ELT teachers today are faced with a bewildering choice of aims, methods and materials. How can they design or choose language curricula best suited to their learners' needs? What options are open to them in designing and introducing new

Syllabuses and methods? In answering these questions, the author begins by reviewing historically the development of ideas on language teaching and language curriculum. He describes various types of syllabus, both past and current, and he highlights the assumptions, principles and aims underlying them. Proposing curriculum renewal is one matter; introducing it into an existing system is quite another. The effective management and implementation of curriculum change forms the basis of the successful introduction of new syllabuses, materials and methods, issues about which the author offers theoretical guidance and practical advice

based on evidence derived from the study of innovation in education.

This volume offers insights on English language education policies in Middle Eastern and North African countries, through state-of-the-art reports giving clear assessments of current policies and future trends, each expertly drafted by a specialist. Each chapter contains a general description of English education policies in the respective countries, and then expands on how the local English

education policies play out in practice in the education system at all levels, in the curriculum, in teaching, and in teacher training. Essays cover issues such as the balance between English and the acquisition of the national language or the Arabic language, as well as political, cultural, economic and technical elements that strengthen or weaken the learning of English. This volume is essential reading for researchers, policy makers, and teacher trainers for its invaluable insights in the role of each of the stakeholders in the implementation of policies.

The four 1958 Geneva Conventions on the Law of the Sea, which codified and progressively developed this sector of our legislation, were rather ephemeral despite the fact that they were constituent Conventions. In fact, the 1982 United Nations Convention on

the Law of the Sea (UNCLOS) again undertook the same task with the same spirit 20 years later after a long drawn out global negotiation process in which all the marine areas and problems pending were analysed and discussed by the countries attending, and an apparently strengthened majority was attained, including the essential agreement between the principal naval powers and the third world countries, symbolised most grossly in the recognition of exclusive economic areas which were 200 miles wide in exchange for a significant alteration to the legal rules applicable to the international straits. From 1973 to 1982,

the negotiations showed that there were a number of particular factors affecting the seas: "strait" countries, user countries, long range fishing countries, embedded countries, archipelagic countries, broad platform countries, etc. In 1982 when the UNCLOS was adopted, it seemed to be a text with justified pretensions to be in force for a long period of time as the nine years of negotiations required for its adoption had taken into account the main problems pending agreement although not absolutely all.

Over ninety years since their absorption into the modern Iraqi state, the Kurdish people of Iraq still remain an apparent anomaly in the modern world - a nation without a state. In 'The Kurds of Iraq', Mahir Aziz explores this incongruity, and asks the pertinent questions, who are the Kurds today? What is their relationship to the Iraqi state? How do they perceive themselves and their prospective political future? And in what way are they crucial for the stability of the Iraqi state? In the wake of the Gulf War of 1991 in the face of the Iraqi state, the Kurds endeavoured to create a de facto state and to concretise and stabilise the institutions that would enable this. 'The Kurds of Iraq' thus

examines the creation, evolution and development of Kurdish nationalism despite the suppression of its political and cultural manifestations. Through extensive interviews in the field, Aziz assesses the impact of recent history on the complex process of identity formation amongst Kurdish students at three of the nation's leading universities. He provides an in depth examination of students' socio-economic backgrounds, and their thoughts on and experiences of what it means to be Kurdish in the modern Iraqi state, and the impact this has on their perception of their language, culture and religion. Aziz's invaluable and

extensive field research furthermore serves as a point of departure for an investigation into the relationship between national identity and historical memory in Iraqi Kurdistan and beyond. He thus analyses wider issues of the intersection and interdependency of national, regional, ethnic, tribal and local identities. He thus constructs an intimate portrait of the Kurds of Iraq, which will provide an important insight for students and researchers of the Middle East and for those interested the important issues of nationalism and ethnic identity in the modern nation state, and the impact these issues have on the stability of Iraq itself.

This book is open access under a CC BY 4.0 license. This open access book is a result of the first ever study of the transformations of the higher education institutional landscape in fifteen former USSR countries after the dissolution of the Soviet Union in 1991. It explores how the single Soviet model that developed across the vast and diverse territory of the Soviet Union over several decades has evolved into fifteen unique national systems, systems that have responded to national and global developments while still bearing some traces of the past. The book is distinctive as it

presents a comprehensive analysis of the reforms and transformations in the region in the last 25 years; and it focuses on institutional landscape through the evolution of the institutional types established and developed in Pre-Soviet, Soviet and Post-Soviet time. It also embraces all fifteen countries of the former USSR, and provides a comparative analysis of transformations of institutional landscape across Post-Soviet systems. It will be highly relevant for students and researchers in the fields of higher education and sociology, particularly those with an interest in historical and comparative studies.

The little-known history of public school teachers across the Arab world—and how they wielded an unlikely influence over the modern Middle East Today, it is hard to imagine a time and place when public school teachers were considered among the elite strata of society. But in the lands controlled by the Ottomans, and then by the British in the early and mid-twentieth century, teachers were key players in government and leading formulators of ideologies. Drawing on archival research and oral histories, *Teachers as State-Builders* brings to light educators' outsized role in shaping the politics of the modern Middle East. Hilary Falb

Kalisman tells the story of the few young Arab men—and fewer young Arab women—who were lucky enough to teach public school in the territories that became Iraq, Jordan, and Palestine/Israel. Crossing Ottoman provincial and, later, Mandate and national borders for work and study, these educators were advantageously positioned to assume mid- and even high-level administrative positions in multiple government bureaucracies. All told, over one-third of the prime ministers who served in Iraq from the 1950s through the 1960s, and in Jordan from the 1940s through the early 1970s, were former public school teachers—a trend that changed only when

independence, occupation, and mass education degraded the status of teaching. The first history of education across Britain's Middle Eastern Mandates, this transnational study reframes our understanding of the profession of teaching, the connections between public education and nationalism, and the fluid politics of the interwar Middle East. Fundamentals of Educational Research Cambridge University Press Cuts through the complexities of educational research to give the novice reader a sound basis to define, develop, and conduct study, while providing insights for even the accomplished reader.

Classroom-based Evaluation in Second Language Education has been written to help foreign and second language educators in planning

and carrying out effective and comprehensive evaluations in their classrooms. The book emphasizes the value of classroom-based assessment as a tool for improving both teaching and learning. The presentation is non-technical and does not require a specialized background in psychometrics, statistics, or research. The suggested assessment procedures are useful for a broad range of proficiency levels, teaching situations, and instructional approaches. Preview questions and follow-up activities assist the reader in applying the material discussed in each chapter.
