Their physical appearance and sometimes even their disease history become part of who we are. Most of the time, we also copy their attitudes and mannerisms. In the case of Wardell Stephen "Steph" Curry, one cannot help but wonder if he also inherited the shooting touch of his father, Dell Curry. An NBA pundit said that great shooters are not made, they are born. The same

can be said about Stephen Curry, to some degree. His father, Dell Curry, was always a great shooter. Dell tallied a total of 1,245 three-pointers in an NBA career that spanned a decade and a half. Steph obviously got a lot of his shooting abilities from the genetics that his father passed on to him. However, the younger Curry is not all genetics. He has taken what his father gave him and raised it to a whole new level because of his insane work ethic. In a sense, Steph is a shooter who was born to be made.
