Just as a harmony of the  
Gospels is useful for  
tracing the life of our Lord  
Jesus Christ, this easy-to-  
use book provides the  
Bible student with a  
reference guide to the  
history of the kings of  
Judah and Israel as  
preserved in the books of  
Samuel, Kings, and

Chronicles. Preceding the harmony itself is a complete analytical outline--a concise, sequential table of events that will give the reader a greater understanding and firmer grasp of the history of Judah and Israel. Students of Scripture will find this harmony and its accompanying analytical outlines invaluable in gaining a historical perspective that will make the study of Samuel, Kings and Chronicles profitable and rewarding.

 Who's Who of Canadian Women is a guide to the most powerful and innovative women in Canada. Celebrating the talents and achievement of over 3,700 women, Who's Who of Canadian Women includes women from all over Canada, in all fields, including agriculture, academia, law, business, politics, journalism, religion, sports and entertainment. Each

biography includes such information as personal data, education, career history, current employment, affiliations, interests and honours. A special comment section reveals personal thoughts, goals, and achievements of the profiled individual. Entries are indexed by employment of affiliation for easy reference. Published every two years, *Who's Who of Canadian Women* selects its biographees on merit alone. This collection is an essential resource for all

those interested in the achievements of Canadian women.

This book offers a distinctive approach to

the right not to be subjected to enforced disappearance. Over the last decade, the entry into force of the UN Convention for the Protection of All Persons from Enforced Disappearance has brought to the forefront of legal discussion the need to effectively address the practice of disappearance. Yet, there are still obstacles to combatting it, which are in part due to a limited understanding of the right's underlying concept, content and scope. This book

examines the phenomenon and definition of enforced disappearance and sheds new light on the right against disappearance. Presenting a doctrinal appraisal of the norm's legal value, it suggests that the right against enforced disappearance holds a customary value, while also arguing that it has since attained a jus cogens status. Lastly, it examines in detail the rights to truth and reparation and how regional and national courts have interpreted

these norms. It assesses the UN Convention's dynamics and considers whether the lack of a right against disappearance embedded in regional human rights systems affects individuals' protection. The book provides an overview of key jurisprudence on disappearances, making it of benefit to both practitioners and theorists of international law. Circular John Wiley & Sons All in one Resource for Internet marketers: This is the only book where internet marketers in

This book contains all the marriages which took place in Blount County, Alabama between the years 1866 and 1919. Images of the original documents from the Blount County Court House were examined page by page and transcribed. Not only was the primary information recorded, but other significant details were gathered such as names

of bondsmen, names of officials performing the ceremony, names and relationships of those granting permission, and the location of the ceremony. Plus, volumes and page numbers were recorded to provide for better documentation. Additionally, details of all licenses returned unexecuted were recorded. This book also contains those marriages recorded at the satellite Blount County court house at Bangor covering the years 1893 to 1901. This book is a handy tool for

those with ancestors in Blount County, or those with ancestors in sections of Blount which became Cullman County. Swartz & Tedrowe's Indianapolis City Directory ... WestBow Press Reprint of the original, first published in 1873. *Catalogue of the Central Library* BoD - Books on Demand The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial

intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been

significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the

second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as

an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.
