To run sales and distribution smoothly in SAP S/4HANA, you need to manage integration points with other lines of business. Learn how to set them up with this guide to SD integration! Start by assessing the organizational structure and master data shared by sales and peripheral processes. Then follow step-by-step instructions to configure each sales integration point with materials management, finance, revenue recognition, billing, and production planning. A seamlessly integrated SD system awaits! In this book, you'll learn about: a. Organizational and Master Data Build the foundation of your integrated SD system. Learn about the organizational structures for sales and distribution and adjacent lines of business in SAP S/4HANA; then create shared business partner roles and material master data. b. Finance Integration Points Integrate sales and distribution with intersecting finance business processes. Follow step-by-step instructions to configure integration points like credit management, profitability analysis, revenue recognition, resource-related billing, and more. c. Logistics Integration Points Configure integration between sales and distribution and your logistics processes. Set up integration points such as availability checks, stock transfer orders, inventory management, production planning, and transfer of requirements. Highlights include: 1) Integration points 2) Cross-functional processes 3) Organizational structure 4) Master data 5) Materials management 6) Finance 7) Revenue recognition 8) Resource-related billing 9) Production planning 10) Configuration

**Sams Teach Yourself SAP R/3 in 24 Hours** SAP Press

More than ever before, corporations must maintain sophisticated cash management systems that enable them to optimize both their investments and their daily cash "turns." SAP customers are particularly well-positioned to take advantage of the myriad cash management products offered in the SAP ERP Financials, Treasury and Risk Management, and FSCM components, but the real-world aspects of maximizing the existing solutions can be hard to understand, navigate, and implement without experienced, practical guidance. This book provides an overview of the functionality for all key cash management components, including best practices, real-world business scenarios, and key configuration and master data information. It explains how all the components can be integrated, and how both the individual components and the integrated solution can be maximized for optimal performance. Topics covered include SAP ERP Cash Management, Electronic Banking, Liquidity Planner, In-House Cash, Bank Communications Management, and integration with SAP ERP Financials and other components. The book is not meant to be a primer on each of the individual components, but an advanced guide to maximizing all the aspects of cash management available in SAP ERP.

**Cash Management with SAP S/4HANA** Espresso Tutorials GmbH

?Financial Management Information Systems: 25 Years of World Bank Experience on What Works and What Doesn't? was prepared as an updated and expanded version of the FMIS review report drafted in 2003, to highlight the achievements and challenges observed during the design and

implementation of Bank funded FMIS projects since 1984.

**SAP Transaction Codes** Cash Management with SAP S/4HANA

**Cash Management in SAP S/4HANA** Espresso Tutorials GmbH

This book provides a comprehensive overview of the application of ERP Financials to the make to stock and make to order manufacturing process models. It is designed to provide valuable solutions and configuration/integration options that readers can use and apply directly in their daily activities. For Finance users, the book covers the standard business drivers and KPIs as they apply to each model, and lends guidance for configuring Financial Accounting and Controlling to maximize functionality for manufacturing finance. Implementation managers and consultants will benefit from the coverage of integrating ERP Financials with other SAP applications such as PP and MM, as well as the configuration sections for Master Data, Cost Object Controlling, and the Information System, among others. Readers from both functions will be able to make use of the numerous screen shots, configuration steps, best practice examples, and tips for system customization. Acknowledging the differences between the two primary manufacturing process models, the book is divided into three sections after an introductory chapter covering information generic to manufacturing models supported in SAP. Part I of the book covers the Make to Stock model, and comprises the bulk of book. Part II covers the Make to Order model. Part III provides a chapter filled with ready-to-use checklists and guides for budgeting and closing activities, and a chapter on the application of SAP Financial Performance Management (FPM, formerly CPM) to the manufacturing finance scenario.

**Migrating to SAP S/4HANA** Espresso Tutorials GmbH
