Modern breakthroughs in neuroscience and mind-body psychology now offer an alternative approach to the classic systems of acting. So much more is now known about how the brain visualizes, imagines and remembers; neurochemical processes are much faster and more fluid than earlier acting teachers could possibly have realized. Acting with Passion draws heavily on the world of mind-body psychology, primarily the work of Wilhelm Reich and Alexander Lowen. Their theories – that the release of chronic muscular tension can be accompanied by the release of emotions – offer actors the keys to demonstrating emotion on cue. Through a series of physical exercises, actors learn to access feelings through the body rather than the mind. Beginning with the body as 'the instrument', Acting with Passion leads actors through a series of physical exercises combining movement, tactile exploration and vocal release. Once physical blocks are removed, the actor then uses memorized text to place the feelings where they belong. Written with her characteristic verve and accessibility, and using practical exercises to guide the actor through each stage, Acting With Passion is the result of Niki Flaks's popular acting workshops.

Singing in Style Bloomington : Indiana University Press

Over the past twenty-five years Europe and North America have witnessed an enormous revival of interest in early music. Since the late 1950s numerous professional and amateur ensembles have delighted audiences with the vocal and instrumental music of the twelfth to the sixteenth centuries, while scholars have addressed themselves to the many problems involved in its authentic re-creation. This book unites the two fields; it is both a summary of the most recent scholarly investigations into the subject and a practical guide to the performance of early music based on the experience of the author and others who have performed a sizable portion of the early repertory. McGee lays out clearly the foundation and background of each of the performance problems, presenting the most recent research and pointing out areas of incomplete knowledge and controversy, and then introduces practical solutions based on the scholarship. All the topics necessary for a historical performance of early music are discussed: tempo, rhythmic flow, instrumentation, ornamentation, articulation, improvisation, style, and singing technique, along with some practical hints for selecting a program and choosing substitute instruments. The final chapters is a reference guide to modern editions of the music and an introduction to the scholarly literature on early music performances. At the time of publication, this book was the first to address the problem of how to perform medieval and Renaissance music. It is intended for both the amateur performing musician and the serious student.
