JAYCE LAUREN

The Recuyell of the Historyes of Troye Cambridge University Press
Blending global scope with local depth, this book throws new light on important themes. Spanning four centuries and vast space, it combines the history of ideas with particular histories of encounters between European voyagers and Indigenous people in Oceania (Island Southeast Asia, New Guinea, Australia, New Zealand, and the Pacific Islands).
Sensory Mechanisms of the Retina
FeniXX
A history of Africa from the 16th to the 18th centuries, this study concentrates on the continuing evolution of African states and cultures, the increase in external trade, and the consequences of the slave trade. The series is co-published in Africa with seven publishers, in the United States and Canada by the University of California Press, and in association with the UNESCO Press.

Air et cosmos University of Chicago Press

"[An] important essay by a philosopher who more convincingly than any other I can think of demonstrates the continuing significance of his vocation in the life of our culture."—Karsten Harries, *The New York Times Book Review* With *The Presence of Myth*, Kolakowski demonstrates that no matter how hard

man strives for purely rational thought, there has always been—and always will be—a reservoir of mythical images that lend "being" and "consciousness" a specifically human meaning. "Kolakowski undertakes a philosophy of culture which extends to all realms of human intercourse—intellectual, artistic, scientific, and emotional. . . . [His] book has real significance for today, and may well become a classic in the philosophy of culture."—*Anglican Theological Review*

(Co)end Calculus Harvard University Press

This easy-to-cite handbook gives the first systematic treatment of the (co)end calculus in category theory and its applications.

Catalog der Commerz-Bibliothek in Hamburg Springer

The book describes the main marine and coastal biological systems of Passamaquoddy Bay and adjacent waters and the oceanographic and meteorological characteristics of the area. Subject areas begin with meteorology and oceanography. The second group covers the intertidal systems with chapters on rocky intertidal shores, rock pools, coarse sedimentary shores and salt marshes. The third general section covers hard and sedimentary sublittoral habitats. Following chapters discuss pelagic systems under the headings fishes, phytoplankton, larger zooplankton, and microzooplankton. Three chapters deal

with the birds, amphibians and reptiles, and marine mammals. Finally coastal vegetation is described.

Letters from and to Charles Kirkpatrick Sharpe Springer Science & Business Media

On Hashish' is Walter Benjamin's posthumous collection of writings, providing a unique and intimate portrait of the man himself, of his experiences of hashish, and also of his views on the Weimar Republic.

An Introduction to Phonetics: English, French, and German, With Reading Lessons and Exercises Peeters Publishers

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

The Decrees of Memphis and Canopus: The Decree of Canopus Legare Street Press

"This book,' Michael Fried's work opens, 'was written not so much chapter by chapter as painting by painting over a span of roughly ten years.' Courbet's Realism is a magnificent work and its very first sentence brings us up against the qualities of mind of its author, qualities that make it as impressive as it is. It allows us to reconstruct the keen eye, the commitment to perception, the gift of rapt concentration, the conviction that great paintings are not necessarily understood easily, and the further conviction that a great painter deserves to get from us as good as he gives. By drawing on these qualities, Fried

achieves something out of reach for all but a handful of his colleagues. In his writing, art history takes on some of the character of art itself. It is driven by the same stubborn resolve to open our eyes."—Richard Wollheim, San Francisco Review of Books Courbet's Realism is clearly a major contribution to the highly active field of Courbet studies. . . . But to contribute here and now is necessarily also to contribute to central debates about art history itself, and so the book is also—I hesitate to say 'more importantly,' because of the way object and method are woven together in it—a major contribution to current attempts to rethink the foundations and objects of art history. . . . It will not be an easy book to come to terms with; for all its engagement with contemporary literary theory and related developments, it is not an application of anything, and its deeply thought-through arguments will not fall easily in line with the emerging shapes of the various 'new art histories' that tap many of the same theoretical resources. At this moment, there may be nothing more valuable than such a work."—Stephen Melville, Art History

A Century of Soil Mechanics: Classic Papers on Soil Mechanics Published by the Institution of Civil Engineers, 1844-1946 UN

This book is the product of Research Study Group (RSG) 13 on "Human Engineering Evaluation on the Use of Colour in Electronic Displays," of Panel 8, "Defence Applications of Human and Biomedical Sciences," of the NATO Defence Research Group. RSG 13 was chaired by Heino Widdel (Germany) and consisted of Jeffrey Grossman (United States), Jean-Pierre Menu (France), Giampaolo Noja (Italy, point of contact), David Post (United States), and Jan Walraven (Netherlands). Initially,

Christopher Gibson (United Kingdom) and Sharon McFaddon (Canada) participated also. Most of these representatives served previously on the NATO program committee that produced *Proceedings of a Workshop on Colour Coded vs. Monochrome Displays* (edited by Christopher Gibson and published by the Royal Aircraft Establishment, Farnborough, England) in 1984. RSG 13 can be regarded as a descendent of that program committee. RSG 13 was formed in 1987 for the purpose of developing and distributing guidance regarding the use of color on electronic displays. During our first meeting, we discussed the fact that, although there is a tremendous amount of information available concerning color vision, color perception, colorimetry, and color displays-much of it relevant to display design-it is scattered across numerous texts, journals, conference proceedings, and technical reports. We decided that we could fulfill the RSG's purpose best by producing a book that consolidates and summarizes this information, emphasizing those aspects that are most applicable to display design.

An Ka Bamanankan Kalan Univ of California Press

"This volume covers the period from the end of the Neolithic era to the beginning of the seventh century of our era. This lengthy period includes the civilization of Ancient Egypt, the history of Nubia, Ethiopia, North Africa and the Sahara, as well as of the other regions of the continent and its islands."--Publisher's description

Science, Voyages, and Encounters in Oceania, 1511-1850 Springer Science & Business Media

Q 13:34-35, the Jerusalem Logion, aligns the rejection of the speaker by Jerusalem both with the abandonment of

Jerusalem's house and with the future invisibility and return of the speaker: 'You will not see me until you say, Blessed is the Coming One in the name of the Lord' (13:35b). The coincidence of not seeing language with a reference to a future coming is reminiscent of the connection, in Jewish literature especially, between the assumption and eschatological function. The book proposes that this reference to Jesus' assumption is a clue to how Q conceives of the post-mortem vindication of Jesus, since numerous Q sayings presuppose a knowledge of Jesus' death. In support of this, the book argues that in Hellenistic Jewish writings assumption was not always considered to be an escape from death (as in the biblical instances of Enoch and Elijah), but could happen at or after death, as was more clearly the case in Greek thought. Such a strategy of vindication is necessary for Q because it evidences a belief in Jesus' ongoing existence and future return as the Son of Man, and because resurrection though a feature of Q's eschatology is not individually applied to Jesus. A similar view is presupposed by the pre-Markan empty tomb tradition, which describes the disappearance of Jesus' body but narrates neither the resurrection itself nor an appearance of the risen Jesus. The book also draws out implications of the thesis for the place of the Sayings Gospel Q within the early Christian movements, particularly vis-vis the vindication of Jesus.

Pakeha schoolteacher. In the strange world of the city, Ripeka discovers that she cannot make the break from her whanau, that the old ways are too strong. The first novel by a Maori woman ever published, Mutuwhenua is a powerful, mo...

Courbet's Realism Stanford University Press

The Sayings Gospel Q in Greek and English with Parallels from the Gospels of Mark and Thomas is the outcome of a generation's work by the International Q Project, in reconstructing the collection of sayings ascribed to Jesus (and some to John) that lies behind the Gospels of Matthew and Luke. It thus makes available in a convenient form the most important source for reconstructing the message of Jesus' original Galilean followers, as they proclaimed anew after his death his message of God's reign. Q is, as a result, the most important single source for the study of the historical Jesus. It should be in the hands of every student of theology and of every layperson seriously interested in knowing more about Jesus. This small volume presents, on facing pages, the Greek and English reconstruction of the text of Q. It is in a simplified and more readable format than its original massive publication of 1990, *The Critical Edition of Q: Synopsis including the Gospels of Matthew and Luke, Mark and Thomas with English, German and French Translations of Q and Thomas*, edited by James M. Robinson, Paul Hoffmann, and John S. Kloppenborg, Managing Editor Milton C. Moreland, at Peeters and Fortress Press.

Le Palor Great George St S.W. 1

The Problem of a Chinese Aesthetic calls for and applies a new model of comparative literature - one that,

instead of taking for granted the commensurability of traditions and texts, gives incompatibility and contradiction their due. Exposing contemporary literary theory to the risks of ancient Chinese literature (and vice versa), this book considers a linked series of case studies. To what degree does the translation between languages and texts that we call comparative literature depend on allegory or translation within a single text or language? The author offers an important, new perspective on the reading of the Shih-ching or Book of Odes and the question of allegory and metaphor in the Chinese poetic tradition.

Africa from the Sixteenth to the Eighteenth Century James Currey Publishers

Homogenization is not about periodicity, or Gamma-convergence, but about understanding which effective equations to use at macroscopic level, knowing which partial differential equations govern mesoscopic levels, without using probabilities (which destroy physical reality); instead, one uses various topologies of weak type, the G-convergence of Sergio Spagnolo, the H-convergence of François Murat and the

author, and some responsible for the appearance of nonlocal effects, which many theories in continuum mechanics or physics guessed wrongly. For a better understanding of 20th century science, new mathematical tools must be introduced, like the author's H-measures, variants by Patrick Gérard, and others yet to be discovered.
