Growth IQ Paragon Publishing

A WALL STREET JOURNAL BESTSELLER Do you know the best way to drive your company's growth? If not, it's time to boost your Growth IQ. Trying to find the one right move that will improve your business's performance can feel overwhelming. But, as you'll discover in *Growth IQ*, there are just ten simple—but easily misunderstood—paths to growth, and every successful growth strategy can be boiled down to picking the right combination and sequence of these paths for your current context. Tiffani Bova travels around the world helping companies solve their most vexing problem: how to keep growing in the face of stiff competition and a fast-changing business environment. Whether she's presenting to a Fortune 500 board of directors or brainstorming over coffee with a startup founder, Bova cuts through the clutter and confusion that surround growth. Now, she draws on her decades of experience and more than thirty fascinating, in-depth business stories to demonstrate the opportunities—and pitfalls—of each of the ten growth paths, how they work together, and how they apply to business today. You'll see how, for instance: \* Red Bull broke Coca-Cola and PepsiCo's stranglehold on the soft drink market by taking the Customer

Base Penetration path to establish a foothold with adventure sports junkies and expand into the mainstream. \* Marvel transformed itself from a struggling comic book publisher into a global entertainment behemoth by using a Customer and Product Diversification strategy and shifting their focus from comic books to comic book characters in movies. \* Starbucks suffered a brand crisis when they overwhelmed their customers with a Product Expansion strategy, and brought back CEO Howard Schultz to course-correct by returning to the Customer Experience path. Through Bova's insightful analyses of these and many other case studies, you'll see why it can be a mistake to imitate strategies that worked for your competitors, or rely on strategies that worked for you in the past. To grow your company with confidence, you first need to grow your Growth IQ. *Yearbook of International Organizations 2013-2014 (Volumes 1A-1B)* UCL Institute of Education Press (University College London Institute of Education Press)

This book prescribes rapid revolution in principal sectors of this African economy through radical paradigm changes. And the resultant comprehensive transformation will guarantee significantly higher productivities and double digit annual economic growth. Included in this paradigm shift is the joint reindustrialization of the African economy and the US ailing industries via a new Strategic trans-Atlantic Alliance modeled on the balanced Euro-US cooperation after World War II. But it first takes readers through a thorough evaluation of the familiar subject - corruption - which haunts Nigeria, the principal economy in the continent. The fundamental difference with other texts on the subject is that this book identifies the most debilitating variant of that corruption. That variant causes massive capital flight from a post-colonial "soft economy" that is neither capitalist nor socialist. The Nigerian corruption thrives on the native Philosophy of Commission hardened by intractable "tribalism" that coagulated and ossified with the imports substitution pattern preferred by European firms since independence. The book then proceeds to earn its priced revolutionary credential by inventing very novel scientific methods that will skillfully turn this insidious source of structural rigidity and arrested development into a force for economic growth. A new apex political leadership culture is recommended and to be fortified with a unifying lingua franca. An inter-ethnic marriage melting-pot is advised for intensified nigerianization of Nigerian youths at birth. Spiritual diversity is envisaged to significantly diminish religious intolerance and sectarian violence. Modern bureaucracy and inward-looking tourism are reformulated to reduce effervescent insecurity and minimize capital flight. The resultant economic stability will enlarge domestic/foreign investment inflow; and will reverse the current dis-industrialization, and massive job loss, and the conditions of under-full employment. Technological Functionalism,

Economic pan-Africanism, and the Alternative Policy of Inputs Substitution are among the several brand new blueprints that this book offers for the extensive transformation of Africa's economy into the robust emerging economy that will rival its counterparts in India and China in the immediate future.

In this lively and provocative book, Erica De Bruin looks at the threats that rulers face from their own armed forces. Can they make their regimes impervious to coups? How to Prevent Coups d'État shows that how leaders organize their coercive institutions has a profound effect on the survival of their regimes. When rulers use presidential guards, militarized police, and militia to counterbalance the regular military, efforts to oust them from power via coups d'état are less likely to succeed. Even as counterbalancing helps to prevent successful interventions, however, the resentment that it generates within the regular military can provoke new coup attempts. And because counterbalancing changes how soldiers and police perceive the costs and benefits of a successful overthrow, it can create incentives for protracted fighting that result in the escalation of a coup into full-blown civil war. Drawing on an original dataset of state security forces in 110 countries over a span of fifty years, as well as case studies of coup attempts in Asia, Africa, Latin America, and the Middle East, De Bruin sheds light on how counterbalancing affects regime survival. Understanding the dynamics of counterbalancing, she shows, can help analysts predict when coups will occur, whether they will succeed, and how violent they are likely to be. The arguments and evidence in this book suggest that while counterbalancing may prevent successful coups, it is a risky strategy to pursue—and one that may weaken regimes in the long term.

During the 2016 presidential election, America's election infrastructure was targeted by actors sponsored by the Russian government. *Securing the Vote: Protecting American Democracy* examines the challenges arising out of the 2016 federal election, assesses current technology and standards for voting, and recommends steps that the federal government, state and local governments, election administrators, and vendors of voting technology should take to improve the security of election infrastructure. Recent events in Mali, Libya, Syria, Afghanistan, Iraq, and elsewhere demonstrate that building professional indigenous forces is imperative to regional stability, yet few success stories exist. Liberia is a qualified "success," and this study explores how it was achieved by the program's chief architect. Liberia suffered

a 14-year civil war replete with human rights atrocities that killed 250,000 people and displaced a third of its population. Following President Charles Taylor's exile in 2003, the U.S. contracted DynCorp International to demobilize and rebuild the Armed Forces of Liberia and its Ministry of Defense; the first time in 150 years that one sovereign nation hired a private company to raise another sovereign nation's military. This monograph explores the theory and practice behind the successful disarmament, demobilization, and reintegration (DDR) of the legacy military and security sector reform (SSR) that built the new one.

Fisheries in the Pacific: The Challenges of Governance and Sustainability is a multidisciplinary book, which examines various aspects of coastal and oceanic fisheries in Pacific waters. These interrelated fisheries sectors are critical for regional food security and also represent a reserve of food resources for the rest of the world. The introduction and eight chapters highlight that both these sectors raise major economic and ecological issues while revealing significant social changes, political asymmetries and alliances, geostrategic rationales, developments in legislation, customary dynamics, and conservation challenges. Through complementary approaches and interpretations of both quantitative and qualitative data, this book aims to contribute to a better understanding of the current situation of fisheries in the Pacific. It also responds to the compelling need to establish a constructive and ongoing dialogue on the matter between social scientists and environmental scientists, based in Europe and in the Pacific Islands, and between these experts and the various stakeholders and policy-making institutions involved in the Pacific region.

Southern Mindanao became the battleground of two major rebellions in the 1970s: one sought to create a separate Muslim state, and the other—a communist insurgency—sought to overthrow the Philippine state. Standard explanations of these rebellions point to the explosive combination of historic ethnic disputes, massive demographic changes accompanying the closure of the frontier, rising class inequalities, the entry of transnational capital, and the militarization of southern Mindanao. While not denying explanatory value to these arguments, this book rejects ethnicity and political economy as the dominant causes. Making Mindanao argues that colonial construction of the state and its subsequent transformation from the colonial to the post colonial period largely shaped Mindanao's political landscape. The book thus focuses on how local power was determined by state formation and how the state's ability to establish its authority was mediated by mutual accommodation between strong men who controlled this frontier zone. It compares Cotabato and Davao to show the process of state formation and the shaping of local power from the American period (1900-1941) to the eye of the declaration of martial law by Ferdinand Marcos (1946-1972).

WITNESS TO WAR is an eye-opening retelling of the war experience through the private diaries kept by people from all walks of life and from many countries. The twentieth century's Second World War announced its arrival from a distance, and as early as spring 1938 city-dwellers across Europe expected destruction on an epic scale. Men, women and children, most of whom had never kept a diary before, began to chronicle their own responses to what they knew would be a unique moment in world history. The cast of characters represented in these diaries - more than three hundred in number - ranges from politicians, soldiers and spies to ordinary citizens and housewives, from a London schoolboy watching V-1 doodlebugs from his bedroom window to an interned German refugee robbed and beaten by British troops. Many others are famous, and this collection includes rare material from figures such as Joseph Goebbels, Joyce Grenfell, Jean-Paul Sartre, Evelyn Waugh and Noël Coward. It also contains the insights of many who were close to Winston Churchill and Adolf Hitler. Most of these diaries involved a degree of danger and secrecy. In occupied Europe a captured diary could betray friends and relatives to the enemy. Some were downright illegal, such as those kept by soldiers on the front line. More than half a century after the end of the war, these hidden treasures - the voices of the past - are still being unearthed. Many of these accounts languished unread, unpublished and gathering dust in scholarly archives around the world. Richard Aldrich has devoted two decades to sustained research in more than a dozen countries. This is war at first hand described in the most immediate terms, not mediated through the voice of peripheral observers or shaded by fading memory or political allegiances.
