 Mechanics Classical Fourier Analysis
 Graduate Texts The main goal of this text
 is to present the theoretical foundation
 of the field of Fourier analysis on
 Euclidean spaces. It covers classical
 topics such as interpolation, Fourier
 series, the Fourier transform, maximal
 functions, singular integrals, and
 Littlewood-Paley theory. The primary
 readership is intended to be graduate
 students in mathematics with the
 prerequisite including satisfactory
 completion of courses in real and
 complex variables. Classical Fourier
 Analysis (Graduate Texts in Mathematics
 ... The first volume contains the classical
 topics such as Interpolation, Fourier
 Series, the Fourier Transform, Maximal
 Functions, Singular Integrals, and
 Littlewood-Paley Theory. The second
 volume contains more recent topics such
 as Function Spaces, Atomic
 Decompositions, Singular Integrals of
 Nonconvolution Type, and Weighted
 Inequalities. Classical Fourier Analysis
