TRINITY ROLAND

Python Crash Course, 2nd Edition Cambridge University Press

A fresh and suggestive interpretation of the relationship between veterans of the Great War and fascism in interwar Europe.

Innovation et export MDPI

Detailed new account of the historical emergence and conceptual reach of the sublime both before and after Longinus.

Modelling Dual-use Trade Control Systems Routledge

In 2015, the General Assembly of State Parties to the World Heritage Convention passed a groundbreaking Sustainable Development policy that seeks to bring the World Heritage system into line with the UN's sustainable development agenda (UNESCO 2015). World Heritage and Sustainable Development provides a broad overview of the process that brought about the new policy and the implications of its enactment. The book is divided into four parts. Part I puts the policy in its historical and theoretical context, and Part II offers an analysis of the four policy dimensions on which the policy is based – environmental sustainability, inclusive social development, inclusive economic development and the fostering of peace and security. Part III presents perspectives from IUCN, ICOMOS and ICCROM – the three Advisory Bodies to the World Heritage Committee, and Part IV offers 'case study' perspectives on the practical implications of the policy. Contributions come from a wide range of experienced heritage professionals and practitioners who offer both 'inside' perspectives on the evolution of the policy and 'outside' perspectives on its implications. Combined, they present and analyse the main ideas, debates and implications of the policy change. This book is key reading for all heritage professionals interested in developing a better understanding of the new Sustainable Development policy. It is also essential reading for scholars and students working in the area.

Offshore Renewable Energy: Ocean Waves, Tides and Offshore Wind Butterworth-Heinemann

This book has been published by Allenvi (French National Alliance for Environmental Research) to coincide with the 22nd Conference of Parties to the United Nations Framework Convention on Climate Change (COP22) in Marrakesh. It is the outcome of work by academic researchers on both sides of the Mediterranean and provides a remarkable scientific review of the mechanisms of climate change and its impacts on the environment, the economy, health and Mediterranean societies. It will also be valuable in developing responses that draw on "scientific evidence" to address the issues of adaptation, resource conservation, solutions and risk prevention. Reflecting the full complexity of the Mediterranean environment, the book is a major scientific contribution to the climate issue, where various scientific considerations converge to break down the boundaries between disciplines.

War Veterans and Fascism in Interwar Europe UCL Press

It is hard to imagine tourism without the creative use of seductive, as well as restrictive, imaginaries

about peoples and places. These socially shared assemblages are collaboratively produced and consumed by a diverse range of actors around the globe. As a nexus of social practices through which individuals and groups establish places and peoples as credible objects of tourism, "tourism imaginaries" have yet to be fully explored. Presenting innovative conceptual approaches, this volume advances ethnographic research methods and critical scholarship regarding tourism and the imaginaries that drive it. The various authors contribute methodologically as well as conceptually to anthropology's grasp of the images, forces, and encounters of the contemporary world.

MEXIQUE 2017/2018 Petit Futé Berghahn Books

Among the finest examples of European craftsmanship are the clocks produced for the luxury trade in the eighteenth century. The J. Paul Getty Museum is fortunate to have in its decorative arts collection twenty clocks dating from around 1680 to 1798: eighteen produced in France and two in Germany. They demonstrate the extraordinary workmanship that went into both the design and execution of the cases and the intricate movements by which the clocks operated. In this handsome volume, each clock is pictured and discussed in detail, and each movement diagrammed and described. In addition, biographies of the clockmakers and enamellers are included, as are indexes of the names of the makers, previous owners, and locations.

The Public Sphere Cambridge University Press

"Research regarding the significance and consequence of anthropogenic transformations of the earth's land, oceans, biosphere and climate have demonstrated that, from a wide variety of perspectives, it is very likely that humans have initiated a new geological epoch, their own. First labeled the Anthropocene by the chemist Paul Crutzen, the consideration of the merits of the Anthropocene thesis by the International Commission on Stratigraphy and the International Union of Geological Sciences has also garnered the attention of philosophers, historians, and legal scholars, as well as an increasing number of researchers from a range of scientific backgrounds. Architecture in the Anthropocene: Encounters Among Design, Deep Time, Science and Philosophy intensifies the potential of this multidisciplinary discourse by bringing together essays, conversations, and design proposals that respond to the "geological imperative" for contemporary architecture scholarship and practice. Contributors include Nabil Ahmed, Meghan Archer, Adam Bobbette, Emily Cheng, Heather Davis, Sara Dean, Seth Denizen, Mark Dorrian, Elizabeth Grosz, Lisa Hirmer, Jane Hutton, Eleanor Kaufman, Amy Catania Kulper, Clinton Langevin, Michael C.C. Lin, Amy Norris, John Palmesino, Chester Rennie, François Roche, Ann-Sofi Rönnskog, Isabelle Stengers, Paulo Tavares, Etienne Turpin, Eyal Weizman, Jane Wolff, Guy Zimmerman."--Publisher's description.

The Sublime in Antiquity Walter de Gruyter

This 108-page report reveals that children as young as six dig mining shafts, work underground, pull up heavy weights of ore, and carry, crush, and pan ore. Many children also work with mercury, a toxic substance, to separate the gold from the ore. Mercury attacks the central nervous system and is particularly harmful to children.

The Mediterranean region under climate change MIT Press

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and

practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Hà Nội, a Metropolis in the Making Le Petit Futé

The best-selling Python book in the world, with over 1 million copies sold! A fast-paced, no-nonsense, updated guide to programming in Python. If you've been thinking about learning how to code or picking up Python, this internationally bestselling guide to the most popular programming language is your quickest, easiest way to get started and go! Even if you have no experience whatsoever, Python Crash Course, 2nd Edition, will have you writing programs, solving problems, building computer games, and creating data visualizations in no time. You'll begin with basic concepts like variables, lists, classes, and loops—with the help of fun skill-strengthening exercises for every topic—then move on to making interactive programs and best practices for testing your code. Later chapters put your new knowledge into play with three cool projects: a 2D Space Invaders-style arcade game, a set of responsive data visualizations you'll build with Python's handy libraries (Pygame, Matplotlib, Plotly, Django), and a customized web app you can deploy online. Why wait any longer? Start your engine and code!

Guidelines for Choosing Replacement Females IRD Éditions

An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

Nordic Nutrition Recommendations 2004 Getty Publications

This open access book provides a panoramic view of the evolution of Spanish agriculture from 1900 to the present, offering a more diverse picture to the complex and multidimensional reality of agrarian production. With a clear transdisciplinary ambition, the book applies an original and innovative theoretical and methodological tool, termed Agrarian Social Metabolism, combining Social Metabolism with an agroecological perspective. This integrative analysis is especially interesting for environmental scientists and policy makers being the best way to design sustainable agroecosystems and public policies capable of moving us towards a more sustainable food system. Spanish agricultural production has experienced impressive growth during the 20th century which has allowed it to ensure the supply of food to the population and even to transform some crops into important chapters in foreign trade. However, this growth has had its negative side since it was based on the injection of large amounts of external energy, on the destruction of employment and the loss of profitability of agricultural activity. But perhaps the most serious part is the strong impact

of the current industrialised agriculture model on Spanish agroecosystems, exposed to the overexploitation of hydric resources, pollution of the water by nitrates and pesticides, high erosion rates and an alarming loss of biodiversity; damage which in the immediate future will end up reducing production capacity.

Python Crash Course African Books Collective

L'innovation et l'exportation sont traditionnellement considérées séparément, tant au sein des entreprises que des organismes de soutien qui leur sont dédiés. Aussi, il n'existe que très peu de travaux académiques axés sur la façon de mettre en oeuvre cette relation de manière opérationnelle. Cet ouvrage propose un outil de diagnostic conjoint à destination des PME, mettant en avant de bonnes pratiques à maîtriser pour améliorer simultanément leurs performances en matière d'innovation et d'exportation, à la manière d'un cercle vertueux. Innovation et export : le double défi de la petite entreprise vise à promouvoir une prise en compte simultanée de l'innovation et de l'exportation dans le management stratégique des PME, pour qui l'exploitation de synergies s'avère être un levier puissant permettant de pallier leurs difficultés à mobiliser des ressources importantes.

Pounder's Marine Diesel Engines and Gas Turbines Innovation et export

Mexico ! Condensé de sites précolombiens mais aussi de paysages, il n'est pas impossible de passer d'une zone semi désertique à une zone tropicale, l'instant d'un virage laissez-vous chavirer par le contraste mexicain ! Du nord au sud, d'est en ouest, le pays est couvert de ruines imposantes, vestiges des civilisations olmèques, toltèques, maya et aztèque : grandes cités, autels grandioses en forme de pyramides, temples et tombeaux ornés de sculptures et de peintures murales.

Knowledge for a Sustainable World Cambridge University Press

Python Crash Course is a fast-paced, thorough introduction to Python that will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn about basic programming concepts, such as lists, dictionaries, classes, and loops, and practice writing clean and readable code with exercises for each topic. You'll also learn how to make your programs interactive and how to test your code safely before adding it to a project. In the second half of the book, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, data visualizations with Python's super-handy libraries, and a simple web app you can deploy online. As you work through Python Crash Course you'll learn how to: -Use powerful Python libraries and tools, including matplotlib, NumPy, and Pygal -Make 2D games that respond to keypresses and mouse clicks, and that grow more difficult as the game progresses -Work with data to generate interactive visualizations -Create and customize Web apps and deploy them safely online -Deal with mistakes and errors so you can solve your own programming problems If you've been thinking seriously about digging into programming, Python Crash Course will get you up to speed and have you writing real programs fast. Why wait any longer? Start your engines and code! Uses Python 2 and 3

Joachim Koester - Bringing Something Back Nordic Council of Ministers

The definition and implementation of sensitive trade rules can only take place when taking into due consideration the local needs and realities of the country or region. The Chaudfontaine Group presents its views on essential elements for the creation of trade control systems.

Architecture in the Anthropocene Le Petit Futé

Recent research has demonstrated that, in the Roman, Late Antique, Early Islamic and Medieval worlds, glass was traded over long distances, from the Eastern Mediterranean, mainly Egypt and Israel, to Northern Africa, the Western Mediterranean and Northern Europe. Things that Travelled, a collaboration between the UCL Early Glass Technology Research Network, the Association for the History of Glass and the British Museum, aims to build on this knowledge. Covering all aspects of glass production, technology, distribution and trade in Roman, Byzantine and Early Medieval/Early Islamic times, including studies from Britain, Egypt, Cyprus, Italy and many others, the volume combines the strengths of the sciences and cultural studies to offer a new approach to research on ancient glass. By bringing together such a varied mix of contributors, specialising in a range of geographical areas and chronological time frames, this volume also offers a valuable contribution to broader discussions on glass within political, economic, cultural and historical arenas.

Tourism Imaginaries No Starch Press

Nordiska näringsrekommendationer (NNR 2004). Boken innehåller hela den vetenskapliga bakgrunden till de nordiska näringsrekommendationerna. Dokumentationen är granskad och uppdaterad. Kapitel om fysisk aktivitet och livsmedelsbaserade rekommendationer har lagts till.

ALGÉRIE 2020/2021 Petit Futé Anexact

What is happening to public debate in Western cultures? Is our public sphere disintegrating? In the face of popular tabloid newspapers, new forms of reality television and an increasing lack of respect

for traditional authorities, many critics are concerned that our society no longer has a rational, informed and unified space where everyone can communicate about the issues that affect us all. In this book Alan McKee answers these questions by providing an introduction to the concept of the public sphere, the history of the term and the philosophical arguments about its function. By drawing on many examples from contemporary mediated culture, McKee looks at how we communicate with each other in public - and how we decide whether changing forms of communication are a good thing for the 'public sphere'.

Nordic Nutrition Recommendations 2012 BRILL

Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines
