CLARA WILSON

Emerging Values in Health Care Jessica
Kingsley Publishers
This volume reports on discussions
among multiple stakeholders about ways
they might help transform health care in
the United States. The U.S. healthcare
system consists of a complex network of
decentralized and loosely associated

organizations, services, relationships,
and participants. Each of the healthcare
system's component sectors--patients,
healthcare professionals, healthcare
delivery organizations, healthcare
product developers, clinical investigators
and evaluators, regulators, insurers,
employers and employees, and
individuals involved in information
technology--conducts activities that
support a common goal: to improve
patient health and wellbeing. Implicit in

this goal is the commitment of each stakeholder group to contribute to the evidence base for health care, that is, to assist with the development and application of information about the efficacy, safety, effectiveness, value, and appropriateness of the health care delivered.

Sustainable Practices in an Era of Over-Utilization National Academies Press

The Little Book of Values explores twenty-two values that can be taught through schools and indeed the whole community. The book will inspire you by using examples of where values are being used by children and adults in schools already and shares practical tools to stimulate discussion and philosophical debate. It will also help people to take stock of their own values

and how they wish to lead their.

Workshop Summary National Academies Press

"Investigates the identification and the development of the value of care in adolescents. The research project is a phenomenological inquiry which utilises semi-structured interviews to gather data in regard to the value of care. The aim of the research is to develop a model for use by independent Christian schools to develop the care in students, and to evaluate the degree to which they have successfully achieved the development of the value of care, in students.

Value-Based Care, An Issue of Anesthesiology Clinics, Elsevier Health Sciences

This work takes a fresh and

contemporary look at the growing interest in the development and application of discrete choice experiments (DCEs) within the field of health economics. The book comprises chapters by highly regarded academics with experience of applying DCEs in the area of health. Thus the book is relevant to post-graduate students and applied researchers with an interest in the use of DCEs for valuing health and health care and has international appeal.

The Value of Caring American Psychiatric Pub

Today's fragile economic climate requires new solutions to the problem of high healthcare costs. Organizations simply cannot afford runaway medical expenses, unproductive workplaces, and sick workers. In this landmark book, Dee

W. Edington, PhD, former Director of the University of Michigan Health Management Research Center, draws from his 30 years of research and experience to explain how organizations can control health management and disability expenditures while keeping their workforces healthy and productive. Dr. Edington's message is straightforward, yet profound. His three key strategies, "Don't Get Worse," "Keep Healthy Employees Healthy," and "Create a Culture of Health," can help reduce the healthcare and productivity-related costs that are bankrupting American businesses. *Zero Trends: Health as a Serious Economic Strategy* provides the guidance and the inspiration organizations need in their search for lower medical expenditures

and higher-performing workplaces.

The Value Base Of Social Work And Social Care Crown House Publishing

In today's environment where healthcare costs are outpacing the economy, healthcare systems are shifting from fee-for-service to value-based payment to deliver high-quality care while reducing costs. This shift presents nurses with the opportunity to take the lead in transforming care delivery and achieve the Triple Aim goals: improving patient experience of care, improving health of populations, and reducing per capita healthcare costs. INSPIREd Healthcare follows author Billie Lynn Allard and her team of nurses as they successfully implement an accountable community of health in pursuit of the Triple Aim. The INSPIRE Model they follow provides an

evidence-based blueprint for other healthcare systems hoping to solve the complicated problems surrounding care transitions and health promotion

The Institute of Medicine's Roundtable on Value & Science-Driven Health Care held a workshop, titled Partnering with Patients to Drive Shared Decisions, Better Value, and Care Improvement, on February 25 and 26, 2013. The workshop, supported by the Gordon and Betty Moore Foundation and the Blue Shield of California Foundation, focused on identifying and exploring issues, attitudes, and approaches to increasing patient engagement in and demand for the following: shared decision making and better communication about the

evidence in support of testing and treatment options; the best value from the health care they receive; and the use of data generated in the course of their care experience for care improvement. The workshop hoped to build awareness and demand from patients and families for better care at lower costs and to create a health care system that continuously learns and improves. Participants included members of the medical, clinical research, health care services research, regulatory, health care economics, behavioral economics, health care delivery, payer, and patient communities. Partnering with Patients to Drive Shared Decisions, Better Value, and Care Improvement Workshop Proceedings offers a summary of the 2-day workshop including the workshop

agenda and biographies of speakers. *Workshop Proceedings* Springer Nature An exploration of the moral theory examines the characteristics of the ethics of care, discussing the feminist roots of this moral approach, what is meant by "care," and the potential of the ethics of care for dealing with social issues.

The Survival Value of Caring Oxford University Press

With the establishment of optometry as the primary eye care profession, and significant reforms under way in health care, the opportunity exists now to add value to an independent eye care practice for both the doctor and the patient. The favorable geographic distribution of optometrists in rural and urban locations lends well to the

evolving trends of health care in America. Ease of access to care without having to travel long distances lends well to the economics for patients. The difficulty for the independent practice is the paradigm shift required on several levels: from paper records to electronic; from an optical focus to medical, from individual and episodic care to team-based and coordinated care. Add to this the concomitant increase in the complexity of billing and coding and we have a whole new game on our hands, a survival game. The exact strategy to make this shift adeptly does not exist. Vision without execution is hallucination. This guide will serve as a basis for applying some organizational sense to the adventure of creating a new medical model for forward-thinking optometric

practices.

A Value-Based Care Coordination Model JP Medical Ltd

Featuring contributions from key commentators including Lena Dominelli, Sarah Banks, Peter Beresford, Michael Flood and George Ritzer, this diverse text explores an array of concepts and themes that are vital to our understanding of the value base in social work. Each chapter contains a range of exercises and activities that are intended to encourage students to take a creative and active learning approach to defining and understanding values. Among the key themes examined in the book are the tensions between values such as social justice, anti-oppressive practice, compassion, empathy and the contemporary preoccupation with cost

codes, performance management, the obsessive cult of managerialism and the allure from those with power in public life for the emerging 'free market'. Also included are chapters on: anti-oppressive practice service user values anti-social care violence prevention valuing equality The Value Base of Social Work and Social Care is a key text for students undertaking the qualifying social work degree, and for those studying youth work, youth justice, education welfare, probation, health care, counselling and community work. Due to the range of contributors and the current emphasis placed on interprofessional working, it is also relevant to an international audience of practitioners and professionals within the field of social care.

Principles, Values and Skills CRC Press
A biography of the First Lady who not only aided her husband after he was stricken with polio but also served as a delegate to the United Nations where she helped start UNICEF.

Zero Trends Springer

This text focuses upon an array of key concepts historically associated with the activities of the 'helping professions' but including thematic explorations of poverty, inequality, user perspectives; and of the essential components of the helping relationship, such as empathy, compassion and conviction.

The Meaning and Measure of Social Value National Academies Press

This volume explains how health care professions and their values have changed over the last forty years,

charting where they have come from, where they are now, and how they might develop in the future. There is coverage of a wide range of professions within healthcare. Chapters are followed by critical responses from senior practitioners.

The Challenge for Professionals Sigma Theta Tau

Companies are increasingly championed for their capacity to solve social problems. Yet what happens when such goods as water, education, and health are sold by companies - rather than donated by nonprofits - to the disadvantaged and when the pursuit of mission becomes entangled with the pursuit of profit? In *Caring Capitalism*, Emily Barman answers these important questions, showing how the meaning of

social value in an era of caring capitalism gets mediated by the work of 'value entrepreneurs' and the tools they create to gauge companies' social impact. By shedding light on these pivotal actors and the cultural and material contexts in which they operate, *Caring Capitalism* accounts for the unexpected consequences of this new vision of the market for the pursuit of social value. Proponents and critics of caring capitalism alike will find the book essential reading.

An Introductory Workbook *The Value of Caring*
The Story of Eleanor Roosevelt
 A biography of the First Lady who not only aided her husband after he was stricken with polio but also served as a delegate to the United Nations where she helped start UNICEF. Learn the Value of

CaringPresents situations that demonstrate the meaning and importance of caring.The Little Book of ValuesEducating children to become thinking, responsible and caring citizens Most studies of doing business at the "bottom of the economic pyramid" focus on viewing the poor as consumers, as micro-entrepreneurs, or as potential employees of local companies. Almost no analysis focuses on the poor as primary producers of agricultural commodities a striking omission given that primary producers are by far the largest segment of the working-age population in developing economies. Making Markets More Inclusive bridges the management literature with original research on agricultural value chains in developing and emerging economies.

This exciting work is the first to delve into the skills, capabilities, strategies and approaches needed for inclusive value chain development. McKague shows how NGOs and companies can connect poor producers in developing economies with the right markets to better create social and economic impact. He also analyzes one of the leading agricultural value chain initiatives in the world, which is being replicated by the Bill and Melinda Gates Foundation in several different value chains in Malawi, Tanzania, Ghana, India, and Mali. Want more? Check out these compelling videos, which provide a glimpse into the stories and examples used throughout the book. Video Trailer for Making Markets More Inclusive. Farmer Training. Kallani Rani increased

the productivity of her cows, become a cattle feed seller in her village (Chapter 6), and opened a fresh milk canteen in her local market (Chapter 7). She now trains other women farmers and works to improve opportunities for women in her community (Chapter 5). Animal Health Care Services. Asma Husna trained to be an animal health worker with CARE to provide important animal health services and education to local farmers on a fee-for-service basis (Chapter 6). Cattle Feed Shops. Fulera Akter started a business as a cattle feed seller after demand for nutritional animal feed grew due to farmers' improved knowledge of nutrition (Chapter 6). Savings Groups. Coauthor Muhammad Siddiquee, the Coordinator of Agriculture and Value Chain Programs at CARE

Bangladesh, discusses the value of farmer savings groups (Chapter 6). Milk Collection. Sarothi Rani became a milk collector to earn an improved income for her family and provide an important service to other dairy farmers in her community (Chapter 7). Digital Fat Testing. Introducing digital fat testing machines into the dairy value chain helped reward farmers for making investments in producing higher quality milk, as well as ensuring transparent and timely payments (Chapter 7). Microfranchising. Supporting agricultural input shop owners with training, relationships to suppliers, common branding, and standardized customer services improves the productivity of smallholder farmers and the profitability of shops (Chapter 12). Bangladesh Dairy

Value Chain Learning. Reflections from some of the 40 CARE staff from 17 countries who came to Bangladesh to learn from the experience of the dairy value chain project (Chapter 15).

Care in nursing McGraw-Hill Education (UK)

This comprehensive volume examines the myriad factors that have led to the current state of health care in the United States -- starting with an analysis of the meaning and history of value measurement -- but it does not stop there. It offers a holistic vision for health care reform, one in which psychiatric professionals play a pivotal role.

Defining the Value of Spine Care
AuthorHouse

America's health care system has become too complex and costly to

continue business as usual. Best Care at Lower Cost explains that inefficiencies, an overwhelming amount of data, and other economic and quality barriers hinder progress in improving health and threaten the nation's economic stability and global competitiveness. According to this report, the knowledge and tools exist to put the health system on the right course to achieve continuous improvement and better quality care at a lower cost. The costs of the system's current inefficiency underscore the urgent need for a systemwide transformation. About 30 percent of health spending in 2009--roughly \$750 billion--was wasted on unnecessary services, excessive administrative costs, fraud, and other problems. Moreover, inefficiencies cause needless suffering.

By one estimate, roughly 75,000 deaths might have been averted in 2005 if every state had delivered care at the quality level of the best performing state. This report states that the way health care providers currently train, practice, and learn new information cannot keep pace with the flood of research discoveries and technological advances. About 75 million Americans have more than one chronic condition, requiring coordination among multiple specialists and therapies, which can increase the potential for miscommunication, misdiagnosis, potentially conflicting interventions, and dangerous drug interactions. Best Care at Lower Cost emphasizes that a better use of data is a critical element of a continuously improving health system,

such as mobile technologies and electronic health records that offer significant potential to capture and share health data better. In order for this to occur, the National Coordinator for Health Information Technology, IT developers, and standard-setting organizations should ensure that these systems are robust and interoperable. Clinicians and care organizations should fully adopt these technologies, and patients should be encouraged to use tools, such as personal health information portals, to actively engage in their care. This book is a call to action that will guide health care providers; administrators; caregivers; policy makers; health professionals; federal, state, and local government agencies; private and public health organizations;

and educational institutions.

The Value of Caring Springer Science & Business Media

This book examines key ethical frameworks and debates within the field of healthcare, locating them firmly in their social and occupational contexts. Guiding students through a range of dilemmas and difficulties encountered in health care practice with case studies and real-life examples, this lively text illustrates how to apply knowledge to professional practice and decision-making. Key Features Offers a critical and reflective understanding of health care ethics and values Presents an interprofessional approach Relates theory to 'everyday' ethics Includes student-friendly features such as real-life examples, 'thinking about' points, and

This book creates a value proposition in geriatric care - a promise of value to be delivered to improve care and to provide specific benefits to healthcare systems.

It describes strategies and understanding of the incentives, barriers encountered in promoting changes in the healthcare systems, and discusses numerous examples and outcomes.

Drawn from many fields such as medicine and science, sociology, politics, business and economics, the book helps guide the introduction of geriatric principles into mainstream medical care with the goal of improving the care and quality of life of older persons in all healthcare systems.
