Clay and Nails in African Coiffures Heinemann
Two world wars, the Civil Rights movement, and a Jheri curl later, Blacks in America continue to have a complex and convoluted relationship with their hair. From the antebellum practice of shaving the head in an attempt to pass as a "free" person to the 1998 uproar over a White third-grade teacher's reading of the book *Nappy Hair*, the issues surrounding African American hair continue to linger as we enter the twenty-first century. *Hair Story* is a historical and anecdotal exploration of Black Americans' tangled hair roots. A chronological look at the culture and politics behind the ever-changing state of Black hair from fifteenth-century Africa to the present-day United States, it ties the personal to the political and the popular. Read about: * Why Black American slaves used items like axle grease and eel skin to straighten their hair. * How a Mexican chemist straightened Black hair using his formula for turning sheep's wool into a minklike fur. * How the Afro evolved from militant style to mainstream fashion trend. * What prompted the creation of the Jheri curl and the popular style's fall from grace. * The story behind Bo Derek's controversial cornrows and the range of reactions they garnered. Major figures in the history of Black hair are presented, from early hair-care entrepreneurs Annie Turnbo Malone and Madam C. J. Walker to unintended hair heroes like Angela Davis and Bob Marley. Celebrities, stylists, and cultural critics weigh in on the burgeoning sociopolitical issues surrounding Black hair, from the historically loaded terms "good" and "bad" hair, to Black hair in the workplace, to mainstream society's misrepresentation and misunderstanding of kinky locks. *Hair Story* is the book that Black Americans can use as a benchmark for tracing a unique aspect of their history, and it's a book that people of all races will celebrate

as the reference guide for understanding Black hair.

In 101 WAYS TO AVOID HAIR LOSS, you will recognise the many ways in which hair loss can occur. There are so many processes which engender the loss of relaxed, permed and natural Afro-Caribbean hair, that excessive hair loss and damage is virtually ignored, or is accepted as normal. Afro-Caribbean hair enjoys a sensational mix of various textures which stem from multi-racial mixes. This hair therefore, should be beautiful, alluring and provocative to all hair stylists. Sadly, those textures are looked upon as coarse, strange and difficult to manage. When hair loss occurs, the blame is too frequently placed on the hair quality, something which is almost totally acceptable to many persons. Hair loss frustrates, and hair maintenance sometimes becomes a little too demanding. This then results in the acceptance of poor hair care. If only steps would be taken to avoid hair loss, what beauty, amazement and interest would be generated in Afro-Caribbean hair. This book will allow persons to have an informed view of various everyday situations which can cause hair loss. For the author believes that as one becomes aware, swift action will definitely be taken, resulting in the eventual love for Afro-Caribbean hair.

The Art of Dreadlocks Heinemann Educational Secondary Division
The Hair Craft Project, led by artist Sonya Clark, highlights the talents of 12 stylists in Richmond VA's hairdressing community. The project shows the stylists' ability to manipulate the hairs on Clark's own head while also showcasing the stylists' undeniable textile artistry on canvases stitched with thread. The project breaks down barriers by crossing boundaries between hair salons and art galleries as sites of aesthetics, craft, skill, improvisation, and commerce.

This book deals with the issue of African Caribbean pupil invisibility in the art and design classroom. As such it addresses African Caribbean pupil invisibility in almost any teaching and learning context. The book argues that the slave trade, which ruptured their continuities with an African past, continues to impact on the learning of such pupils relative to others.

Here is the first fully annotated edition of a landmark in early African American literature - Eliza Potter's 1859 autobiography, *A Hairdresser's Experience in High Life*. Potter was a freeborn black woman who, as a hairdresser, was in a unique position to hear about, receive confidences from, and observe wealthy white

women - and she recorded it all in a revelatory book that delighted Cincinnati's gossip columnists at the time. But more important is Potter's portrait of herself as a wage-earning woman, proud of her work, who earned high pay and accumulated quite a bit of money as one of the nation's earliest "beauticians" at a time when most black women worked at the bottom of the socioeconomic ladder. Because her work offered insights into the private lives of elite white women, Potter carved out a literary space that featured a black working woman at the center, rather than at the margins, of the era's transformations in gender, race, and class structure. Xiomara Santamarina provides an insightful introduction to this edition that includes newly discovered information about Potter, discusses the author's strong satirical voice and proud working-class status, and places the narrative in the context of nineteenth-century literature and history.
