Western Cape, South Africa, leaving many people in Africa influenced by his rich legacy as an evangelist, pastor, teacher and church planter to this day. Bhengu combined evangelism with development, which was critical for the black people who were under a repressive regime in South Africa and in sub-Saharan Africa. He was a religious revolutionary who 'planted' more than 2000 churches in South Africa and neighbouring countries by emphasising non-denominationalism without pressurising converts to discard their churches and join others. He was determined to build a

movement that would be a vehicle to reach out to the continent of Africa through his churches. The book aims at providing academics and researchers with reference material of interactions between spirituality, church dynamics, socio-economic development and political environment. Its contribution to existing research with regard to the formative growth of Christianity in Africa is significant and innovative. The book's target audience includes academics in the religious fields of missiology, church history and contextual theology, specifically researchers with intent to write scientific commentaries on the life history of Bhengu.

Geobulletin HSRC Press

This book describes famous geosites and historical localities in national parks and conservation areas from North America, East Africa, and Europe. The geosites include iconic landforms associated with active volcanoes, canyons, glaciated landscapes, natural rock monoliths, and rifts. The potential for geotourism in historical localities such as the famous Greco-Roman antiquities of Greece, Italy, and Turkey, is emphasised. Some of the geosites and historical localities provide evidence that previous civilizations coped with active geology and major climatic cycles, whilst others reveal evidence of famous geological events recognized in history and ancient mythology that helped shape our current civilization. The book assists tour guides and visitors (both geologists and non-specialists) interested in geotourism by providing an understanding of geological processes in the national parks and historical locations with the assistance of photographs and simplified geological maps.

Theorising the Practice of Community Development HSRC Publishers

This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation-era South Africa and internationally. It contextualises Du Toit's work within a particularly formative period of South African science, from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts' own theory of holism. Beyond South African scientific discoveries, the book sets Du Toit's work against a backdrop of ideological struggles over space, both domestically in terms of segregation and nationalism, as well as internationally as South Africa sought to assert its position within

the Commonwealth. These debates were embodied by Du Toit's work on the theory of continental drift, which put Africa – and South Africa – at the centre geologically and geographically. The author also focuses on the divisions in geology caused by drift theory, tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed. It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener, which was both elaborated upon and substantiated by Du Toit. The study further focuses on Du Toit's research on continental drift in South African and South America, and the geological, fossil and climatological evidence used to bolster this theory.

Based on 25 years of community development practice, six of which have been lived in South Africa, Peter Westoby's groundbreaking monograph moves away from dominant normative accounts of community development to provide an appreciative and critical analysis of concrete examples of community development theory and practice. By examining community development stories as experienced on the ground, Westoby is able to show how the poor are organising themselves using various forms of community development as well as demonstrating how the state and non-state actors are attempting to organise, engage or accompany the poor through community development. The book also breaks new ground in theorising the practice of community development, drawing inductively from the stories analysed. The diversity of South African contexts and the proliferation of different kinds of community practice, make this a hugely difficult task. Despite this, Westoby argues it is one worth undertaking given the seriousness of the challenges facing the poor and progressive social change agents within South Africa. In this undertaking, Westoby draws upon a unique analytical framework to help illuminate current community development policy and programme challenges, along with practice dilemmas and wisdom.

General Report - Transvaal Education Department Springer

Now a major motion picture nominated for nine Academy Awards.

Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. *Twelve Years a Slave* by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Using Evidence in Policy and Practice Routledge

Skills shortages in South Africa are widely seen as a major obstacle to the achievement of targeted economic growth rates. Yet there is some dispute as to the nature and extent of these shortages, given the large number of unemployed graduates. The case studies presented here explore the question of shortage in nine key professions and artisanal trades, and find evidence of skills scarcity in most fields. The case studies provide insight into the reasons for shortages and surpluses in relation to South Africa's own context and history. They also consider the international market for knowledge and skills, in which South African qualifications are highly prized. The monograph emanates from a study on sector specific research and related skills requirements commissioned by the South African Department of Labour in 2006. It formed part of a wider research project on scarce and critical skills related to the National Skills Development Strategy and the National Industrial Policy Framework of 2007, for which the Human Sciences Research Council led a research consortium comprising the Development Policy Research Unit at the University of Cape Town and the Sociology of Work Unit at the University of the Witwatersrand. [South Africa's water governance hydraulic mission \(1912-2008\) in a WEF-Nexus context](#) Springer

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends

the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Nicholas Bhekinkosi Hepworth Bhengu's Lasting Legacy

A Dictionary of South African English is the fullest ever study of the English language in South Africa. The result of 25 years of work, this dictionary has been researched and written according to historical principles. However, as well as recording examples of

South African English going back to the sixteenth century, the dictionary also provides an insight into the dramatic political and cultural changes in South Africa's history by examining the country's ever changing language right up to the present day. Research into language has involved the contributions of hundreds of individual South Africans, as well as extensive research into all other forms of the written and spoken language. Diverse and informative entries include robot (a traffic light), bakkie (a small truck), bond (a mortgage), and brinjals (aubergines). The dictionary includes such areas as

children's slang, the vocabulary of soldiers, the mines, local music terms, the townships, food, and a detailed look at the complex language of apartheid. English words originating from all the country's groups are recorded, including words from Dutch/Afrikaans, the Malayo-Indonesian languages, the Indian, Khoisan, Nguni, and Sotho languages.
