Chapple's award winning Company Law textbook is written for business or commerce students studying an accounting major. This updated second edition presents company law in an applied context rather than the doctrinal context many major legal publishers use.

It is concise and to the point, covering the core concepts in a typical company law unit without any extraneous topics. The Company Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Clayton Utz, animated work problems and questions with immediate feedback. Chapple's unique resource can also form the basis of a blended learning solution for lecturers.

Business Laws for B.Com. (Hons.) S. Chand Publishing

Who can buy? Students of BBA, B.Com, and law must buy this book as it is in their syllabus. General students interested in running a business should know the acts given in this book, so it is helpful for them as well. Business Regulatory Framework is specially designed to serve as an undergraduate textbook for B.Com. (Honors & General) students of the different universities across India. This book is designed especially to cater to the needs of commerce students, equipping them with a strong foundation for an understanding of the current business law situation. The book seeks to provide comprehensive coverage of the various topics relating to business law. It offers content that is simple to understand but does not compromise on necessary technical detail.

Company Law in New Zealand Oxford University Press

This title was first published in 2003: Law changes rapidly. Since the first edition of this book in 1991 there have been tremendous changes - European Union measures, a new Defamation Act and Data Protection Act, amendments to copyright, and new problems from the Internet. This second edition has been comprehensively revised and updated to reflect these changes. Copyright, patents, and confidential information are marketable commodities needing the protection of law. This is not a book for the legal specialist but a readable guide to information law for those in the information management field. It includes many examples of legal cases and helpful explanations of the different kinds and causes of legal action. One chapter is devoted to electronic data

issues and two to copyright abroad and transnational protection of intellectual property. Whilst the main emphasis is on copyright - written, visual, musical and multimedia - other areas of intellectual property, particularly patents, are discussed, and advice given on trade marks, passing off and related issues. The author explains the legal principles of data protection and privacy, libel, freedom of information, official secrets, censorship, obscenity, blasphemy, and racial hatred. Full statute and case references are included in the book. Information scientists, librarians and others in modern information and media management will find this book an invaluable reference for what they can and can't do with information they manage and distribute.
