Advances in Corporate Branding Springer

This prestigious edited collection of articles from the Journal of Brand Management discusses the impact of research on our understanding of corporate brand characteristics and corporate brand management to date. A wide range of topics are covered, including franchise brand management, co-creation of corporate brands, alliance brands, the role of internal branding in the delivery of employee brand promise, and the expansion into new approaches. *Advances in Corporate Branding* is essential reading for those undertaking a PhD programme or by upper level students looking for rigorous academic material on the subject and for scholars and discerning practitioners, acting as 'advanced introductions'.

Green Fashion Retail Springer

The first volume in the Palgrave Studies in Practice: Global Fashion Brand Management series, this book provides a comprehensive view on the internationalization of fashion brands, offering unique academic and managerial insights into how fashion brands in diverse sizes can build and sustain their businesses in competitive global marketplaces. It explores the theories and trends occurring within the fashion industry, one of the most active sectors of internationalization. The majority of global fashion brands operate beyond their home countries, yet not much is known about the ventures that generate more than half of their revenues. This book takes a critical look at the global-by-nature fashion industry through a collection of actual cases from multiple countries and cultural backgrounds.

Advances in Advertising Research (Vol. IV) Springer Science & Business Media

Advances in Advertising Research are published by the European Advertising Academy (EAA). This volume is a compilation of research presented at the 11th International Conference in Advertising (ICORIA) which was held in Stockholm (Sweden) in June 2012. The conference gathered 150

leading researchers from 22 countries under the conference theme "The changing roles of advertising". The book provides international state-of-the-art research with 30 articles by renowned scholars from the worldwide ICORIA network.

Segmentation in Social Marketing Springer

This book focuses on sustainability in fashion retail, which is fast becoming the pivot point of future fashion retail strategies. Chapters in the book provide theoretical and practical insight on how going green may positively influence the strategy of fashion retailers and marketers, who have to react to the changing society and customer needs. Structured in four main parts, and based on distinct research questions, readers will be able to dig deep into the individual levers for possible adaptations. It thus provides a solid understanding on how to integrate green aspects into any fashion retailers business model.

Fashion Brand Internationalization Springer

This book compiles brand new case studies on the intricacies and market entry strategies of different companies in China. The sheer speed and scope of China's growth makes it unique and investment opportunities are very attractive. Despite the potential, many western companies fail in their market entry strategies. This book traces the major sources of failure and uses cases to illustrate how firms can better cope with the challenging Chinese market. With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

Ethics and Neuromarketing Springer

This book brings together current innovative methods and approaches to segmentation and outlines why segmentation is needed to support more effective social marketing program design. It presents a variety of segmentation approaches alongside case studies of their application in various social marketing contexts. The book extends the use of segmentation in social marketing, which will ultimately lead to more effective and better-tailored programs that deliver change for the better. As such, it offers a detailed handbook on how to conduct state-of-the-art segmentation,

and provides a valuable resource for academics, social marketers, educators, and advanced students alike.

Market Entry in China Springer

This book addresses the emerging field of neuromarketing, which, at its core, aims to better understand the impact of marketing stimuli by observing and interpreting human emotions. It includes contributions from leading researchers and practitioners, venturing beyond the tactics and strategies of neuromarketing to consider the ethical implications of applying powerful tools for data collection. The rationale behind neuromarketing is that human decision-making is not primarily a conscious process. Instead, there is increasing evidence that the willingness to buy products and services is an emotional process where the brain uses short cuts to accelerate the decision-making process. At the intersection of economics, neuroscience, consumer behavior, and cognitive psychology, neuromarketing focuses on which emotions are relevant in human decision-making, and uses this knowledge to make marketing more effective. The knowledge is applied in product design; enhancing promotions and advertising, pricing, professional services, and store design; and improving the consumer experience as a whole. The foundation for all of this activity is data gathering and analysis. Like many new processes and innovations, much of neuromarketing is operating far ahead of current governmental compliance and regulation and thus current practices are raising ethical issues. For example, facial recognition software, used to monitor and detect a wide range of micro-expressions, has been tested at several airports—under the guise of security and counterterrorism. To what extent is it acceptable to screen the entire population using these powerful and intrusive techniques without getting passengers' consent? Citing numerous examples from the public and private sectors, the editors and contributing authors argue that while the United States has catalyzed technological advancements, European companies and governments are more progressive when it comes to defining ethical parameters and developing policies. This book details many of those efforts, and offers rational, constructive approaches to laying an ethical foundation for neuromarketing efforts.
