KAISER KENDAL

The Last Poems of D.H. Lawrence Weiser Books
 Robots may one day rule the world, but what is a robot-ruled Earth like? Many think that the first truly smart robots will be brain emulations or "ems." Robin Hanson draws on decades of expertise in economics, physics, and computer science to paint a detailed picture of this next great era in human (and machine) evolution - the age of em.

This Is Water Verso

This is the biography of Susan Clay Sawitzky (1897-1981), who struggled for 60 years against the values of Southern womanhood assimilated in her youth. She wrote of confinement and freedom and published a small amount of poetry which reveals the forces that compromised her dreams.

The Age of Em Booktango

The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

The Faraway Nearby Routledge

'A dazzling book ... the new Stephen Hawking' Sunday Times The bestselling author of Seven Brief Lessons on Physics takes us on an enchanting, consoling journey to discover the meaning of time 'We are time. We are this space, this clearing opened by the traces of memory inside the connections between our neurons. We are memory. We are nostalgia. We are longing for a future that will not come.' Time is a mystery that does not cease to puzzle us. Philosophers, artists and poets have long explored its meaning while scientists have found that its structure is different from the simple intuition we have of it. From Boltzmann to quantum theory, from Einstein to loop quantum gravity, our understanding of time has been undergoing radical transformations. Time flows at a different speed in different places, the past and the future differ far less than we might think, and the very notion of the present evaporates in the vast universe. With his extraordinary charm and sense of wonder, bringing together science, philosophy and art, Carlo Rovelli unravels this mystery. Enlightening and consoling, *The Order of Time* shows that to understand ourselves we need to reflect on time -- and to understand time we need to reflect on ourselves. Translated by Simon Carnell and Erica Segre

UFO Nexus: A Journey into Alien Realms and Cosmic Secrets Routledge

In the first book to take D. H. Lawrence's Last Poems as its starting point, Bethan Jones adopts a broadly intertextual approach to explore key aspects of Lawrence's late style. The evolution and meaning of the poems are considered in relation to Lawrence's prose works of this period, including *Sketches of Etruscan Places*, *Lady Chatterley's Lover*, and *Apocalypse*. More broadly, Jones shows that Lawrence's late works are products of a complex process of textual assimilation, as she uncovers the importance of Lawrence's reading in mythology, cosmology, primitivism, mysticism, astronomy, and astrology. The result is a book that highlights the richness and diversity of his poetic output, also prioritizing the masterpieces of Lawrence's mature style which are as accomplished as anything produced by his Modernist contemporaries.

The Great Ideas: Angel to love Nook Press

For millennia, great thinkers have contemplated the meaning and purpose of human existence; but while most assumed that humanity was the end point of creation or the pinnacle of evolution, Ted Chu makes the provocative claim that the human race may in fact be a means rather than an end—that humankind will give rise to evolutionary successors. In this wide-ranging and authoritative work, Chu reexamines the question of human purpose in light of the extraordinary developments of science and technology. Arguing that a deep understanding of our place in the universe is required to navigate the magnitude of the choices that lie ahead, he surveys human wisdom from both East and West, traces the evolutionary trajectory that has led to this point, and explores the potentials emerging on the scientific frontier. The book addresses the legitimate fears and concerns of "playing God" but embraces the possibility of transcending biological forms and becoming or creating entirely new life-forms.

Ah-Ha to Zig-Zag Mohr Siebeck

Only once did David Foster Wallace give a public talk on his views on life, during a commencement address given in 2005 at Kenyon College. The speech is reprinted for the first time in book form in *THIS IS WATER*. How does one keep from going through their comfortable, prosperous adult life unconsciously? How do we get ourselves out of the foreground of our thoughts and achieve compassion? The speech captures Wallace's electric intellect as well as his grace in attention to others. After his death, it became a treasured piece of writing reprinted in *The Wall Street Journal* and the *London Times*, commented on endlessly in blogs, and emailed from friend to friend. Writing with his one-of-a-kind blend of causal humor, exacting intellect, and practical philosophy, David Foster Wallace probes the challenges of daily living and offers advice that renews us with every reading.

Cautious Rebel Springer Nature

Being mobile in today's world is influenced by many aspects including transnational ties, increased ease of access to transport, growing accessibility to technology, knowledge and information and changing socio-cultural outlooks and values. These factors can all engender a (re)formation of our everyday life and moving - as and for lifestyle - has, in many ways, become both easier and much more complex. This book highlights the crossroads between concepts of lifestyle and the growing body of work on 'mobilities'. The study of lifestyle offers a lens through which to study the kinds of moorings, dwellings, repetitions and routines around which mobilities become socially, culturally and politically meaningful. Bringing together scholars from geography, sociology, tourism, history and beyond, the authors illustrate the breadth and richness of mobilities research through the concept of lifestyle. Organised into four sections, the book begins by dealing with aspects of bodily performance through lifestyle mobility. Section two then looks at how we can use mobile methods within social research, whilst section three explores issues surrounding ideas of mobility, immobility and belonging. Finally, section four draws together a number of chapters that focus on the complexities of identity within mobility. Often drawing on ethnographic research, contributors all share one common feature: they are at the forefront of research into lifestyle mobilities.

Is Nothing Sacred? Springer Nature

The treatise *De mundo* offers a cosmology in the Peripatetic tradition which subordinates what happens in the cosmos to the might of an omnipotent god. Thus the work is paradigmatic for the philosophical and religious concepts of the early imperial age, which offer points of contact with nascent Christianity.

Get ready to unravel the labyrinth of the enigmatic and the unexplained with "UFO Nexus: A Journey into Alien Realms and Cosmic Secrets." This book, a magnum opus in UFO and extraterrestrial studies, traverses across mysterious lands and through time, examining eerie occurrences and cosmic interventions. 'UFO Nexus' is not just a meticulous examination of events—it is a journey into understanding the broader ramifications and multifaceted connections of alien technology, ancient lore, and contemporary revelations. Delve into the profound sections on UFOs, UAPs & Extraterrestrials to uncover the tantalizing mysteries of otherworldly non-human entities, possibly walking amongst us. Explore the groundbreaking UFO Oversight Revisited: A Half-Century Landmark, providing illuminating insights into the enigma that has puzzled humanity for decades. The book features a deep analysis of the July 26th, 2023, Hearing on UAPs, where eminent personalities like David

Grusch, Ryan Graves, and David Fravor shared their invaluable perspectives, painting a broader picture of uncharted territories. With sections such as Collaborative Futures, discover how transparency, open data, and AI solutions are revolutionizing our quest for the unknown, providing unparalleled insights into the celestial enigma. 'Revisit the infamous 'Tic-Tac' UFO Incident and delve deeper into the intricate details and revelations of an incredible incident, shedding light on unknown realms. Wonder about the technological marvels that might be products of Reverse Engineering, connected possibly to the mysterious Roswell, unveiling the clandestine secrets of alien technology. Explore the rare and uncharted territories of the Fascist Files, delving into the 1933 Magenta, Italy UFO crash, a bygone incident cloaked in mystery. Discover the shocking 2023 Las Vegas UFO & Alien Incident, a chilling narrative of an extraterrestrial encounter that has left the world in awe. The comprehensive exploration in 'UFO Nexus' dives deep into the intersections of ancient beliefs and contemporary interpretations, daring to ask the pivotal questions and challenging our perceptions about our existence and the vast, enigmatic cosmos surrounding us. And hold tight as you embrace the journey and let 'UFO Nexus' guide you through the uncharted territories of the extraordinary. Join author Anthony F. Sanchez (2024 MUFON International Symposium - Panelist and Speaker) on this captivating journey as you unravel the mysteries of UFOs and UAPs, one chapter at a time. UFO Nexus - A Journey into Alien Realms and Cosmic Secrets - THE REVIEWS. "Beautiful presentation." - Jay Bluemke, Supervising Producer & Editor, UFO Hunters (SyFy Network) "Anthony delves even deeper, exploring realms of the unknown that are scarcely imagined by the average mind." - Connie Willis, Coast to Coast AM "Meticulous and independent analysis of recent testimonies from public figures and witnesses, enriching our understanding of UFOs, UAPs, and extraterrestrial entities." - Dev Rugne, MUFON Assistant State Director, Northern California "'UFO Nexus' checks off all of the boxes that I look for in UFO research." - Bill Murphy, Lead Scientist, Fact or Faked: Paranormal Files (SyFy Network) "The book provides realistic solutions to ending the decades-long embargo of truth on the subject, and to codifying the information in an open and transparent collaboration." - Brad Olsen, Author of "Beyond Esoteric: Escaping Prison Planet"

Who's Who in Non-Classical Mythology AuthorHouse
Gifts come in many guises. One summer, Rebecca Solnit was bequeathed three boxes of ripening apricots, which lay, mountainous, on her bedroom floor - a windfall, a riddle, an emergency to be dealt with. The fruit came from a neglected tree that her mother, gradually succumbing to memory loss, could no

longer tend to. From this unexpected inheritance came stories spun like those of Scheherazade, who used her gifts as a storyteller to change her fate and her listener's heart. As she looks back on the year of apricots and emergencies, Solnit weaves her own story into fairytales and the lives of others - the Marquis de Sade, Mary Shelley and Ernesto 'Che' Guevara. She tells of unexpected invitations and adventures, from a library of water in Iceland to the depths of the Grand Canyon. She tells of doctors and explorers, monsters and moths. She tells of warmth and coldness, of making art and re-making the self.
The Cosmic Wanderer Xlibris Corporation
Introducing new, multidisciplinary concepts, this book explains how we have reached a critical threshold in the study of astrobiology.

The Order of Time Strange Lights Publishing
First published in 2001. Part of the Routledge Who's Who series, this is an accessible, authoritative and enlightening definitive biographical guides to a range of subjects. Focusing on mythology, this book provides a uniquely comprehensive guide to world mythology beyond Greece and Rome with over 2,500 accessible and detailed entries. A complete historical and cultural context of each entry covering a wide geographical scope, from the Near East and Europe to Asia, the Americas, Australasia and Africa. Presented in an easy to use A-Z format this is the ideal reference resource for anyone interested in mythology.

Science Fantasy tales of a weird nature! This classic volume, now in an affordable paperback, collects issues #19-#22 of the groundbreaking comics anthology *Weird Fantasy*, as well as #25 and #26 of *Weird Science-Fantasy*—fully remastered in digital color! Featuring strange and exciting tales from iconic writers and artists including Al Feldstein, Jack Kamen, Wally Wood, Jack Kamen, Joe Orlando, Al Williamson, and more! Featuring a foreword by Greg Nicotero!

The Language of Creation Routledge
TCW explores exotic and unusual theoretical methods of relativistic rocket flight. Many of the proposed mechanisms involve extreme gamma factors. Special and general relativistic aspects of propulsion are explored.

Great Books of the Western World: The great ideas Souvenir Press
To understand Empedocles' thought, one must view his work as a unified whole of religion and physics. Only a few interpreters, however, recognise rebirth as a positive doctrine within Empedocles' physics and attempt to reconcile its details with the cosmological account. This study shows how rebirth underlies

Empedocles' cosmic system, being a structuring principle of his physics. It reconstructs the proem to his physical poem and then shows that claims to disembodied existence, individual identity and personal survival of death(s) prove central to his physics; that knowledge of the cosmos is the path to escape rebirth; that purifications are essential to comprehending the world and changing one's being, and that the cosmic cycle, with its ethical import, is the ideal backdrop for Empedocles' doctrine of rebirth. This title is part of the Flip it Open Programme and may also be available Open Access. Check our website Cambridge Core for details.

All that is Solid Melts Into Air Cambridge University Press
Maira Kalman's exuberant illustrations and humorous commentary bring design history to life in this inspired ABC book that celebrates thirty-one objects from the Cooper Hewitt, in time for its long-awaited reopening. "A. Ah-ha! There you Are." begins Maira Kalman's joyfully illustrated romp through the treasures of Cooper Hewitt's design collection. With her signature wit and warm humor, Kalman's ABC book introduces children and adults to the myriad ways design touches our lives. Posing the question "If you were starting a museum, what would you put in your collection?", Kalman encourages the reader to put pen to paper and send in personal letters—an intimate, interactive gesture to top off her unique tour of the world of design. Objects ranging from a thirteenth-century silk thinking cap to 1889 tin slippers with bows, all the way to Gerrit Rietveld's Zig-Zag chair are brought to colorful life. Kalman's hand-lettered text is whimsical and universal in turns, drawing lessons as easily from a worn old boot as a masterpiece of midcentury modernism. Irresistibly, we are led to agree, "Everything is design."

Lifestyle Mobilities CreateSpace
A Companion to Modern Art presents a series of original essays by international and interdisciplinary authors who offer a comprehensive overview of the origins and evolution of artistic works, movements, approaches, influences, and legacies of Modern Art. Presents a contemporary debate and dialogue rather than a seamless consensus on Modern Art Aims for reader accessibility by highlighting a plurality of approaches and voices in the field Presents Modern Art's foundational philosophic ideas and practices, as well as the complexities of key artists such as Cezanne and Picasso, and those who straddled the modern and contemporary Looks at the historical reception of Modern Art, in addition to the latest insights of art historians, curators, and critics to artists, educators, and more
