### **UGC NET English Literature [Code-30] Previous Year Question 2010 to 2021 Book with Answer**

Routledge

This book examines the foreign and security policies adopted by China and Japan since the 1970s in their competition over the Senkaku/Diaoyu Islands in the East China Sea. It charts the development of a dispute that has become a potential flashpoint for conflict

between the two countries. The book explains that while increasing nationalism in both China and Japan helps to fuel and sustain the dispute, a key factor is that the leaderships in both countries find competition over the islands to be a convenient vehicle supporting their wider approach to foreign and security policy, which is becoming increasingly assertive and potentially belligerent.

*Political Manipulation and Weapons of Mass Destruction* McFarland

Cities are frequently viewed as passive participants to state and national efforts

to solve the toughest urban problems. But the evidence suggests otherwise. Cities are actively devising innovative policy solutions and they have the potential to do even more. In this volume, the authors examine current threats to communities across the U.S. and the globe. They draw on first-hand experience with, and accounts of, the crises already precipitated by climate change, population shifts, and economic inequality. This volume is distinguished, however, by its central objective of traveling beyond a description of problems and a discussion of their serious implications. Each of the thirteen chapters frame specific recommendations and guidance on the range of core capacities and interventions that 21st Century cities

would be prudent to consider in mapping their immediate and future responses to these critical problems. *How Cities Will Save the World* brings together authors with frontline experience in the fields of city redevelopment, urban infrastructure, healthcare, planning, immigration, historic preservation, and local government administration. They not only offer their ground level view of threats caused by climate change, population shifts, and economic inequality, but they provide solution-driven narratives identifying promising innovations to help cities tackle this century's greatest adversities. *Innovative Strategies for Teaching in the Plant Sciences* Oxford University Press This book defines the phenomenon of mHealth and its evolution, explaining

why an understanding of mHealth is critical for decision makers, entrepreneurs and policy analysts who are pivotal to developing products that meet the collaborative health information needs of consumers and providers in a competitive and rapidly-changing environment. The book examines trends in mHealth and discusses how mHealth technologies offer opportunities for innovators and entrepreneurs, those who often are industry first-movers with regard to technology advancement. It also explores the changing dynamics and relationships among physicians, patients, insurers, regulators, managers, administrators, caregivers and others involved in the delivery of health services. The primary focus is on the

ways in which mHealth technologies are revising and reshaping healthcare delivery systems in the United States and globally and how those changes are expected to change the ways in which the business of healthcare is conducted. mHealth: Transforming Healthcare consists of nine chapters that addresses key content areas, including history (to the extent that dynamic technologies have a history), projection of immediate evolution and consistent issues associated with health technology, such as security and information privacy and government and industry regulation. A major point of discussion addressed is whether mHealth is a transient group of products and a passing patient encounter approach, or if it is the way much of our health care will be delivered

in future years with incremental evolution to achieve sustainable innovation of health technologies.

Legal Challenges in the Global Financial Crisis Arihant Publications India limited  
Which elements do the Arab Spring, the Indignados and Occupy Wall Street have in common? How do they differ? What do they share with social movements of the past? This book discusses the recent wave of global mobilisations from an unusual angle, explaining what aspects of protests spread from one country to another, how this happened, and why diffusion occurred in certain contexts but not in others. In doing this, the book casts light on the more general mechanisms of protest diffusion in contemporary societies, explaining how mobilisations travel from one country to

another and, also, from past to present times. Bridging different fields of the social sciences, and covering a broad range of empirical cases, this book develops new theoretical perspectives.  
*The New Brand Spirit* Springer Science & Business Media

In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A

Democracy in Central Asia DIWAKAR EDUCATION HUB

Social and Community Development Practice makes a persuasive case for employing a social development approach to community development

practice at local and village levels. Towards this end, the book offers a conceptual clarity of social and community development (SCD) by adding new dimensions. It also shows the significance of social policy education for social and community development workers and the need for expanding community development practice from local levels to international levels. The author argues that the social work profession itself needs to quickly reorganize and strengthen. It needs to consider alternative modes of preparing social workers and community organizers who can reach out at local levels. The profession also needs to develop indigenous ethical standards for SCD practice. The author's deep reflections reveal the dire need to

refocus on SCD practice to address major issues such as poverty and inequality plaguing vast populations around the world.

**Spreading Protest** SAGE Publishing India

The global increase in the number of slums calls for policies which improve the conditions of the urban poor, sustainably. This volume provides an extensive overview of current housing policies in Asia, Africa and Latin America and presents the facts and trends of recent housing policies. The chapters provide ideas and tools for pro-poor interventions with respect to the provision of land for housing, building materials, labour, participation and finance. The book looks at the role of the various stakeholders involved in such

interventions, including national and local governments, private sector organisations, NGOs and Community-based Organisations.

*Imposing Standards* Bloomsbury Publishing

This book offers new perspectives of transdisciplinary research, in methodological as well as theoretical respects. It provides insights in the two-fold bio-physical and the socio-cultural global embeddedness of local living conditions on the basis of selected empirical studies from Latin America, Asia, Africa, Australia and Europe. The theoretical foundations of ecological research and sustainability policies were developed at the end of the nineteenth century. They are largely based on investigations of living spaces and the

evolution and differentiation of varied life forms. This perspective is embedded in the practical and theoretical European problem situations of the past and lacks social and cultural differentiation. The transformation of spatial and natural relations as a result of the globalization process is so radical that new theories are needed to solve 21st century ecological problems. Moreover, in view of the lack of an ontologically sound and promising strategy for transdisciplinary problem solving, as well as an acceptable consideration of the power of cultural schemas relating to natural living's interpretations, there is a strong need to focus on sustainable social practices, habits and routines, rather than on predominantly living spaces or eco-topes. This book elaborates on the

transdisciplinary approach by reflecting on the theoretical heritage and a global perspective of sustainability, by focusing on the primary role of a social approach in sustainability research and by putting emphasis on cultural dimension of sustainability. It postulates that global sustainability is grounded in a global understanding of our everyday activities.

**The Action Plan for Australian Mammals 2012** International Monetary Fund

The Action Plan for Australian Mammals 2012 is the first review to assess the conservation status of all Australian mammals. It complements The Action Plan for Australian Birds 2010 (Garnett et al. 2011, CSIRO Publishing), and although the number of Australian mammal taxa is marginally fewer than

for birds, the proportion of endemic, extinct and threatened mammal taxa is far greater. These authoritative reviews represent an important foundation for understanding the current status, fate and future of the nature of Australia. This book considers all species and subspecies of Australian mammals, including those of external territories and territorial seas. For all the mammal taxa (about 300 species and subspecies) considered Extinct, Threatened, Near Threatened or Data Deficient, the size and trend of their population is presented along with information on geographic range and trend, and relevant biological and ecological data. The book also presents the current conservation status of each taxon under Australian legislation, what additional

information is needed for managers, and the required management actions. Recovery plans, where they exist, are evaluated. The voluntary participation of more than 200 mammal experts has ensured that the conservation status and information are as accurate as possible, and allowed considerable unpublished data to be included. All accounts include maps based on the latest data from Australian state and territory agencies, from published scientific literature and other sources. The Action Plan concludes that 29 Australian mammal species have become extinct and 63 species are threatened and require urgent conservation action. However, it also shows that, where guided by sound knowledge, management capability and resourcing, and longer-term

commitment, there have been some notable conservation success stories, and the conservation status of some species has greatly improved over the past few decades. The Action Plan for Australian Mammals 2012 makes a major contribution to the conservation of a wonderful legacy that is a significant part of Australia's heritage. For such a legacy to endure, our society must be more aware of and empathetic with our distinctively Australian environment, and particularly its marvellous mammal fauna; relevant information must be readily accessible; environmental policy and law must be based on sound evidence; those with responsibility for environmental management must be aware of what priority actions they should take; the urgency for action (and

consequences of inaction) must be clear; and the opportunity for hope and success must be recognised. It is in this spirit that this account is offered.

CTET and TET Science and Pedagogy for Class 6 to 8 for 2021 Exams Springer

Corporate Reputation Decoded is the first book of its kind that traces the journey of Indian companies in building corporate reputation (CR). The book addresses CR in the Indian context and is in response to the growing interest of companies in this area. The book explains the process of building, maintaining and strategising for CR. It also discusses various aspects of CR—company's stakeholders, situations demanding CR interventions, and the impact of a company's culture, ethics and leadership on its CR. The book

expounds on these using Indian cases (Tata, Infosys, HUL, Reliance, Aditya Birla Group, HDFC, among others), which enhance the understanding of CR in India as well as benchmark CR best practices in India. The book is of major significance to CR practitioners, scholars, teachers, students and C-Suite professionals who will also find the techniques proposed in the book interesting as they can assess, evaluate, adopt and adapt strategies followed by other companies for reputation enhancement.

Promoting Democracy, Reinforcing Authoritarianism Routledge

The monochrome - a single colour of paint applied over the entirety of a canvas - remains one of the more contentious modernist artistic

inventions. But whilst the manufacture of these 'pictures of nothing' was ostensibly straightforward, their subsequent theorisation has been anything but. More than a history, *Monochrome: Darkness and Light in Contemporary Art* is the first account of the monochrome's lively role in contemporary art. Liberated from the burden of representation, the monochrome first stood for emancipation: an ideological and artistic impulse that characterised the avant-garde of the early twentieth century. Historically, the monochrome embodied the most extreme form of abstraction and pure materiality. Yet more recently, adaptations of the art form have focused on a broader range of cultural and interpretive contexts. Provocative, innovative and timely, this book argues

that the latest artistic strategies go beyond stylistic concerns and instead seek to re-engage with ideas around authorship, process and the conditions of the visible as they are given and understood through both light and darkness. Discussing works by artists such as Katie Paterson, Hiroshi Sugimoto, Tom Friedman, Bruno Jakob, Sherrie Levine and Ceal Floyer, the book shows that the debates around an artwork's form and its possibility for meaning that the monochrome first engendered remain very much alive in contemporary visual culture.

SBI Clerk Junior Associates Solved Paper Pre and Main 2021 Edward Elgar Publishing

A one-stop shop for background and current thinking on the development and

uses of rates of return on capital  
Completely revised for this highly anticipated fifth edition, *Cost of Capital* contains expanded materials on estimating the basic building blocks of the cost of equity capital, the risk-free rate, and equity risk premium. There is also discussion of the volatility created by the financial crisis in 2008, the subsequent recession and uncertain recovery, and how those events have fundamentally changed how we need to interpret the inputs to the models we use to develop these estimates. The book includes new case studies providing comprehensive discussion of cost of capital estimates for valuing a business and damages calculations for small and medium-sized businesses, cross-referenced to the chapters

covering the theory and data. Addresses equity risk premium and the risk-free rate, including the impact of Federal Reserve actions Explores how to use Morningstar's Ibbotson and Duff Phelps Risk Premium Report data Discusses the global cost of capital estimation, including a new size study of European countries *Cost of Capital, Fifth Edition* puts an emphasis on practical application. To that end, this updated edition provides readers with exclusive access to a companion website filled with supplementary materials, allowing you to continue to learn in a hands-on fashion long after closing the book.  
[Global Sustainability, Cultural Perspectives and Challenges for Transdisciplinary Integrated Research](#) by Mocktime Publication

Rethinking the Future of Europe has brought together three contrasting collections of contributions: the incrementalist perspective concerning the step by step development of Europe, the more radical reform/restructuring approach to the future of Europe, and a view of Europe from the outside.

**Potiphar's Wife** John Wiley & Sons  
The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government

accounts, national accounts, and population. Updated monthly.

**The Euro Trap** CSIRO PUBLISHING

This is the printed textbook, Marketing Principles. Marketing Principles combines a thorough and engaging overview of essential marketing principles. The text provides you with the knowledge and decision-making skills you'll need to succeed in today's competitive business environment. Marketing Principles includes the most current coverage of marketing strategies and concepts with extensive real-world examples including social networking and digital marketing. You will find important topics drawn from the rapidly changing world of modern business including social and environmental responsibility, sustainability, globalisation,

entrepreneurship, and marketing through transitional times. New, PRINT versions of this book come with bonus online study tools including animated activities and videos on the CourseMate Express platform.

*The Political Economy of European Banking Union* SAGE Publications India Promoting democracy has long been a priority of Western foreign policy. In practice, however, international attempts to expand representative forms of government have been inconsistent and are often perceived in the West to have been failures. The states of Central Asia, in particular, seem to be "democracy resistant," and their governments have continued to support various forms of authoritarianism in the decades following the Soviet Union's

collapse. In *Democracy in Central Asia*, Mariya Omelicheva examines the beliefs and values underlying foreign policies of the major global powers—the United States, the European Union, Russia, and China—in order to understand their efforts to influence political change in Kazakhstan, Kyrgyzstan, and Uzbekistan. Omelicheva has traveled extensively in the region, collecting data from focus groups and public opinion surveys. She draws on the results of her fieldwork as well as on official documents and statements of democracy-promoting nations in order to present a provocative new analysis. Her study reveals that the governments and citizens of Central Asia have developed their own views on democracy supported by the Russian and Chinese models rather than by

Western examples. The vast majority of previous scholarly work on this subject has focused on the strategies of democratization pursued by one agent such as the United States or the European Union. Omelicheva shifts the focus from democracy promoters' methods to their message and expands the scope of existing analysis to include multiple sources of influence. Her fresh approach illuminates the full complexity of both global and regional notions of good governance and confirms the importance of social-psychological and language-based perspectives in understanding the obstacles to expanding egalitarianism.

Carbon Pricing William Andrew Effective sustainability communication can deliver business value. Get it wrong,

however, and the reputational damage will be costly. Stakeholders, and the general public as well as activists, are unforgiving of companies whose products, services, business practices or culture fall short of their socially responsible rhetoric. Based on close to one hundred in-depth interviews with leading experts, Christian Conrad and Marjorie Thompson's *The New Brand Spirit* helps corporate communications and marketing professionals tackle this conundrum by providing a first-hand view of eight distinct and relevant stakeholder perspectives. Nineteen comprehensive and well-researched best practice cases from sustainability leaders like IBM, Unilever, Marks & Spencer and Puma will inspire all those tasked with communicating

sustainability with practical and applicable tools and lessons learned. The result is a book that will enable senior executives, corporate communication professionals and brand managers to decide when, to whom and how to communicate sustainability related messages - and when not to.

Oxford University Press

*Innovative Strategies for Teaching in the Plant Sciences* focuses on innovative ways in which educators can enrich the plant science content being taught in universities and secondary schools. Drawing on contributions from scholars around the world, various methods of teaching plant science is demonstrated. Specifically, core concepts from

ethnobotany can be used to foster the development of connections between students, their environment, and other cultures around the world. Furthermore, the volume presents different ways to incorporate local methods and technology into a hands-on approach to teaching and learning in the plant sciences. Written by leaders in the field, *Innovative Strategies for Teaching in the Plant Sciences* is a valuable resource for teachers and graduate students in the plant sciences.

OUP Oxford

This interdisciplinary work presents a conceptual framework and brings together constructivist and rationalist accounts of how EU norms are adopted, adapted, resisted or rejected. These chapters provide empirical cases and

critical analysis of a rich variety of norm-takers from EU member states, European and non-European states, including the rejection of EU norms in Russia and Africa as well as adaptation of EU practices in Australia and New Zealand. Chapters on China, ASEAN and the Czech Republic demonstrate resistance to EU norm export. This volume probes differences in willingness to adopt or adapt norms between various actors in the recipient state and explores such questions as: How do norm-takers perceive of the EU and its norms? Is there a 'normative fit' between EU norms and the local normative context? Similarly, how do EU norms impact recipients' interests and institutional arrangements? First, the authors map EU norm export strategies

and approaches as they affect norm-takers. Second, the chapters recognize that norm adoption, adaptation, resistance or rejection is a product of interaction and a relationship in which interdependence, asymmetry and power play a role. Third, we see that domestic circumstances within norm-takers condition the reception of norms. This book's focus on norm-takers highlights the reflexive nature of norm diffusion and that nature has implications for the EU itself as a norm exporter. Anyone with an interest in the research agenda on norm diffusion, normative power and the EU's normative dialogue with the world will find this book highly valuable, including scholars, policy makers and students of subjects including political science, European studies, international

relations and international and EU law.
