Bioinspired Legged Locomotion John Wiley & Sons
 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.
Handbook of Hospitality Strategic Management Pearson Education
 This encyclopedia covers all of the relevant issues in the field of hospitality management from both a sectoral level as well as a functional one. It's unique user-friendly structure enables readers to find exactly the information they require at a glance.
Computerworld Butterworth-Heinemann
 Bioinspired Legged Locomotion: Models, Concepts, Control and Applications explores the universe of legged robots, bringing in perspectives from engineering, biology, motion science, and medicine to provide a comprehensive overview of the field. With comprehensive coverage, each chapter brings outlines, and an abstract, introduction, new developments, and a summary. Beginning with bio-inspired locomotion concepts, the book's editors present a thorough review of current literature that is followed by a more detailed view of bouncing, swinging, and balancing, the three fundamental sub functions of locomotion. This part is closed with a presentation of conceptual models for locomotion. Next, the book explores bio-inspired body design, discussing the concepts of motion control, stability, efficiency, and robustness. The morphology of legged robots follows this discussion, including biped and quadruped designs. Finally, a section on high-level control and applications discusses neuromuscular models, closing the book with examples of applications and discussions of performance, efficiency, and robustness. At the end, the editors share their perspective on the future directions of each area, presenting state-of-the-art knowledge on the subject using a structured and consistent approach that will help researchers in both academia and industry formulate a better understanding of bioinspired legged robotic locomotion and quickly apply the concepts in research or products. Presents state-of-the-art control approaches with biological relevance Provides a thorough understanding of the principles of organization of biological locomotion Teaches the organization of complex systems based on low-dimensional motion concepts/control Acts as a guideline reference for future robots/assistive devices with legged architecture Includes a selective bibliography on the most relevant published articles

Data Processing Digest Andrews UK Limited

First published in 1983, this easy-to-follow guide to the Dragon 32 gives users a complete overview of the acclaimed machine that many considered well ahead of its time. Though it was more powerful and quicker than many of its competitors, the Dragon 32 never gained the success of other 8-bit computers of the day such as the Commodore 64 or the ZX Spectrum. Despite this, the classic machine still retains a dedicated following to this day. Not only is this remastered version perfect for hobbyists and collectors, it is also a highly useful resource for those interested in programming retro games and utilities. As the original publisher Melbourne House wrote: ***** A comprehensive overview of programming the Dragon 32, covering BASIC, machine language, sound and graphics. The Dragon 32 Programmer's Reference Guide will show you how to exercise the full potential of your Dragon 32, by taking you from simple BASIC routines right through to advanced machine language programs. The book fully examines BASIC and tells you everything you need to know to use every function to its maximum. Each facility is illustrated by example programs. Many professional hints and tips are included, demonstrating the full features of the Dragon 32, especially the graphics and sound potential. For the serious programmer, a memory map is included as well as 'monitor entry points' giving more information about the Dragon 32 than has ever been published anywhere else. This book will take you far beyond the realms of standard Dragon 32 programming. ***** Acorn Books is proud to present its Retro Reproductions series, a collection of classic computing works from the 80s and 90s given a new lease of life in the 21st century. From standards of programming reference no self-respecting microcomputer coder would be without, to obscure works unavailable for many years, these modern re-prints are perfect for any connoisseur of retro computing.

Administrative Management Routledge

This introductory textbook provides a thorough guide to the management of food and beverage outlets, from their day-to-day running through to the wider concerns of the hospitality industry. It explores the broad range of subject areas that encompass the food and beverage market and its five main sectors - fast food and popular catering, hotels and quality restaurants and functional, industrial, and welfare catering. New to this edition are case studies covering the latest industry developments, and coverage of contemporary environmental concerns, such as sourcing, sustainability and responsible farming. It is illustrated in full colour and contains end-of-chapter summaries and revision questions to test your knowledge as you progress. Written by authors with many years of industry practice and teaching experience, this book is the ideal guide to the subject for

hospitality students and industry practitioners alike.

Laboratory Control of Water Supplies Butterworth-Heinemann

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Data Sources Wiley

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Computing Routledge

Fashion has been steadily moving from the brick and mortar to the digital market. As such, it is increasingly vital to research new methods that will help businesses to grow and succeed in this new sphere. Advanced Fashion Technology and Operations Management is a pivotal reference source for the latest development management strategies, fashion marketing, international business, and fashion entrepreneurship. Featuring extensive coverage across a range of relevant perspectives and topics, such as online shopping behavior, digital fashion, and e-commerce, this book is ideally designed for professionals, entrepreneurs, students, and researchers.

eTourism case studies Routledge

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Scientific and Technical Aerospace Reports Oldenbourg Verlag

eTourism Case Studies bridges the gap in contemporary literature by carefully examining marketing and management issues of many international companies that have successfully implemented eTourism solutions. Divided into six sections this book explores the newest developments in this field, introducing and discussing emerging trends, approaches, models and

paradigms, providing visions for the future of eTourism and supporting discussion and elaboration with the help of thorough pedagogic aids. With contributions from leading global experts both from the industry and academia, each case follows a rigid structure, with features such as bulleted summaries and review questions, as well as each section having its own thorough introduction and conclusion written by the editors, highlighting the key issues and theories. This is the first book of its kind to bring together cases highlighting best practice and methods for exploiting ICT in the tourism industry, from international market leaders.

Electronic Design Microsoft Press

Understand everything you need to know about Oracle's Integration Cloud Service and how to utilize it optimally for your business About This Book The only guide to Integration Cloud Service in the market Focused on practical action to deliver business value A professional's guide to an expensive product, providing comprehensive training, and showing how to extract real business value from the product Who This Book Is For This book is ideal for any IT professional working with ICS, any Oracle application or cloud solution developer or analyst who wants to work with ICS to deliver business value. What You Will Learn Use ICS to integrate different systems together without needing to be a developer Gain understanding of what a number of technologies and standards provide - without needing to understand the fine details of those standards and technologies Understand the use of connectors that Oracle provide from technology based connections such as file and database connections to SaaS solutions ranging from Salesforce to Twitter Enrich data and extend SaaS integration to route to different instances Utilize a number of tools to help develop and check that your integrations work before connecting to live systems Introduce and explain integration concepts so that the integrations created are maintainable and sustainable for the longer term Provide details on how to keep up to date with the features that Oracle and partners provide in the future Get special connections developed to work with ICS In Detail Businesses are built on data, and applications that access that data. In modern businesses the same cloud-based data stores and applications might be accessed by hundreds of different applications from thousands of different devices via APIs. To make this happen, APIs must be wired together i.e. integrated. Oracle Integration Cloud Service provides a complete method for integrating enterprise applications in the cloud. Integration Cloud Service (ICS) provides a cloud hosted means to integrate systems together using a graphical means to define and represent integrations. This book will be a comprehensive, hands-on guide to building successful, high-availability integrations on ICS. This book sets out to demonstrate how ICS can be used to effectively implement integrations that work both in the cloud and on premise. It starts with a fast, practical introduction to what ICS can do for your business and then shows how ICS allows you to develop integrations not only quickly but in a way that means they are maintainable and extensible. Gradually it moves into more advanced integrations, showing how to achieve sophisticated results with ICS and work with external applications. Finally the book shows you how to

monitor cloud apps and go beyond ICS to build even more powerful integrated applications. By the end of the book, you will the knowledge on how to use ICS to solve your own integration needs and harness the technologies in a maintainable and sustainable manner. Style and approach This book will take a pragmatic approach and will be a business-focused guide to delivering business value with ICS.

Graphic Arts Literature Abstracts Duke Publishing Company Professional foodservice managers are faced with a wide array of challenges on a daily basis. Controlling costs, setting budgets, and pricing goods are essential for success in any hospitality or culinary business. Food and Beverage Cost Control provides the tools required to maintain sales and cost histories, develop systems for monitoring current activities, and forecast future costs. This detailed yet reader-friendly guide helps students and professionals alike understand and apply practical techniques to effectively manage food and beverage costs. Now in its seventh edition, this extensively revised and updated book examines the entire cycle of cost control, including purchasing, production, sales analysis, product costing, food cost formulas, and much more. Each chapter presents complex ideas in a clear, easy-to-understand style. Micro-case studies present students with real-world scenarios and problems, while step-by-step numerical examples highlight the arithmetic necessary to understand cost control-related concepts. Covering everything from food sanitation to service methods, this practical guide helps readers enhance their knowledge of the hospitality management industry and increase their professional self-confidence.

Control & Instrumentation IGI Global

The fourth edition of this text addresses the issue of organizational culture in more detail and gives an analysis of why information system projects fail and what can be done to make success more likely.

Implementing Oracle Integration Cloud Service Concept Publishing Company

This text aims to provide applications-oriented coverage of important computing concepts needed for basic computing competency - the hardware, the software, the opportunities, responsibilities and the challenges.

Computerworld Packt Publishing Ltd

Handbook of Hospitality Strategic Management provides a critical review of mainstream hospitality strategic management research topics. Internationally recognized leading researchers provide thorough reviews and discussions, reviewing strategic management research by topic, as well as illustrating how theories and concepts can be applied in the hospitality industry. This book covers all aspects of strategic management in hospitality. The depth and coverage of each topic is unprecedented. A must-read for hospitality researchers and educators, students and industry practitioners.

Advanced Fashion Technology and Operations Management Pearson Education

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Food and Beverage Management

This Second Edition has been updated to include a brand new

chapter on yield management, plus a human resources chapter refocused to cover current trends in training, employee empowerment, and reducing turnover. In addition, you'll discover how to increase efficiency with today's hospitality technology-- from electronic lock to front office equipment.

Hospitality Technology

Ziel des Lehrbuches ist es, einen umfassenden Einblick in das gesamte Spektrum elektronischer Informations-, Kommunikations- und Reservierungssysteme im Tourismus zu geben. Das Lehrbuch umfasst die Inhalte der Vorlesungen mit Übungen an Hochschulen aller Ebenen. Das Lehrbuch richtet sich an Studierende des Bachelor- und Masterstudiums der Studienrichtung Tourismus sowie an Führungskräfte und Mitarbeiter/innen von Unternehmen der Reise- und Tourismuswirtschaft. Fächer des IT-basierten Informationsmanagements werden an Hochschulen bereits im Grundstudium gelehrt und im Haupt- und Masterstudium vertieft.

Micro Systems

This book addresses the digitization of all processes and value chains in the tourism, travel, hospitality and catering industries. By exploring the new technological trends it provides a solid basis for analysing the impacts of the Information Communication Technology (ICT) revolution on the tourism industry. The book adopts a strategic management and marketing perspective for tourism enterprises and destinations. It suggests that ETourism revolutionizes all business processes, the entire value chain as well as the strategic relationships of tourism organizations with all their stakeholders. It additionally focuses on how ICTs are employed in airlines, hotels, travel agencies, tour operators and destinations management organizations. The book demonstrates that tourism ICTs increasingly determine the competitiveness of the organization, and therefore, they are critical for the competitiveness of the industry in the longer term. The book is aimed at advanced undergraduate and postgraduate students in business, tourism and hospitality programmes that need to explore how they can use ICTs in a strategic context. It is also anticipated that researchers and practitioners will find it useful and stimulating. Features and benefits: Strategic perspective demonstrates the contribution of ICTs to the competitiveness of tourism organizations and destinations A wealth of international examples ensure global application and relevance Extensive use of case studies and illustrative examples demonstrate the link between theory and real world tourism situations Discussion topics encourage students to analyse further the information covered Extensive bibliography and further reading encourage more advanced study Associated website featuring up-to-date FT articles and power point slides create a comprehensive teaching and learning package. Dr Dimitrios Buhalis is Course Leader of the MSc in eTourism and Director of the Centre for eTourism Research (CeTR) at the University of Surrey. He is also Adjunct Professor at the Institut de Management Hotelier International (Cornell University - ESSEC Business School) in Paris. He serves as Vice President of the International Federation of Information Technology and Tourism (IFITT) and has chaired several ENTER conferences. He regularly works as adviser for the World Tourism Organisation, the World Tourism and Travel Council and the European Commission.
