problem solving is a tool that is used for reporting problems, improvements and changes in continuous quality improvement initiatives. A3 refers to the size of paper on which the report is presented. This tool uses a cyclical learning process that mirrors PDCA (Plan, Do, Check and Act) and can be a powerful tool for process improvements. A3 problem solving tools - RCPATH The A3 process is a problem-solving tool to facilitate lean management. Lean organizations often use the A3 process to manage work at the project, program, and portfolio levels. This course provides an overview of A3 problem solving and how to use the A3 process to improve patient experience. Students practice developing A3s and coaching others during the A3 development process. A3 Problem Solving in Healthcare | Tombole The A3 process is a way to look with "new eyes" at a specific problem identified by direct observation or experience. It offers a structure that begins by always defining the issue through the eyes of the customer. In A3 Problem Solving for Healthcare Cindy Jimmerson explains an essential tool borrowed from the Toyota Production System, which is an extension of work identified with the well-known Value Stream Map.
