science and technology
are the driving forces that

will help make it better.

Slow Parenting in a Fast-Moving World

Sourcebooks, Inc.

Introducing fold-by-number, a revolutionary origami new concept in paper folding. Created by the founder of Taro's Origami Studio, Origami City marries the joy of paper folding with the foolproof appeal of paint-by-number with the imaginative play of LEGO or Playmobils. This ingenious book is an all-in-one kit for a complete origami metropolis: 75 realistic pieces to fold

with step-by-step instructions; an illustrated paper play mat; and over 100 sheets of preprinted origami paper with numbers and lines for folding. The models—houses, office buildings, cars, emergency and construction vehicles, an airport, even dogs and squirrels to run in the parks—are meticulously detailed, illustrated by Brooklyn-based artist Simon Arizpe. For ages 7 and up.

Astronomy, the Evolving Universe

Pearson Education India

There can be little doubt that the education of the very young provides an essential foundation for all that follows, and the nature of that education is critical. Stressing the importance of outdoor play, this book locates Froebelian practice in current practice, through a wealth of examples from contemporary settings. Early Childhood Practice brings together contributions from distinguished primary and early childhood practitioners, who show

how they have used educational methods advocated by Froebel. *United States Congressional Serial Set* Springer

ideas, all based on real first-year experiences. English Mechanic and World of Science Corwin Press
Illustrations and simple text present simple facts about trains.
Fed Up with Frenzy Routledge
Slow Down. Reconnect. It's Easier than You Think. The hectic pace of everyday life can keep families constantly on the go, but removing some of the frenzy is easy—if you just take a moment to slow down. Hit the pause button on all of life's daily

distractions and reconnect with your family in familiar and exciting ways. Parenting and family expert Susan Sachs Lipman shows you the enormous benefits of having a slower paced, more connected family. Packed with simple, affordable, and delightful games, crafts, and activities, *Fed Up with Frenzy* will help you spend more distraction—free time with your children. Slow down and reconnect with your family by: •
Creating your own outdoor theater •

Experimenting with kitchen science • Playing nature games • Making placemats from fall leaves • And more! "Fed Up with Frenzy is a blueprint for any family that feels overwhelmed by the pace of contemporary life."
—Darell Hammond, Founder and CEO, KaBOOM! "The heart of parenting is connection, but how do parents and children connect when they are going a mile a minute in different directions? Read this book, stop the frenzy, and reconnect." —Lawrence J.

Cohen, PhD, author of Playful Parenting "Fed up with Frenzy is a welcome corrective to a society that has turned childhood into a race to nowhere. With charm, energy and wit, Susan Lipman serves up a treasure trove of ideas to bring joy and sanity back to family life. Every parent needs a copy."—Carl Honoré, author of In Praise of Slowness and Under Pressure

Publications

Based on expert observations of children who experience difficulties with maths this book gives a comprehensive overview of dyscalculia, providing a wealth of information and useful guidance for any practitioner. With a wide range of appropriate and proven intervention strategies it guides readers through the cognitive processes that underpin success in mathematics and gives fascinating insights into

why individual students struggle with maths. Readers are taken step-by-step through each aspect of the maths curriculum and each section includes: Examples which illustrate why particular maths difficulties occur Practical 'action plans' which help teachers optimise children's progress in mathematics This fully revised second edition will bring the new research findings into the practical realm of the classroom. Reflecting current knowledge, Glynis Hannell

gives increased emphasis to the importance of training 'number sense' before teaching formalities, the role of concentration difficulties and the importance of teaching children to use strategic thinking. Recognising that mathematical learning has a neurological basis will continue to underpin the text, as this has significant practical implications for the teacher.

Make fun paper model vehicles with this easy origami kit. Origami Cars, Trucks & Trains Kit is the boxed paper craft kit that brings all the favorite modes of transportation to the world of origami design. Fast, noisy and enormous in real-life, these 3D paper models will fascinate the young and old alike. Now instead of waiting impatiently for the next train to go by, paper folders with any level of skill can craft their own origami vehicles. Use it to craft eye-catching

origami for your friends, to decorate your room—or as a wonderful gift for vehicle lovers. All of the folds are simple enough to be origami-for-kids projects and are a great way to learn origami. The origami paper in the kit already has printed patterns so no paint or glue is required, just unpack and start folding right away! This origami kit contains: 2 full-colored, 32-page booklets Clear step-by-step instructions Easy-to-follow diagrams 27 fun and original origami projects 96 sheets

of durable authentic origami folding paper A variety of different colors and pre-printed patterns Origami Cars, Trucks and Trains provides you this stunning collection of origami projects that will have you creating your own personal fleet in no time! Origami projects include: Bus Police Car Fire Truck Dump Truck Sports Car Ambulance High Speed Train And many more...

REPORT OF THE COMMISSIONER OF EDUCATION The Rosen Publishing Group, Inc

This book constitutes the refereed proceedings of the 22nd International Symposium on Methodologies for Intelligent Systems, ISMIS 2015, held in Lyon, France, in October 2015. The 31 revised full papers presented together with 18 short papers were carefully reviewed and selected from 67 submissions. The papers are organized in topical sections on data mining methods; databases, information retrieval, recommender systems; machine learning;

knowledge
 representation, semantic
 web; emotion recognition,
 music information
 retrieval; network
 analysis, multi-agent
 systems; applications;
 planning, classification;
 and textual data analysis
 and mining.
