This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

The Cyrus Cylinder is one of the most famous objects to have survived from the ancient world. The Cylinder was inscribed in Babylonian cuneiform on the orders of the Persian King Cyrus the Great (559-530BC) after he captured Babylon in 539BC. It is often referred to as the first bill of human rights as it appears to permit freedom of worship throughout the Persian Empire and to allow deported people to return to their homelands. It is valued by people all around the world as a symbol of tolerance and respect for different peoples and different faiths, so much so that a copy of the cylinder is on display in the United Nations building in New York. This catalogue is being published in conjunction with the first ever tour of the object to the United States, along with sixteen other objects from the British Museum's collection. The book discusses how these objects demonstrate the innovations initiated by Persian rule in the Ancient Near East (550 BC-331 BC), a prime example being a gold plaque from the Oxus Treasure with the representation of a priest that shows the spread of the Zoroastrian religion. The book offers a new authoritative translation of the Cyrus Cylinder by Irving Finkel and the publication of two fragments of a cuneiform tablet that show how the Cyrus Cylinder was most probably a proclamation and not just a foundation deposit.

of what drives her: the sacrifices of her parents and grandparents and all that they had to endure to make sure that she had the opportunity to live the American dream. With an emphasis on her faith and her upbringing, where she pinpoints the lessons and moments that she knew would dictate her future, Elizabeth takes us on a journey that started long before she was even born. From heartbreak and injury, to triumph and recognition, to her start as a figure skater, a writer, a model, and eventually a political activist, Elizabeth takes us along on her journey of finding her place in the world of sports, fashion, Judaism, politics, and so much more. A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

top hats - a brief history: When I first set my heart on wearing a mini top hat I had a few hurdles to overcome! Firstly, the party was that day, secondly a quick trip to the local shops turned up nothing satisfactory, thirdly, I'm not a big one for sewing and didn't have the know-how or supplies to make a fabric hat. Then the idea struck to make a paper top hat. I made up a quick maquette, then got to work on the design on my computer, finally printing out my little burlesque creation. A few snips and the wave of a glue stick and a darling little hat was ready. I secured it safely to my head with a bobby pin and was good to go. When my fellow party goers saw my handy work I was swiftly commissioned to make two more. And so we set off to the party feeling dandy and in high spirits and it's safe to say the hats were a big hit at the party.
