The Economic Naturalist
Designing Web Navigation
Have you ever wondered why there is a light in your fridge but not in your freezer? Or why 24-hour shops bother having locks on their doors? Or why soft drink cans are cylindrical, but milk cartons are square? The answer is simple: economics. For years, economist Robert Frank has been encouraging his students to ask questions about the conundrums and strange occurrences they encounter in everyday life and to try to explain them using economics. Now in this bestselling book, he

shares the most intriguing - and bizarre - questions and the economic principles that answer them to reveal why many of the most puzzling parts of everyday life actually make perfect (economic) sense.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R.

Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

BESTSELLER Transform your life using the Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in

more ways than you can imagine' Hal Elrod, author of *The Miracle Morning* In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: * TRACK YOUR PAST: using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. * ORDER YOUR PRESENT: find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. * PLAN YOUR FUTURE: establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system

combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls "intentional living": making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. *** This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. ***

In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these

should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review

Python The Economist Thoroughly rewritten for today's web environment, this bestselling book offers a fresh look at a fundamental topic of web site development: navigation design. Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various "rich" interactive technologies, the basic

problems of creating a good web navigation system remain. Designing Web Navigation demonstrates that good navigation is not about technology-it's about the ways people find information, and how you guide them. Ideal for beginning to intermediate web designers, managers, other non-designers, and web development pros looking for another perspective, Designing Web Navigation offers basic design principles, development techniques and practical advice, with real-world examples and essential concepts seamlessly folded in. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web navigation and basic human information behavior Demonstrates how navigation reflects brand and affects site credibility Helps you understand the problem you're trying to solve before you set out to design Thoroughly reviews the mechanisms

and different types of navigation Explores "information scent" and "information shape" Explains "persuasive" architecture and other design concepts Covers special contexts, such as navigation design for web applications Includes an entire chapter on tagging While Designing Web Navigation focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Well researched and cited, this book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.

This expanded eleventh edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed

out in the guide include:
 *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down.

•Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde). •Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance •Forgo means do without; forego means go before.

•Fortuitous means accidental, not fortunate or well-timed. •Times: Take care. Three times more than X is four times as much as X. •Full stops: Use plenty. They keep sentences short. This helps the reader.

 For decades asbestos was considered an ideal substance and therefore was called 'the mineral of the twentieth century'. Even though the fiber had already proven much earlier to cause various ailments, a real boom began in the 1950s and prospered everywhere in Europe. This book retraces the history of the Swiss asbestos cement company Eternit, investigating the strategy it developed - together with other asbestos industrialists - to prevent this carcinogen from being outlawed until, in 1999, an EU Directive was finally adopted to this end. The book also reviews the struggle of the asbestos workers and their families to gain official recognition of, and compensation for, the harm suffered.
