Review IOS Press

It is old news that we are in a new
information age! And it should come as no
surprise that we need new information to
help us change our old ways. As clinical
laboratory scientists, physicians, and
technologists, we need new ideas,
processes, tools, and technology to
transform our healthcare laboratories from

production testing operations into
information management organisations.
Our future is providing diagnostic and
treatment information, regardless where
testing is performed and who performs the
measurements. To facilitate the
transformation to an information
management organisation, this publication
describes a reference information model
for healthcare laboratories. This model
allows us to gain new insights into our
operations and organisations and helps us
to better define and understand our

critical information processes. Along with the model, they also provide the computer tools to support that transformation and facilitate the new information management organisation. By coupling theory with technology, they show us the nature of the new organization and start us on the path to the future.

Besides, the chapter on 'Communication Theory' has been

relevantly and effectively explained keeping in mind the needs of the students. Overall, the book is very accessible by all levels of students. It is a part of recommended reading for my students." - Nandini Mukherjee Course Coordinator, Department of Communicative English, St. Xavier's College, Kolkata "An extremely concise, lucidly written and reader-friendly book, that serves as a handy reference manual for all in-service English language teachers of degree engineering colleges. The B.Tech Communicative English syllabus has been closely followed, with detailed sections on grammar, writing and comprehension. The chapters on vocabulary take an insightful look at etymology, word origins, synonymy and antonymy. Detailed word lists and practice exercises make the section extremely helpful for practicing teachers. The sections on grammar are fairly detailed, offering a thorough analysis of Verbs, Tenses, Voice, Narration, Transformation of Sentences and Error Correction. There are plenty of practice exercises for the teacher to choose from. Reading skills are well discussed and technical writing is given all the importance and

predominance it usually occupies in any course on technical communication. The section on report writing is extremely useful as a guide for teachers for teaching students the formatting and writing essentials in documenting reports. There is a section on professional speaking too, which enriches the content of the book. On the whole, the book is of continuing usefulness and relevance in any technical English course and will be used by teachers and students alike for many years to come." - Dr Indrajit Bose Assistant Professor of English, GNIT, Kolkata "Dr. Konar's book acts as a comprehensive guide to the students of professional, technical as well as basic courses to hone their language skills.
