This book, in the form of quizzes, is the
story about a culture that started in 776
BC until 1169 years later when in 393 AD
the Ancient Olympic Games were
terminated all of a sudden by an Emperor
known as Theodosius I, but revived in
1896 AD by a 30-year old French aristocrat
known as Baron Pierre de Coubertin, the

father of the Modern Olympic Games. This sporting culture in the form of the Modern Olympic Games is still continuing since 1896 and in the form of the XXX Olympiad is again appearing in London from 27 July 2012, in which thousands of best athletes in the world will inspire millions of people across the world to towards fitness, peace and international brotherhood. This exhaustive quiz book is meant to create awareness among the students, teachers and the mass about the various sports that are included in the Olympic programme. A must read book for all the sports-lover !

This collection of 15 tests is modelled on those used in GCSE examinations. The first few are at the standard of Foundation Tier and provide appropriate practice for Foundation Tier candidates as well as an easier introduction to the harder tests for Higher Tier candidates. The remaining tests are designed for Higher Tier candidates. All the tests contain a range of grammatical and syntactical features appropriate for GCSE and assume a basic knowledge of about 500 words of

vocabulary; other words and proper names are glossed. Each test consists of three sections: a passage of about 60 words, tested by simple comprehension questions; a passage of about 100 words, for translation; and a passage of about 90 words, tested by more demanding questions. A gradient of difficulty is maintained throughout the Latin. Each test also has two mark schemes, suitable for use by the teacher or by the student for self-assessment.

A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical and social contexts, and there is

also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates the results of some fundamental, new and original research.
