America is disintegrating. The "one Nation under God, indivisible" of the Pledge of Allegiance is passing away. In a few decades, that America will be gone forever. In its place will arise a country unrecognizable to our parents. This is the thrust of Pat Buchanan's *Suicide of a Superpower*, his most controversial and thought-provoking book to date. Buchanan traces the disintegration to three historic changes: America's loss of her cradle faith, Christianity; the moral, social, and cultural collapse that have followed from that loss; and the slow death of the people who created and ruled the nation. And as our nation disintegrates, our government is failing in its fundamental duties, unable to defend our borders, balance our budgets, or win our wars. How Americans are killing the country they profess to love, and the fate that awaits us if we do not turn around, is what *Suicide of a Superpower* is all about.

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

Social Science Research MacMillan

This edited book brings together fifteen original empirical studies from a variety of international contexts to provide a detailed exploration of language assessment, testing and evaluation.

Language assessment has a key role in the development and implementation of language and educational policies at the national level, and this book examines some of the impacts - both positive and negative - of different skills testing and examination approaches on learning outcomes and individual students' language learning. This book will be of interest to scholars working in applied linguistics and language education, teacher training, testing and evaluation, as well as stakeholders such as practitioners, educators, educational agencies, and test developers.

The Mind of Primitive Man Macmillan Elt

This updated and revised edition outlines strategies and models for how to use technology and

knowledge to improve performance, create jobs and increase income. It shows what skills will be required to produce, sell and manage performance over time, and how manual jobs can contribute to reduce the consumption of non-renewable resources.
