Introduction to Research in Music

Wizard Publisher

Songwriting is a skill that can be learned by anyone. In my 25 years of teaching, 100% of my students who wanted to write songs, did learn to write songs. Most of them were complete beginners who had never even written part of a song. They simply studied the information in this book, did the recommended exercises, and within months were writing songs. If you have no idea how to write songs right now, don't worry. It's easier than you think. You don't need to read music or play an instrument. All you need to get started is the ability to hum a melody. You will also need a phone or tablet with a recording app. Many hit songs are written with nothing more than a recording app on cell phone. Pretty simple! The good news

is you don't need to read and write music in order to be a great songwriter. Check out these songwriters who never learned to read music: Michael Jackson, Paul McCartney, Taylor Swift, Eric Clapton, the Beatles, Eddie Van Halen, Bob Dylan, Jimi Hendrix, Slash, Stevie Wonder, and Lionel Richie. They didn't learn to read music because it was never necessary. It's not necessary for you either. I started off just like you. I had a desire to write songs but had never written one. My first few songs were pretty raw, and I would be embarrassed to have you hear them now. But over the years, I developed my writing to the point of getting my songs and jingles on TV, radio, Spotify, iTunes, and most of the major streaming services. I even had one of my songs placed in a movie. I was not gifted with extraordinary talents. I just studied with some of the industry's top professional songwriters and kept writing. The more I wrote, the better my songs became. If I can do that, so can you. Here's another way to look at it. If you were stuck on a deserted island, and the only way you could get off was to read this book and write three good songs, I guarantee that you would write three good songs. It's just a matter of learning the craft, and putting in the time. Nothing magical. If you're just starting out as a songwriter, your first few songs will be rough. That's normal! It doesn't mean you're a bad songwriter. It just means you're a beginning songwriter. If you stick with it, you'll get better. Start writing and keep writing. Even if your complete beginner you will learn how to:

1. Write great lyrics
2. Create awesome melodies for your lyrics
3. Record your first demo
4. Get your songs heard by industry pros
5. Copyright your songs

John Ford is the founder of the John Ford School of Voice.

For 25 years, he and his staff have helped thousands of people to sing, perform, and write songs better than they ever dreamed possible. Most of these students were complete beginners when they started. Ford's students are working in clubs and recording studios, and have been featured on MTV, The Late Show, The Sundance Film Festival, The Howard Stern Show, as well as most streaming platforms and pop radio stations throughout the world.

This guidebook provides practical and specific assistance to undergraduate students about writing research papers and other types of projects in the field of music. It also offers practical help in writing effective prose on any topic and ways to improve one's writing style. The Third Edition has been extensively revised and rewritten. The organization of the material has been changed in order to present issues in a more logical order. There are expanded sections on new approaches to musicological research, electronic resources for research, and how to use word processing programs to draft and edit a paper. The section on format issues has been revised and expanded to make the detailed information it offers clearer and more useful. Finally, a new sample student paper has been included in the Appendix, along with discussion questions designed to help students analyze the paper, read more critically, and understand better the process of researching a topic, designing a paper, and arguing a thesis persuasively.

Author- Samidha Vedabala * Publisher- Wizard Publisher * Book Details:- * ISBN-978-81-949076-4-0 * Size- 15.24 X 22.86 X 4 CM * About the book:- Very few people knew that I am writing this book. Even I could not imagine that I will come up with such a book so early. As always, there are few people behind a person who do the things. I, first of all, will mention those three people. Firstly, Himanshu, my husband, this is his idea. It was just a few months back when the research methodology lectures started around March. I was making my notes for class. He said, "Write every lecture in detail; you can make it a book later". I didn't know this can be materialized in July. Secondly, my Guruji Pandit Sanjoy Bandopadhyay, who is always an inspiration for almost everything in my life. He deserves special thanks as he only had confidence (which I didn't have) on me. Thirdly, Dr Krishnendu Dutta, My colleague at Sikkim University. He has just blind confidence in me. He only asked me to do it just now. And I did; thank You Sir! The time when this book was being written was tough in every one's life. India was fighting with the second wave of COVID-19. With lots of stress and worry of losing one of the dearest members of the family, sometimes I was writing with tears in my eyes. In this journey, two of my dearest students Manisha and Saraswati, who were with me for almost three months, have helped me a lot in nearly everything. They are the witness of all the sentences/pages I was improving. Every diagram I was doing. Thanks a lot, Dear!. God bless you. My mother and sister were worrying every day about how will I finish my work. My MPhil and PhD student. Who unknowingly are the very first inspiration for this book to happen. And to my little sitar student

Shradha Sharma who has designed the cover page. Special thanks to the wizard publisher especially Saiyed Junaid, to bear with my delay submitting the manuscript and materializing it. Oxford University Press, USA

In A Style and Usage Guide to Writing About Music, Thomas Donahue presents a collection of guidelines to help express through the written word the special notations, terms, and concepts found in the discipline of music. It concentrates on questions of style and format in the

interest of good formal writing within the context of United-States English, so that writers may communicate their ideas clearly and effectively. While compiling the guidelines, Donahue reviewed content from many other music and general guides. He documented the most common formats in order to assist the writer in selecting an appropriate format for the given circumstance when more than one may apply. The book draws on profuse musically-oriented examples and is arranged by topics both musical and typographic, such as the proper use and spelling of composer names and musical concepts; the use of notes, pitches, and octave delineations; letters and numbers employed to describe form and harmony; when, where, and how to apply compound words and hyphenation of terms and names; and the proper citation of musical and audiovisual sources. The book concludes with a glossary of typographic terms, a bibliography, and a comprehensive index, making this a valuable resource for students, scholars, teachers, and writers.

An effective new songwriting vocabulary supported by ASCAP, BMI, and SESAC.

The Elements Of Song Craft does for songwriters what William Strunk Jr. and E.B. White's *The Elements Of Style* did for English language students and writers alike; gives an all-in-one definitive manifesto for contemporary songwriters in every genre to organize, understand, and practice the rules, principles, definitions, forms, and song craft needed to create good songs, songs of undeniable creative power and beauty, songs that last. The Elements of Song Craft beelines directly to the most important aspect of writing good songs—identifying the key emotion living at the heart of the song—then offers a step-by-step process to harnessing that singular emotional power. Additionally, a dozen other strategies, formulas, perspectives, and exercises are offered in the book. The Elements of Song Craft introduces, for the first time to a general songwriting audience, an effective new songwriting vocabulary utilized by songwriters taught in the SONG ARTS ACADEMY method and supported by ASCAP, BMI, and SESAC, the world's leading Performance Rights Organizations at the heart of the songwriting business, as well as at NYU Steinhardt's and The New School's songwriting programs, for over sixteen years. Thousands of song arts participants, including hit songwriters and The Voice and American Idol contestants, have been trained in this method.
