Just as space capsules allow for exploration and discovery in outer space, 'meditation capsules' allow for discovery in inner space! Simple strategies for learning to meditate represent self-care capsules that allow individuals to develop and maintain a healthy, happy mind. The recommended dosage is moment by moment... day by day. This manual and the accompanying audio CD of guided meditations provides a practical resource for adults who wish to teach children the skills of mindful meditation. The comprehensive program outlined here is designed for classroom use, ideally with students at upper primary school level.

But the lessons can readily be adapted to suit children of all ages, and the book will be a helpful guide for parents, youth leaders, social workers and therapists - anyone who has an interest in teaching meditation or the enthusiasm to help children master meditation as a powerful personal tool.

The Best of Yiruma Summersdale Scientific Essay from the year 2010 in the subject Tourism, University of Innsbruck (Tourism & Service Industry), language: English, abstract: This Paper focuses on the importance of strategic positioning of destinations and its stakeholders in a globalised competitive environment. The theoretical background is based on the research on destinations and destination management, strategic marketing, strategy development and positioning strategies and positioning models. A new theoretic framework from a RBV was

developed to identify the most important elements of the successful positioning of destinations and its organizations from a stakeholder perspective. An empirical study was applied to all stakeholders who form a destination by the example of three very successful positioned destinations in the Austrian Alps. The theoretical model was tested by the application of frequency distribution and multiple linear regression analysis. Most of the points were confirmed but also a few rejected which asks for further research. However, the applied model gives a great insight in how stakeholders can successful and sustainable position their organizations and the destination as a whole. It further can be used as a tool to find an efficient positioning strategy for young entrepreneurs or gives helpful advice for stagnating or decreasing businesses to formulate a new positioning strategy or

aim for a relaunch.

The Value of an Archaeological Open-air Museum is in Its Use Oxford

University Press, USA

"The diversity among Europe's cultures is reflected nowhere better than in the way the contingent's top hotels are presented. Whether the glamorous luxury of legendary grand hotels that have been rejuvenated by contemporary interiors or the avant-garde hotels designed by international star architects, they are in themselves worth a sojourn. This magnificent volume shows the 94 best hotels from Moscow to Lisbon on 396 pages, and how each so uniquely combines excellent service with distinctive style. With designs that intrigue and amuse, these accommodations highlight the absolute best in groundbreaking architecture and design. Stunning photographs showcase bold use of materials, innovative artworks, hip furnishings as well as creative color combinations. Each hotel is a true microcosm of the cutting edge aesthetic. The fantastic pictures, accompanying texts and useful information perfectly prepare you for your next holiday, short vacation or business trip. Indispensable information and inspiration for the hip traveler A valuable, extensively illustrated reference for design lovers and professionals alike." -Publisher's website.

Cool Hotels Routledge

In this radical and deliberately controversial re-reading of Brecht, first published in 1989, Elizabeth Wright takes a new view of the playwright, giving us a more 'Brechtian' reading than so far achieved and making his work historically relevant here and now. The author discusses in detail Brecht's principle theories and concepts in the light of poststructuralist theory, and reassess the aesthetics and politics with regard to Marxist critics of his own day. Wright includes a re-reading of Brecht's early works, which presents them in relation to a postmodern theatre, and gives critical analyses of the work of Pina Bausch, Robert Wilson, and Heiner Müller, who use the techniques of performance theatre, showing how they deconstruct Brecht's distinction between illusion and reality and point to a postmodern understanding of their dialectical relation.

Encyclopedia of Leisure and Outdoor

Recreation Have Mercy on Us All Aircraft Performance: An Engineering Approach introduces flight performance analysis techniques that enable readers to determine performance and flight capabilities of aircraft. Flight performance analysis for prop-driven and jet aircraft is explored, supported by examples and illustrations, many in full color. MATLAB programming for performance analysis is included, and coverage of modern aircraft types is emphasized. The text builds a strong foundation for advanced coursework in aircraft design and performance analysis.

Provocative Therapy Simon and Schuster In the midst of the stress, violence, drug and communication problems of today's families, *Meditation for Children* presents a sane and practical blueprint for creating strong, close bonds between family members. For parents seeking practical solutions to the tough issues and problems of today's children, this book contains more than one hundred light, fun exercises that have been shown to spark children's creativity, engage their imagination and build a positive self-image. First published thirty years ago, this best-selling book has been updated to address the unique problems children face in the new millennium. Its techniques have been widely tested in homes and schools, and been proven to: calm hyperactive or anxious children; reduce stress in both children and adults; put children in touch with their imaginative and intuitive capacities; improve concentration in students; and create trust and enrich friendships.

Aircraft Performance Integral Yoga Publications

During the International Congress for Hypnosis and Psychosomatic Medicine, held in Paris from April 28th to 30th 1965 under the patronage of the World Federation for Mental Health, about one hundred papers were presented and the following panel discussions held: Electroencephalography and Hypnosis, chairman Prof. H. FISCHGOLD (Paris); The Teaching of Hypnosis, chairmen Dr. C. CEDERCREUTZ (Hamina) and Dr. H. ROSEN (Baltimore); Hypnosis and Pain, chairman Dr. M.H. ERICKSON (Phoenix); Hypnosis and the Psychotropic Drugs, chairman Dr. B.B. RAGINSKY (Montreal). The official languages of the Congress (German, French and English) were not always the speakers' mother tongues. A certain amount of editing was therefore necessary before publication, and this retarded the printing. Approximately half of the papers appear in this volume. We wish to thank

the following organizations for the help they granted the Congress. Prof. J. LASSNER Secretary-general Preamble Au Congres International d'Hypnose et de Medecine Psychosomatique, reuni a Paris du 28 au 30 A vril 1965 sous le patronage de la Federation Mondiale pour la Sante Mentale, une centaine de communications furent presentees et les colloques suivants eurent lieu: l'electroencephalographie et l'hypnose, preside par le Prof. H. FISCHGOLD (Paris); l'enseignement de l'hypnose, preside par les Drs. C. CEDERCREUTZ (Hamina) et H. ROSEN (Baltimore); l'hypnose et la douleur, preside par le Dr. M.H. ERICKSON (Phoenix); et l'hypnose et les drogues psychotropes, preside par le Dr. B.B. RAGINSKY (Montreal).

Music Medicine Routledge

Literary Nonfiction. LGBTQIA Studies.

Translated from the German by James J. Conway. Rough trade, drag kings, tea dances, sporty dykes, coded classified ads, campy nicknames, passing, outing, hustlers, beats and cruising at the YMCA--all accompanied by a wave of gay and lesbian activism. Eighties New York? No, Germany's imperial capital at the dawn of the 20th century. BERLIN'S THIRD SEX reveals an astonishingly diverse gay subculture years ahead of the Weimar era, with cross-dressing cabaret, all-night parties and erotic license at every level of society. Magnus Hirschfeld's 1904 report is a foundational text of modern gay identity, queer history captured by an insider, as it happened. Police, blackmailers and moral crusaders are never far, suicide is all too common, but Hirschfeld also invites us into the homes of same-sex couples to witness tranquil scenes of domesticity and devotion. BERLIN'S THIRD SEX formed part of the vast "Metropolis Documents" project, a visionary panorama of early 20th century urban life. This, the first part of the series to appear in English, is offered alongside an earlier Hirschfeld study of the "third sex" (the author's provisional term for gays and lesbians) as well as comprehensive notes and an informative afterword. "[BERLIN'S THIRD SEX] depicts a flourishing gay subculture populated by cross-dressers, drag queens, sporty dykes, blackmailers and prostitutes, who establish contact with one another via intricately coded classified ads, adopt droll nicknames such as 'Squeaky Lotte,' 'Rollmop Queen' and 'Hiddigeigei,' and generally live it up in bars and cabarets, in the Tiergarten, or at the Opera. The Rixdorf edition includes an informative afterword and helpful notes by the translator James. J. Conway."--Anna Katharina Schaffner "Hirschfeld's rhetorical

strategy, which includes these appeals to sentiment, walks the line between emphasizing the similarities in behavior between homosexuals and heterosexuals (in other words, suggesting homosexuals are just like the [presumably heterosexual] reader), and relating anecdotes or characteristics that portray the former as uniquely, yet endearingly, different. That this approach has strong parallels with contemporary gay rights rhetoric suggests that there is a timeless appeal in finding reasons for empathy in order to demonstrate that 'the other' is just as human."--Tyler Langendorfer

Forensic Music Therapy CRC Press

This text chronicles the history of vacationing in America since the early 19th century. It is concerned with how, when, and why vacationing came to be part of life, charting this social and cultural institution as it grew from the custom of a small elite in to a mass phenomenon

Hypnosis at its Bicentennial Jessica

Kingsley Publishers

since the first International Congress for Experimental and Therapeutic Hypnotism in Paris in 1889, there have been several periods of widespread interest in hypnosis among the professions as well as the lay public, followed by periods of profound neglect. Since the end of World War II, however, we have witnessed not only a strong resurgence of interest in hypnosis throughout the world but also the gradual development of the kind of infrastructure which a field requires to survive and prosper. The burgeoning clinical literature has been matched by a dramatic increase in the amount of systematic research carried out in a wide range of institutions throughout the world. A tradition of triennial major world congresses has been established, beginning with the 3rd International Congress for Hypnosis and Psychosomatic Medicine in Paris in 1965. These meetings, encouraged and sponsored by the International Society of Hypnosis and its predecessor, the International Society of Clinical and Experimental Hypnosis, are sponsored by universities and provide a forum for the exchange of ideas among scientists and clinicians throughout the world.

Routledge

This book constitutes the refereed

proceedings of the 12th International Conference on Brain Informatics, BI 2019, held in Haikou, China, in December 2019. The 26 revised full papers were carefully reviewed and selected from 36 submissions. The papers are organized in the following topical sections: cognitive and computational foundations of brain science; human information processing systems; brain big data analysis, curation and management; informatics paradigms for brain and mental health research; and brain-machine intelligence and brain-inspired computing. Also included is a special session on computational social analysis for mental health.

Daughters of Painted Ladies Harry N.

Abrams

Trauma, Guilt and Reparation identifies the emotional barriers faced by people who have experienced severe trauma, as well as the emergence of reparative processes which pave the way from impasse to development. The book explores the issue of trauma with particular reference to issues of reparation and guilt. Referencing the original work of Klein and others, it examines how feelings of persistent guilt work to foil attempts at reparation, locking trauma deep within the psyche. It provides a theoretical understanding of the interplay between feelings of neediness with those of fear, wrath, shame and guilt, and offers a route for patients to experience the mourning and forgiveness necessary to come to terms with their own trauma. The book includes a Foreword by John Steiner. Illustrated by clinical examples throughout, it is written by an author whose empathy and experience make him an expert in the field. The book will be of great interest to psychotherapists, social workers and any professional working with traumatized individuals.

The Evil Demon of Images Routledge

The essential book on CBD as medicine This practical, accessible guide to using CBD-dominant cannabis contains a wealth of information for both first-time explorers and experienced patients who want to know more about safely treating a number of health conditions with remarkable results and low to no psychoactivity or negative side effects. CBD (cannabidiol) is a component of cannabis that can provide relief for conditions such as seizures, pain, inflammation, anxiety, depression, arthritis, and a number of other issues. This book offers guidance on various forms of the medicine such as oil infusions, alcohol-based tinctures, capsules, and CO2 concentrated extracts. The information is organized by health condition and also by recommended CBD-rich strains, which do

not produce the "highs" associated with THC. With dosage suggestions, potential side effects and contraindications, and the pharmacology of the plant, this is an essential guide for both doctors and patients looking for a nontoxic alternative to opiate-based pain medications and other pharmaceuticals. While cannabis has been used for medicinal and recreational purposes for thousands of years, only in the last fifty years have scientists begun to shed light on the chemistry of the plant and its interactions with the human body. Research has led to the discovery of a whole new system in the body, the endocannabinoid system, which plays a role in mediating functions such as appetite, immunity, mood, pain response, and memory. The authors present case studies, interviews with doctors who prescribe cannabidiol products, and the latest research regarding other active phytocannabinoids and terpenoids present in cannabis that are being studied for medical use. They also address the difference between CBD products derived from industrial hemp or in a lab, versus those made from medical marijuana using the whole plant. In addition to offering the most up-to-date and comprehensive information on CBD-dominant cannabis therapy for humans, this book is the first to offer guidance for using the medicine for animals, with suggestions for dosage and delivery and useful forms and strains for common health issues in pets. Finally, the authors take a look at the future of cannabis medicine, charting trends in the legalization movement and suggesting how CBD might be used to fight the opioid epidemic.

Uncle Louie's Fantastic Sea Voyage

Routledge

There are about 300 archaeological open-air museums in Europe, which do more than simply present (re)constructed outdoor sceneries based on archaeology. They have an important role as education facilities and many showcase archaeology in a variety of ways. This research assesses the value of archaeological open-air museums, their management and their visitors, and is the first to do so in such breadth and detail. After a literature study and general data collection among 199 of such museums in Europe, eight archaeological open-air museums from different countries were selected as case studies. Management and visitors have different perspectives leading to different priorities and appreciation levels. The studies conclude with recommendations, ideas and strategies which are applicable not just to the eight archaeological open-air museums under study, but to any such

museum in general. The recommendations are divided into the six categories of management, staff, collections, marketing, interpretation and the visitors.

Have Mercy on Us All Simon and Schuster
Have Mercy on Us All Indiana University Press

This book presents a selection of the newest research on themes amplified by the sixth annual Beyond Camps and Forced Labour conference on the post-Holocaust period, including 'displaced persons', reception and resettlement, exiles and refugees, trials and justice, reparation and restitution, and memory and testimony. The chapters highlight new, transnational approaches and findings based on underused and newly

opened archives, including compensation files of the British government; on historical actors often on the periphery within English-language historiography, including Romanian and Hungarian survivors; and new approaches such as the spatial history of Drancy, as well as geographies that have undergone less scrutiny, for example, Tehran, Chile, Mexico and Cyprus. This volume represents the vibrant and varied state of research on the aftermath of the Holocaust.

Hypnosis Springer Nature

Structured for optimal use as a clinical reference and text, this comprehensive work reviews effective stress management techniques and their applications for treating psychological problems and enhancing physical health and performance. Leading experts present in-

depth descriptions of progressive relaxation, hypnosis, biofeedback, meditation, cognitive methods, and other therapies. Tightly edited chapters examine each method's theoretical and empirical underpinnings and provide step-by-step guidelines for assessment and implementation, illustrated with detailed case examples. The volume also explains basic mechanisms of stress and relaxation and offers research-based guidance for improving treatment outcomes. New to This Edition: *Incorporates significant empirical, theoretical, and clinical advances. *Chapters on mindfulness meditation, neurofeedback, EMDR, breathing retraining, heart rate variability biofeedback, exercise therapy, Qigong, sport psychophysiology, and basic mechanisms of stress and relaxation.
