The author analyzes the way the girls discuss pleasure in becoming "the eye" of the reader, use film to decode the genres of literature, master forms such as fantasy and Gothic, describe the differences between reading and viewing films, and identify only with animal rather than human characters. Blackford intertwines the vivid voices of her girl respondents with her own story of moving beyond her feminist and multicultural assumptions of how children are shaped by the stories we tell in literature. This breakthrough text presents surprising findings

about how girls appreciate literature and what they enjoy about reading.

This companion to *Earth Verse: Haiku from the Ground Up* soars into space with a perfect fusion of poetry and science, accompanied by breathtaking illustrations. One minuscule speck grows into the universe a mind-boggling birth. This stunning meeting of poetic form and luminous artwork transports us out of the bounds of Earth, past a lunar eclipse, beyond the orbiting planets, and into glowing galaxies and twinkling constellations. Sally M. Walker uses her award-winning skill as a writer of nonfiction to explore space through clever haiku, accompanied by narrative explanations of wonders that are out of this world. Illustrator Matthew Trueman imagines the explosive Big Bang and awe-inspiring meteor showers in spectacular views that no telescope could offer. Comprehensive, well-researched back matter further explores such topics as constellations and astronomers, the birth of the universe, stars, the solar system, moons and eclipses, asteroids, meteors, and comets, as well as a glossary of terms, a bibliography, and online resources for readers with an eye to what lies beyond Earth.

A gorgeously illustrated picture book biography about the fascinating life of surrealist artist Leonora Carrington, from Michelle Markel and Amanda Hall, the acclaimed team behind *The Fantastic Jungles of Henri Rousseau*. Ever since she was a little girl, Leonora Carrington loved to draw on walls, in books, on paper—and she loved the fantastic tales her grandmother told that took her to worlds that shimmered beyond this one, where legends became real. Leonora's parents wanted her to become a

proper English lady, but there was only one thing she wanted, even if it was unsuitable: to be an artist. In London, she discovered a group of artists called surrealists, who were stunning the world with their mysterious creations. This was the kind of art she had to make. This was the kind of person she had to be. From life in Paris creating art alongside Max Ernst, to Mexico where she met Diego Rivera and Frida Kahlo, Leonora's life became intertwined with powerful events and people that shaped the twentieth century. *Out of This World* is the powerful, stunningly told story of Leonora Carrington, a girl who made art out of her imagination and created some of the most enigmatic and startling works of the last eighty years.

This book takes the reader on a fantastic journey through a wide range of cultures and traditions to examine the phenomenon of ecstatic visionary experiences—from Sumerian Gilgamesh and the Taoist Immortals to the imaginative fiction of Jorge Luis Borges. The author provides a comprehensive tour of

otherworldly journeys common from immemorial times among shamans, magicians, and witches, and illustrates their connection with such modern phenomena as altered states of consciousness, out-of-body experiences, and near-death experiences.

Gilles Deleuze was one of the most influential French philosophers of the last century. This book aims to make sense of his fundamental project in the clearest possible terms, by engaging with the central idea that informs virtually all of his work: the equation of being and creativity. It explores the various ways in which, in order to affirm an unlimited creative power, Deleuze proceeds to dissolve whatever might restrict or mediate its expression, including the organisms, objects, representations, identities, and relations that this power generates along the way. Rather than a theorist of material complexity or relational difference, *Out of this World* argues that Deleuze is better read as a spiritual and extra-worldly philosopher. His philosophy leaves little room for processes of social or historical transformation, and still less for political relations of conflict or solidarity. Michel Foucault famously suggested that the 20th century would be known as 'Deleuzian'; this sympathetic but uncompromising new critique suggests that our Deleuzian century may soon be coming to a close.

The twenty-first century has witnessed an explosion of speculative fiction in translation (SFT). Rachel Cordasco examines speculative fiction published in English translation since 1960, ranging from Soviet-era fiction to the Arabic-language dystopias that emerged following the Iraq War. Individual chapters on SFT from Korean, Czech, Finnish, and eleven other source languages feature an introduction by an expert in the language's speculative fiction tradition and its present-day output. Cordasco then breaks down each chapter by subgenre--including science fiction, fantasy, and horror--to guide readers toward the kinds of works that most interest them. Her discussion of available SFT

stands alongside an analysis of how various subgenres emerged and developed in a given language. She also examines the reasons a given subgenre has been translated into English. An

informative and one-of-a-kind guide, *Out of This World* offers readers and scholars alike a tour of speculative fiction's new globalized era.
