*Essential MCQs in Obstetrics and Gynaecology for Medical Students*  
American Medical Association Press  
Your Secret Weapon for Mastering the USMLE Step 3 How prepared are you for the new USMLE Step 3? Are you worried about answering questions on basic science concepts? Uncertain about managing the clock in CCS cases? Unprepared to answer questions on general OB-GYN topics? This book is the

balm. Written by Dr. Elizabeth August and bestselling author and lecturer Dr. Conrad Fischer, *Obstetrics & Gynecology Correlations & Clinical Scenarios* provides an entertaining and comprehensive review of OB-GYN topics found on the USMLE Step 3. Progressive clinical cases--embedded with meaningful foundational science correlations and CCS exam tips--ensure that you're prepared for the new USMLE Step 3. Features: OB-GYN cases with Q&A provide practice for the multiple-choice exam component of the USMLE Step 3 Embedded basic science correlations prepare you to answer foundational

science questions Integrated CCS navigation tips prepare you to handle Computer-based Case Simulations High-yield coverage of prenatal care, maternal disease during pregnancy, labor and delivery, uterine and cervical abnormalities, breast disease, ovarian disease, and more  
*British Journal of Hospital Medicine* John Wiley & Sons  
Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, *Essential Neonatal Medicine* continues to be an indispensable resource that combines the depth and breadth of a

textbook with the efficiency of a revision guide. Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, *Essential Neonatal Medicine* is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

*Histology and Cell Biology* McGraw Hill Professional

Multiple Choice Questions (MCQs) are the backbone for all entrance examinations throughout the world. MCQs are used to evaluate student's cognitive acumen in all the fields and discipline. This book contains 28 chapters covering almost all of the biochemistry syllabus through 3500+ MCQs. Each MCQ is validated from the reference biochemistry books. The book is mainly designed for the undergraduate, postgraduate, MBBS medical biochemistry students of medical, pharmacy, physiotherapy, nursing, medical laboratory

sciences and other allied courses. This book can also be useful for the PG entrance exam of various universities, NET examinations, USMLE entrance examinations, etc. It includes questions from all categories, i.e. from the simplest ones to real brain teasers, in order to cater the needs of the unprepared students who start studying at the eleventh hour, besides, of course, the committed ones who are well conversant with the subject. The book is based on the current pattern of exam, and will prove very useful for studying, practice and during precious moments before the exam for reference and revision. It is highly recommended to sharpen your problem solving skills with thorough practice of numerous questions provided in the book, and prepare to face the exam confidently and successfully. *International Medical Graduates in the United States* Jaypee Brothers, Medical Publishers Pvt. Limited

**SHARPEN YOUR CRITICAL THINKING SKILLS AND IMPROVE PATIENT CARE** Experience with clinical cases is key to mastering the art and science of medicine and ultimately to providing patients with competent clinical care. Case Files®: Obstetrics &

Gynecology provides 60 true-to-life cases that illustrate essential concepts in obstetrics and gynecology. Each case includes an easy-to-understand discussion correlated to key concepts, definitions of key terms, clinical pearls, and USMLE®-style review questions to reinforce your learning. With Case Files®, you'll learn instead of memorize. · Learn from 60 high-yield cases, each with board-style questions · Master key concepts with clinical pearls · Cement your knowledge with 25 new integrated challenge questions · Polish your approach to clinical problem solving and to patient care · Perfect for medical students, physician assistant students, nurse midwife and nurse practitioner students

The result is an outstanding resource to help you meet the clinical challenges encountered in obstetrics and gynecology. Book jacket.

*Royal Society of Medicine Career Handbook: ST3 - Senior Doctor* McGraw-Hill/Appleton & Lange

This work features a Foreword by David Taylor, Vice Dean, Leicester Medical School. "This book is the first to assist students with a new format of testing knowledge and clinical skills, i.e., the extended matching question. I am delighted my colleagues here in Leicester, where undergraduate education is given the very highest priority, have found the time and energy to write this book. This book comprehensively tests a whole range

of obstetrics and gynaecology and I congratulate them for it." - David Taylor, in the Foreword. This revision aid in Obstetrics and Gynaecology is based on the Extended Matching Question format (EMQ). It contains over 200 patient vignettes arranged in topic areas covering a broad range of themes and degrees of difficulty. It provides test EMQs and detailed answers at the completion of each section. "EMQs in Obstetrics and Gynaecology" is an indispensable study and revision aid for undergraduate medical students preparing for in-course assessment in obstetrics and gynaecology as well as final exams. It also provides a vital review for specialist trainees in obstetrics and gynaecology preparing to take postgraduate exams.

*Review for USMLE* JP Medical Ltd  
SBA Questions for the Part 2 MRCOG is a valuable preparation resource aimed at those specialising in obstetrics and gynaecology who are planning to take the Part 2 MRCOG examination. It contains two hundred practice single best answer questions written by MRCOG question writers, with accompanying explanations and references. It also contains an

introduction to the new format of the examination and the rationale for the changes. The first section consists of two hundred single best answers allowing the reader to test their knowledge. The second section lists the correct response accompanied by an explanation and suggestions for further reading. SBA Questions for the Part 2 MRCOG is the only official preparation book produced by the RCOG and is therefore essential reading for candidates sitting this examination in its new format.

**Ob/Gyn Secrets E-Book** Obstetrics & Gynecology Correlations and Clinical Scenarios

The second edition of this quick reference handbook for obstetricians and gynecologists and primary care physicians is designed to complement the parent textbook Clinical Obstetrics: The Fetus & Mother The third edition of Clinical Obstetrics: The Fetus & Mother is unique in that it gives in-depth attention to the two patients - fetus and mother, with special coverage of each patient. Clinical Obstetrics thoroughly reviews the biology, pathology, and clinical management of disorders affecting both the fetus and the

mother. Clinical Obstetrics: The Fetus & Mother - Handbook provides the practising physician with succinct, clinically focused information in an easily retrievable format that facilitates diagnosis, evaluation, and treatment. When you need fast answers to specific questions, you can turn with confidence to this streamlined, updated reference.

Essentials of Obstetrics and Gynecology  
PasTest Ltd

**Ethical Issues of Human Genetic**

**Databases** McGraw Hill Professional  
Thousands of international medical graduates come to the United States to

start their career as physicians. Many of them, however, are not aware of the challenges and problems that they may encounter along the way. These difficulties can range from the language and cultural barriers to a lack of confidence and self-esteem. Many students are also unaware of the other career options besides getting into a clinical residency program. As a result of these issues, a great number of foreign medical students remain unmatched into the National Resident Matching Program. Not matching can be devastating for these graduates, both financially and medically. Students often suffer from psychological effects like major depression and generalized anxiety disorder. This book outlines the potential problems faced by these graduates and their possible solutions. Each chapter collects research evidence, interviews and surveys to gather information to work on each possible problem one by one and describes a solution in great detail. Comprised of thirty chapters, each chapter is broken down into smaller sub-sections to investigate the main theme in depth. Issues addressed include the different types of international medical graduates

and their lives in the United States, differences in the education system and healthcare system, the triangle of residency, language and cultural barriers, lack of professional contacts, confidence, self-image and self-esteem issues, and restriction to specific fields and career paths. Written by experts in the field, *International Medical Graduates in the United States* is a first of its kind text that addresses the biggest issues faced by foreign medical graduates in today's world.

*Lange Q&A Obstetrics & Gynecology, 9th Edition* CRC Press

The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. *Counselling for Maternal and Newborn Health Care* is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook.

Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labor; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.
