For courses in Introduction to Educational Psychology. Long recognized as very applied and practical, Eggen and Kauchak's Educational Psychology: Windows on Classrooms, seventh edition is now even more applied and concise, giving students exactly what they need to know in the course. The author's hallmark cases remain, in both written and videotape format, to introduce real-world applications in a way that no other text can. Along with

expanded applications to diversity (urban, suburban, and rural areas), technology, and a new pedagogical system that completely restructures how information is delivered in the book and will help students really understand what they should be getting out of every single chapter. The text now comes with two new DVDs of video material and an access code for the new Teacher Prep Website that will be automatically shrinkwrapped with all new copies of the text. Educational Psychology: Windows on Classrooms once again truly fulfills the promise of its title, giving students a window on the classrooms in which they will someday teach.

This substantially revised Fourth Edition represents one of the most up-to-date, research-based methods texts available today. This text has two specific goals: to change how teachers think about teaching and to change how they actually teach. Solidly grounded in research, the text describes practical methods in a clear, readable manner with numerous case examples and offers suggestions for applying those methods in today's diverse school environments. Kauchak and Eggen organize their discussion around three important themes in education: diversity, motivation, and technology.

"Welcome to the eleventh edition of our text. As in all fields, educational psychology rapidly advances, and our goal in this edition is to capitalize on these advances to produce a book that meets three goals: to provide the most conceptually sound theory possible, to include up-to-date research, and to prepare a text that provides the most concrete and specific suggestions in the field for applying the content of Educational Psychology in PreK-12 classrooms. Upon the advice of Kevin Davis, our editor,

to reflect the third goal and symbolize an essential thrust of our text, we have changed its name to Using Educational Psychology in Teaching. Many students can describe and explain the topics included in an educational psychology text, but far fewer know how, as teachers, to apply these topics to increase their students' learning. We attempt to reach our third goal above in several ways. First, we introduce each chapter with a case study in which a teacher is applying the content of the chapter to increase student learning and development. We then integrate the case studies throughout the chapters in attempts to make the content of each meaningful for readers and further illustrate how educational psychology can be used in teaching to increase student learning. We expand on this process by including one or more sections in each chapter titled "Using Educational Psychology in Teaching: Suggestions for Applying . . . with Your Students." In these sections we include specific suggestions for applying, for instance, Vygotsky's theory of cognitive development, social-emotional learning, culturally responsive teaching, universal design for learning, social constructivist views of learning, theories of motivation, formative assessment, and so on, in classrooms. We then illustrate each of these suggestions with concrete examples taken from the real world of PreK-12 teaching. As a further illustration, the video episodes on which the case studies integrated throughout chapters 2, 9, 11, 13, and 14 are based are included with the MyLab Education component that accompanies this text. These episodes show the actual classroom lessons and provide students with authentic, real-world insights into learning and teaching, and they will hopefully make the written case studies and chapter content more

meaningful for readers. In addition to these specific suggestions we include Classroom Connections, which provide additional suggestions for applying the content of each section at the elementary, middle school, and high school levels, and we include Developmentally Appropriate Practice sections in each chapter that offer suggestions for adapting the content for different developmental levels. Also, in each chapter we include two, three, or four Application Exercises, placed throughout the chapter, that ask readers to apply the chapter content to the real world of teaching. A total of 47 exercises are included in the book's 15 chapters, 38 of which are based on video episodes of approximately five minutes or less, leaving 9 that are based on written case studies. Feedback for all the Application Exercises is included. In the eText we include Video Examples, ranging from approximately 40 seconds to 2 minutes in length, that provide brief, concrete illustrations of the chapter content. The Video Examples are placed next to the topics they illustrate"--

Educational Psychology: Windows on Classrooms is the most applied book in the field. If you're looking for a book that gives you a sound theoretical and research-based foundation and then provides specific and concrete illustrations and guidelines for applying this theory and research with your students, this is the book for you. The book uses an integrated-case approach, with integrated being the key idea. Each chapter begins with a case study taken from actual classroom practice. But, unlike other books described as case-based, instead of stopping there, Eggen and Kauchak then weave the case throughout each chapter—extracting specific illustrations from it, and in some instances taking dialogue directly from the case—to illustrate classroom applications of the theory and research. Eggen and Kauchak include many other concrete examples, taken both from classrooms and from daily living, to illustrate the content of each chapter. The combination of these applications is what makes the book unique.

This revised and expanded second edition of *Created to Learn*—an ECPA Gold Medallion Award finalist—shows teachers how to organize and tailor classroom instruction to fit the learning styles of their students. In a real sense, author William R. Yount takes the theories of teaching and learning and brings them to life inside the classroom. Additional content in this updated edition includes:

- More information on new research into learning theories, including discoveries in the field of neuroscience that provide far more detail about brain function.
- New chapters on Constructivism and brain-based learning.
- Updated research from Yount's teaching experiences in other countries.
- Full rewrite of original text, condensing material that has moved into other books, removing data found to be less helpful, and adding research that provides support for evolving ideas about cognitive and humanistic learning theory systems, designing instructional objectives, and the revolution in brain science.
