Physiology CHANGDER OUTLINE
Excerpt from Quiz-Compend: A Compend of Human Physiology, Arranged in the Form of Questions and Answers; Prepared and Especially Adapted for the Use of Medical Students There is no one desires more than the writer that the depth and scope of medical education be increased but, in his belief, the evil at present In existence consists in the fact that medical institutions, by granting a degree too early, make the short road to knowledge the only one which the student with the average amount of cerebral gray matter can possibly travel. The evil lies with the small amount of time required for the obtaining of the degree. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
