In the twelfth century, a French poet wrote a verse romance about a young knight who witnesses a mysterious procession centered on a radiant vessel, a "grail." Left unfinished, the poem inspired other writers of prose and verse, until the story was completely rewritten into the Arthurian romances, in which the vessel becomes a relic of the Last Supper, the Holy Grail. For hundreds of years, the Grail story has haunted the western imagination. But the original medieval texts are full of inconsistencies, as different writers attempted to complete

the story in varied ways. This encyclopedia illuminates a path through the Perilous Forest of literature and legend. Entries summarize the stories of the principal characters, sacred objects and places associated with the Grail. An Afterword shows how mysteries of the grail continue to enchant the scholars and creative writers who have transformed the medieval legend into modern mythology. *Worldmark Encyclopedia of the Nations: Americas* BoD - Books on Demand New, updated, and revised to include new discoveries about the use of weapons in ancient China, upheavals in Lebanon, the winding down of the Soviet-Afghanistan war, the invasions of Grenada and Panama by U.S. forces, the war in the Persian Gulf, and the collapse of the Soviet and Eastern European Communist governments.

This set of six volumes provides a systematic and standardized description of 23,033 chemical components isolated from 6,926 medicinal plants, collected from 5,535 books/articles published in Chinese and international journals. It includes a name list of medicinal plants from which the chemical component was isolated. Furthermore, abundant pharmacological data for nearly 8,000 chemical components are presented, including experimental method, experimental animal, cell type, quantitative data, as well as control compound data.
