Can you ever escape your family ties? Siblings Billa and Ed share their beautiful, grand old childhood home in rural Cornwall. Their lives are uncomplicated. With family and friends nearby and their free and easy living arrangements, life seems as content as can be. But when postcards start arriving from a sinister figure they thought belonged well and

truly in their pasts, old memories are stirred. Why is he contacting them now? And what has he been hiding all these years? The heartwarming and captivating new novel from favourite author Marcia Willett - perfect for fans of Erica James, Santa Montefiore and Victoria Hislop *Blue Postcards* Harry N. Abrams  
From acclaimed British sensation Mal Peet comes a masterful story of adventure, love, secrets, and betrayal in time of war, both past and present. When her grandfather dies, Tamar inherits a box containing a series of clues and coded messages. Out of the past, another Tamar

emerges, a man involved in the terrifying world of resistance fighters in Nazi-occupied Holland half a century before. His story is one of passionate love, jealousy, and tragedy set against the daily fear and casual horror of the Second World War -- and unraveling it is about to transform Tamar's life forever.

17 November 1979 You were reading a somewhat retro loveletter, the last in history. But you have not yet received it. Yes, its lack or excess of address prepares it to fall into all hands: a post card, an open letter in which the secret appears,

but indecipherably. What does a post card want to say to you? On what conditions is it possible? Its destination traverses you, you no longer know who you are. At the very instant when from its address it interpellates, you, uniquely you, instead of reaching you it divides you or sets you aside, occasionally overlooks you. And you love and you do not love, it makes of you what you wish, it takes you, it leaves you, it gives you. On the other side of the card, look, a proposition is made to you, S and p, Socrates and plato. For once the former seems to write, and with his other hand he is even scratching. But what is Plato doing with his outstretched finger in his back? While you occupy yourself with turning it around in every direction, it is the picture that turns you around like a letter, in advance it decipheres you, it preoccupies space, it procures your words and gestures, all the bodies that you believe you invent in order to determine its outline. You find yourself, you, yourself, on its path. The thick support of the card, a book heavy and light, is also the specter of this scene, the analysis between Socrates and Plato, on the program of several others. Like the soothsayer, a "fortune-

telling book" watches over and speculates on that-which-must-happen, on what it indeed might mean to happen, to arrive, to have to happen or arrive, to let or to make happen or arrive, to destine, to address, to send, to legate, to inherit, etc., if it all still signifies, between here and there, the near and the far, da und fort, the one or the other. You situate the subject of the book: between the posts and the analytic movement, the pleasure principle and the history of telecommunications, the post card and the purloined letter, in a word the transference from Socrates to Freud, and beyond. This satire of epistolary literature had to be farci, stuffed with addresses, postal codes, crypted missives, anonymous letters, all of it confided to so many modes, genres, and tones. In it I also abuse dates, signatures, titles or references, language itself. J. D. "With The Post Card, as with Glas, Derrida appears more as writer than as philosopher. Or we could say that here, in what is in part a mock epistolary novel (the long section is called "Envois," roughly, "dispatches" ), he stages his writing more overtly than in the scholarly works. . . . The Post Card also contains a

series of self-reflective essays, largely focused on Freud, in which Derrida is beautifully lucid and direct."—Alexander Gelley, *Library Journal*

A Martian Sends a Postcard Home Drawn and Quarterly

Using a pillow book as her form, nineteen-year-old Cordelia Kenn sets out to write out her life for her unborn daughter. What emerges is a portrait of an extraordinary girl, who writes frankly of love, sex, poetry, nature, faith, and of herself in the world. Her thoughts range widely: on Shakespeare and breasts, periods and piano playing, friendship and trees, consciousness and sleep, and much more besides. As she writes of William Blacklin, the boy she chooses as her first lover, or Julie, the teacher who encourages her spiritual life, Cordelia maddens, fascinates, and ultimately seduces the reader. This is a character never to be forgotten from a writer at the height of his powers.

Once there was a street in Paris and it was called the Street of Tailors. This was years back, in the blue mists of memory. Now it's the 1950s and Henri is the last tailor on the street. With meticulous precision he takes the measurements of men and notes them down in his leather-bound ledger. He draws on the cloth with a blue chalk, cuts the pieces and sews them together. When the suit is done, Henri adds a finishing touch: a blue Tekhelet thread hidden in the trousers somewhere, for luck. One day, the renowned French artist Yves Klein walks into the shop, and orders a suit. Set in Paris, this atmospheric tale delicately intertwines three connected narratives and timelines, interspersed with observations of the colour blue. It is a meditation on truth and lies, memory and time and thought. It is a leap of the imagination, a leap into the void.

**Postcard from Provence** Random House  
 In her now classic novel *Outlander*, Diana

Gabalton told the story of Claire Randall, an English ex-combat nurse who walks through a stone circle in the Scottish Highlands in 1946, and disappears . . . into 1743. The story unfolded from there in seven bestselling novels, and CNN has called it "a grand adventure written on a canvas that probes the heart, weighs the soul and measures the human spirit across [centuries]." Now the story continues in *Written in My Own Heart's Blood*. 1778: France declares war on Great Britain, the British army leaves Philadelphia, and George Washington's troops leave Valley Forge in pursuit. At this moment, Jamie Fraser returns from a presumed watery grave to discover that his best friend has married his wife, his illegitimate son has discovered (to his horror) who his father really is, and his beloved nephew, Ian, wants to marry a Quaker. Meanwhile, Jamie's wife, Claire, and his sister, Jenny, are busy picking up the pieces. The Frasers can only be thankful that their daughter Brianna and her family are safe in twentieth-century Scotland. Or not. In fact, Brianna is searching for her own son, who was kidnapped by a man determined to learn her family's secrets. Her husband,

Roger, has ventured into the past in search of the missing boy . . . never suspecting that the object of his quest has not left the present. Now, with Roger out of the way, the kidnapper can focus on his true target: Brianna herself. Written in *My Own Heart's Blood* is the brilliant next chapter in a masterpiece of the imagination unlike any other.

*Postcard From The Past* Speak

What makes one man a genius and another a criminal? Is there a physical explanation for these differences? For hundreds of years, scientists have been fascinated by this question. In *Postcards from the Brain Museum*, Brian Burrell relates the story of the first scientific attempts to locate the sources of both genius and depravity in the physical anatomy of the human brain. It describes the men who studied and collected special brains, the men who gave them up, and the sometimes cruel fate of the brains themselves. The fascination with elite brains was an aspect of the scientific mania for measurement that gripped the Western world in the mid-nineteenth century, along with a passionate interest in the biological basis of genius or

exceptional talent. Many leading intellectuals and artists willed their brains to science, and the brains of notorious criminals were also collected by eager anatomists ghoulishly waiting in the execution chamber with a bag full of sharp metal tools. Focusing on the posthumous sagas of brains belonging to Byron, Whitman, Lenin, Einstein, the mathematician Carl Friedrich Gauss, and many others, Burrell describes how the brains of famous men were first collected--by means both fair and foul--and then weighed, measured, dissected, and compared; exhaustive studies analyzed their fissural complexity and cell or neuron size. In various cities in Europe, Russia, and the United States, brain collections were painstakingly assembled and studied. A veritable who's who of literary, artistic, musical, scientific, and political achievement waited in Formalin-filled jars for their secrets to be unlocked. The men who built the brain collections were colorful and eccentric figures like Rudolph Wagner, whose study of the brain of Carl Friedrich Gauss led to one of the great scientific debates of the nineteenth century. In America, the Fowler brothers brought

phrenology to the United States and made a convert of Walt Whitman, whose brain was donated to science and disappeared under mysterious circumstances. Eventually, this project was abandoned, and with the discovery of new technologies the study of the brain has moved on to a higher plane. But the collections themselves still exist, and today, in Paris, London, Stockholm, Philadelphia, Moscow, and even Tokyo, the brains of nineteenth century geniuses sit idle, gathering dust in their jars. Brian Burrell has visited these collections and looked into the original intentions and purposes of their creators. In the process, he unearths a forgotten byway in the history of science--a tale of colorful eccentrics bent on laying bare the secrets of the human mind.
