Presented here are 73 refereed papers given at the 34th MATADOR Conference held at UMIST in July 2004. The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology, Applications, Design, Organisation and Management, and Research. The 34th proceedings contains original papers contributed by researchers from many countries on different continents. The papers cover both the technological aspect of manufacturing processes; and the systems, business and management features of manufacturing enterprise. The papers in this volume reflect: - the importance of manufacturing to international wealth creation; - the necessity of responsiveness and agility of manufacturing companies to meet market-led requirements and international change; - the role of information technology and electronic communications in the growth of global manufacturing enterprises; - the impact of new technologies, new materials and processes, on the ability to produce goods of higher quality, more quickly, to meet markets needs at a lower cost. Some of the major generic developments which have taken place in these areas since the 33rd MATADOR conference was held in 2000 are reported in this volume.

This volume contains 88 research articles written by prominent researchers. The articles are chosen from a large international conference on high performance computing and its applications held in Shanghai, China. Topics covered include a variety of subjects in modern high performance computing and its applications, such as the design and analysis of high performance computing algorithms, tools and platforms, and their scientific, engineering, medical, and industrial applications. The book serves as an excellent reference work for graduate students and researchers working with high performance computing for problems in science and engineering.

Current Trends in High Performance Computing and Its Applications Kaplan Publishing

Since the dawn of civilization, mankind has been engaged in the conception and manufacture of discrete products to serve the functional needs of local customers and the tools (technology) needed by other craftsmen. In fact, much of the progress in civilization can be attributed to progress in discrete product manufacture. The functionality of a discrete object depends on two entities: form, and material composition. For instance, the aesthetic appearance of a sculpture depends upon its form whereas its durability depends upon the material composition. An ideal manufacturing process is one that is able to automatically generate any form (freeform) in any material. However, unfortunately, most traditional manufacturing processes are severely constrained on all these counts. There are three basic ways of creating form: conservative, subtractive, and additive. In the first approach, we take a material and apply the needed forces to deform it to the required shape, without either adding or removing material, i. e. , we conserve material. Many industrial processes such as forging, casting, sheet metal forming and extrusion emulate this approach. A problem with many of these approaches is that they focus on form generation without explicitly providing any means for controlling material composition. In fact, even form is not created directly. They merely duplicate the external form embedded in external tooling such as dies and molds and the internal form embedded in cores, etc. Till recently, we have had to resort to the 'subtractive' approach to create the form of the tooling.

The objective of this textbook is to teach students to be conversational in speaking "numbers." This means understanding fundamental accounting concepts, developing solid financial analysis abilities, and then applying them to understand and improve the operational performance of their hotel or restaurant. The book will accomplish this by studying the current practices of some of today's leading hotel and restaurant companies. Chapters will be developed under the auspices of a select group of hospitality industry General Managers, Directors of Finance, and Regional Accounting Managers to ensure that the information is current, accurate and useful. Understanding and applying the information will be the main focus of this book. This textbook should provide hospitality managers the knowledge and experience to be comfortable in using numbers to operate their departments. This includes developing the ability to perform all accounting and financial aspects of their position efficiently and correctly including revenue forecasting, wage scheduling, budgeting, P&L critiques, purchasing procedures and cost control methods. As a result, they will have more time to spend on the floor with their customers and employees. This knowledge will help them understand their operations and how to improve, change or expand them to increase revenues or profits.

Testimonials of Astanti Courses, Study Texts and Mock Exams:

"Very targeted to the exam and very professional, is every bit as

good as attending a class room tuition or revision course." James Glackin "All in all it's the best thing I came across during my CIMA studies. I don't know any better way to help yourself to pass these tough exams." Grzegorz Narozanski "Just wanted to let you know that I passed all 3 exams using the textbook and your mock exams which I found really helpful, thanks!" Nneoma Nwaogu "I would also like to extend my great gratitude for such a wonderful study text; they made my understanding of CIMA P1 much easier. Once more thank you very much to the Team." Mthuthuzeli September "I received the fantastic news this morning that I have finally passed T4!! Many thanks for your support and advice in the lead up to the exam, I am certain that without the really important tips on exam strategy you provided I would not have passed. Many thanks again!" Babak Fardaghaie "So I managed a 76% pass for E2 using your notes. They are very well structured and easy to use. Thank you so very much." Amanda Vakalisa "The Astranti method of teaching is systematic and easy to follow. I gained a lot of knowledge and regret not enrolling with Astranti for my earlier CIMA exams. After the course I was confident about my preparation. I would recommend the course to everyone sitting the T4b exam especially the MARKED mocks. Its the section by section detailed feedback from tutors that helps to improve and gain confidence." Gunjan Nagpal "I have cleared all 3 strategic level papers in my first attempt. I used the Astranti learning material during my final revision. They were short, precise and saved a great amount of time which made all the difference for me in the exam. Thank you very much." Raj The Astranti Study Texts The Astranti Study Texts have been used by thousands of CIMA Students in preparation for their management accountancy exams. They cover the entire CIMA syllabus for the 2015 exams and onwards and have been carefully written to be concise and easy to read but detailed enough to clearly guide you through the topics you must know in order to pass the exams. What are you waiting for? Download the sample of the book to see one for yourself. Prepared by our expert team of professional writers the study texts feature: Full Syllabus Coverage Clear and simple explanations for ease of understanding Carefully worked step-by-step examples Condensed and focused on likely exam content Linked with our chapter-by-chapter revision questions available to purchase on Astranti.com Go to www.astranti.com to find out more about related CIMA videos, courses and mocks exams.

TECHNOLOGY/ENGINEERING/CIVIL SUCCESSFUL FINANCIAL MANAGEMENT IN THE CONSTRUCTION INDUSTRY BEGINS WITH THIS HANDS-ON GUIDE While construction professionals are skilled in the technical side of their work, they often find the financial management aspect of the business daunting. Financial Management and Accounting Fundamentals for Construction will help you better understand and navigate the financial decisions that are part of every construction project. This book is a compact summary of the basic financial skills that a construction professional must have to be successful in the management of a construction company and its projects. Its topics address many of the questions that any construction administrator will face, such as: How to organize and use a company's financial reports What amount of cash must be made available to the contractor to complete a project Why the early payment of supplier invoices can enhance profitability How to quantify the time value of money in financial decisions What tax amount is owed by a company and how it impacts the bottom line How to control project costs What financial sources are available to a construction contractor for capital expansion In this text, you will learn about accounting fundamentals, project-related financial matters, and company level financial issues—three factors that are key to your career success. An ideal reference for students of construction management and engineering, as well as professionals who need a quick refresher when dealing with cost control analysis and other financial issues, this text also offers: Easy-to-understand coverage of financial concepts specific to the construction industry, including business taxation, project control, engineering economy, and financial forecasting Numerous worked examples, plus end-of-chapter review questions and exercises Helpful appendices that present the structure of a typical chart of accounts, the flow of transactions through a construction accounting system, and tables required for computing interest and the time value of money
