CRAWFORD TORRES

Super Mario: The Big Coloring Book
(Nintendo®) Llewellyn Worldwide

In January 1862, Charles Godwin courted Harriet Russell, ultimately unsuccessfully, with the following lines: "Like cadences of inexpressibly sweet music, your kind words came to me: causing every nerve to vibrate as though electrified by some far off strain of heavenly harmony." Almost ten years later, Albert Janin, upon receiving a letter from his beloved Violet Blair, responded with, "I kissed your letter over and over

again, regardless of the small-pox epidemic at New York, and gave myself up to a carnival of bliss before breaking the envelope." And in October 1883, Dorothea Lummis wrote candidly to her husband Charles, "I like you to want me, dear, and if I were only with you, I would embrace more than the back of your neck, be sure." In Karen Lystra's richly provocative book, *Searching the Heart*, we hear the voices of Charles, Albert, Dorothea, and nearly one hundred other nineteenth-century Americans emerge from their surprisingly open, intimate, and emotional love letters. While historians of nineteenth-century America have explored a host of private topics,

including courtship, marriage, birth control, sexuality, and sex roles, they have consistently neglected the study of romantic love. Lystra fills this gap by describing in vivid detail what it meant to fall in love in Victorian America. Based on a vast array of love letters, the book reveals the existence of a real openness--even playfulness--between male and female lovers which challenges and expands more traditional views of middle-class private life in Victorian America. Lystra refutes the common belief that Victorian men and women held passionlessness as an ideal in their romantic relationships. Enabling us to enter the hidden world of Victorian lovers, the letters they left behind offer genuine proof of the intensity of their most private interactions, feelings,

behaviors, and judgments. Lystra discusses how Victorians anthropomorphized love letters, treating them as actual visits from their lovers, insisting on reading them in seclusion, sometimes kissing them (as Albert does with Violet's), and even taking them to bed. She also explores how courtship rituals--which included the setting and passing of tests of love--succeeded in building unique, emotional bonds between lovers, and how middle-class views of romantic love, which encouraged sharing knowledge and intimacy, gave women more power in the home. Through the medium of love letters, *Searching the Heart* allows us to enter, unnoticed, the Victorian bedroom and parlor. We will leave with a different view of middle-class Victorian America.

Ensayo Sobre Las Revoluciones Políticas
Oxford University Press

The private diaries record aspects of everyday life, woven together by the affective life, in an attempt to capture and contain them in words, and to retain them through writing. They originated as texts for exclusive personal use, but by subsequent developments, they have come to take another course and have been published posthumously, achieving completely different goals from those that initiated them. Such is the case of the two texts that are the subject of this edition: the diaries of Soledad Acosta Kemble and Jose Maria Samper Agudelo, written during four months and four days, before their authors got married in 1855. The publication of these writings

creates a bridge to the past and provides information about the writers that is personal, direct, first-hand, without distortions and historical, which makes it essential to understand who these intellectuals were. It is a great fortune that those fleeting and forgotten fragments of life have been preserved and have come to light again; a finding that allows the present to penetrate into the depths of the past and history, in order to obtain a better structured view of the circumstances in which they lived during that era. Soledad Acosta de Samper and Jose Maria Samper Agudelo became the only intellectual and public couple that dominated the Colombian cultural landscape and influenced directly and indirectly various aspects of society and culture of several Latin

American countries during the second half of the nineteenth century. This is a great text for courses on Women's Studies, Cultural Studies, Gender Studies, Gender Research, Critical Culture, Sexuality Studies, Cultural Analysis, Latin American Literature, Latin American Studies, Hispanic Literatures, Hispanic Studies.

"Few decisions in life should be more personal than the choice of a spouse or

lover. Yet, throughout history, this intimate experience has been subjected to painstaking social and religious regulation in the form of legislation and restraining social mores." With that statement, Asunción Lavrin begins her introduction to this collection of original essays, the first in English to explore sexuality and marriage in colonial Latin America. The nine contributors, including historians and anthropologists, examine various aspects of the male-female relationship and the mechanisms for controlling it developed by church and state after the European conquest of Mexico and Central and South America. Seldom has so much light been shed on the sexual behavior of the men and women who lived there from the sixteenth to the eighteenth century.

These chapters examine the variety of sexual expression in different periods and among persons of different social and economic status, the relations of the sexes as proscribed by church and state and the various forms of resistance to their constraints, the couple's own view of the bond that united them and of their social obligations in producing a family, and the dissolution of that bond. Topics infrequently explored in Latin American history but discussed here include premarital relations, illegitimacy, consensual unions, sexual witchcraft, spouse abuse, and divorce. Lavrin's opening survey of the forms of sexual relationships most discussed in ecclesiastical sources serves as a point of departure for the chapters that follow. The contributors are Serge Grunzinski,

Ann Twinam, Kathy Waldron, Ruth Behar, Susan Socolow, Richard Boyer, Thomas Calvo, and María Beatriz Nizza da Silva. Asunción Lavrin is a professor of history at Arizona State University at Tempe. Her 1995 book, *Women, Feminism, and Social Change in Argentina, Chile, and Uruguay, 1890-1940*, won the Arthur P. Whitaker Prize from the Middle Atlantic Council on Latin American Studies.

The basic objective of this highly successful text--to present the concepts of electromagnetics in a style that is clear and interesting to read--is more fully-realized in this Second Edition than ever before. Thoroughly updated and revised, this two-semester approach to

fundamental concepts and applications in electromagnetics begins with vector analysis--which is then applied throughout the text. A balanced presentation of time-varying fields and static fields prepares students for employment in today's industrial and manufacturing sectors. Mathematical theorems are treated separately from physical concepts. Students, therefore, do not need to review any more mathematics than their level of proficiency requires. Sadiku is well-known for his excellent pedagogy, and this edition refines his approach even further. Student-oriented pedagogy comprises: chapter introductions showing how the forthcoming material relates to the previous chapter, summaries, boxed formulas, and

multiple choice review questions with answers allowing students to gauge their comprehension. Many new problems have been added throughout the text.
