Advances in Fatigue Science and Technology Springer Science & Business Media
 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS)* at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 39 (thesis year 1994) a total of 13,953 thesis titles from 21 Canadian and 159 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 39 reports theses submitted in 1994, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Rapport de la cinquième Consultation technique du Conseil général des pêches pour la Méditerranée sur l'évaluation des stocks dans l'Adriatique et la mer Ionienne BRILL

Ai servizi e agli operatori addetti alla prevenzione e alla cura delle dipendenze si richiede oggi un approccio razionale, sempre più improntato alla ricerca della qualità. I professionisti del settore devono quindi perfezionare gli strumenti di gestione, dichiarando in modo chiaro i loro obiettivi, sottoponendosi ai criteri di accreditamento, verificando i risultati ottenuti, ecc. È pertanto utile una guida adeguata a questo nuovo approccio alla terapia delle tossicodipendenze.

Challenged Justice: In Pursuit of Judicial Independence Springer Science & Business Media

L'Évaluation de l'Enseignement par les Étudiants (EEE) a progressivement acquis droit de cité dans les universités, malgré les nombreuses résistances qui se sont manifestées à son égard. La situation actuelle de ce type d'évaluation est cependant paradoxale à plus d'un titre. En effet, on dispose désormais d'études nombreuses qui, tout à la fois, confirment la validité et la pertinence de cette forme d'évaluation, mais en pointent aussi les limites, ces dernières rendant notamment nécessaire le recours à d'autres sources complémentaires d'évaluation de l'enseignement. Ces mêmes études identifient les balises à apporter à l'EEE pour la rendre efficace, mais aussi conforme aux valeurs universitaires : respect des spécificités disciplinaires et des contextes, nécessité de suivi ultérieur, ... Or, un inventaire succinct des pratiques les plus courantes d'évaluation de l'enseignement par les étudiants montre que ces précautions et balises, pourtant largement documentées et admises, sont en définitive peu mises en œuvre au sein des dispositifs réels. Ceux-ci ont même tendance à se rabattre sur des formes stéréotypées d'EEE, voire à se limiter à des passations purement administratives de questionnaires standardisés sans que personne ne se soucie ni de leurs effets ni de leurs suivis. C'est autour de cette contradiction apparente et de cet étrange écart entre la richesse des réflexions et la stéréotypie des pratiques que s'est construit un séminaire de travail qui

a rassemblé quatorze spécialistes de l'évaluation de l'enseignement par les étudiants. Le présent ouvrage est le fruit à la fois des présentations qui ont été faites par chaque participant à ce séminaire et des discussions collectives qu'elles n'ont pas manqué de provoquer.

L'evaluation de la qualite des proteines. Rapport Edicions Universitat Barcelona

This book constitutes the thoroughly refereed post-proceedings of the seven workshops and the PhD Symposium that were co-located with the 13th International Conference on Web Engineering, ICWE 2013, held in Aalborg, Denmark, in July 2013. The papers cover research in topics such as social data management; cloud service engineering; agile web development and quality management in web engineering.

Hacia un mejor entorno escolar Springer

Legal academics in Europe publish a wide variety of materials including books, articles and essays, in an assortment of languages, and for a diverse readership. As a consequence, this variety can pose a problem for the evaluation of academic legal research. This thought-provoking book offers an overview of the legal and policy norms, methods and criteria applied in the evaluation of academic legal research, from a comparative perspective.

Proceedings of the Ninth International Conference on Dependability and Complex Systems DepCoS-RELCOMEX. June 30 - July 4, 2014, Brunów, Poland De Boeck Supérieur

"Roma Tre Law Review" is a law review sponsored by the Department of Law of the University of Roma Tre. It is not focused on a specific topic or a set of issues, but it is aimed at surveying transversally - and from an interdisciplinary perspective - the national and trans-national legal landscape. Its main aim is to promote the diffusion of the Italian legal culture, and namely the type of scholarship produced at Roma Tre, abroad, as well as to investigate the development of the law in several fields and places from an Italian and European viewpoint. Accordingly, the review will host contributions ideally characterized by a specific set of features, and namely by their openness to comparative, historical, and interdisciplinary perspectives on all legal issues of not strictly local concern.

Valutare la qualità percepita. Uno studio pilota per gli hospice/Evaluation of perceived quality.

Hospice: a pilot study Springer Science & Business Media

The book offers articles by senior jurists on important aspects of judicial independence and judicial process in many jurisdictions, including indicators of justice. It comes at the time of serious challenges to the judiciary, the rule of law and democracy.

Innovations in Smart Cities Applications Volume 4 Routledge

This book aims at capitalizing and transmitting know-how about the design of Augmented Environments (AE) from some of the most prominent laboratories in the field worldwide. The authors belong to the RUFAC network (Research on User-Friendly Augmented Environments, founded in 2002) who meet in research seminars to share experience; Writing this book was perceived as an opportunity to look back over the last few years to sum up important findings; and formalize their approach and experience, which they never had the time or opportunity to do. Although the authors of this book have very different backgrounds, striking similarities emerge in their approach and design principles: never-endingness, activity-orientedness, continuous design, realism are some of the pillars of this approach; enabling to deal with the complex, heterogeneous, multi-user and multi-purpose constructions which AE designers have to face. The book illustrates how these principles enabled them to construct robust, efficient, and user-friendly Augmented Environments in spite of the many challenges to make these operational. We hope their experience will help the reader. Primary audience: Academics, Students and Professionals involved in the CHI, CSCW, Ubicomp, Cooperative Building communities. Computer Scientists interested by end-users and applications, Social Scientists operating in the IT domain, IT & Organization Consultants. Secondary audience: Developers of office and conferencing applications or middleware, Architects of office buildings, Space Planners, Designers; Facility Managers; IT, furniture & building Business Communities.

Water for Peace: Water supply technology FrancoAngeli

The monitoring of benthic diatoms, macrophytes, macroinvertebrates and fish will be the backbone of future water management in Europe. This book describes and compares the relevant methodologies and tools, based on a large data set covering rivers in most parts of Europe. The 36 articles presented will provide scientists and water managers with a unique insight into background and application of state-of-the-art monitoring tools and techniques.

Designing User Friendly Augmented Work Environments Springer Science & Business Media 445.17

Current List of Medical Literature Springer Science & Business Media

Il lavoro di ricerca ha come oggetto di studio la valutazione della ricerca universitaria, in un momento in cui il tema della distribuzione delle risorse pubbliche in base a criteri di efficienza e merito è al centro del dibattito politico ed economico. Vengono esaminate e messe a confronto cinque realtà universitarie di paesi europei, al tempo stesso si cerca di evidenziare, attraverso un'indagine campionaria, la percezione dei sistemi di valutazione da parte di ricercatori degli stessi paesi. Lo studio si propone di verificare l'ipotesi che un sistema rigoroso di valutazione della ricerca sia condizione necessaria, ma non sufficiente per produrre un innalzamento qualitativo della ricerca universitaria. Nel nostro paese è imprescindibile un intervento in termini di politiche pubbliche, che valorizzi la ricerca a partire da un più adeguato investimento economico. - The research project focuses on the evaluation of university research, at a moment when a central issue in the political and economic debate is the distribution of public resources based on criteria of efficiency and merit. Five universities in European countries are analyzed and compared, and the perceptions held by the researchers in those countries about evaluation systems are assessed through a survey. The study aims to demonstrate that a rigorous system of research evaluation is a necessary, though insufficient, condition to create an increase in the quality of university research. In our country, what is needed is the enactment of public policies supporting research, beginning with a more adequate economic investment.

Il sistema dei servizi per le dipendenze patologiche. Programmazione, qualità e valutazione Springer

This comprehensive handbook, the first in its field, brings together 106 different contributors. The 38 interrelated but at the same time independent chapters discuss key areas including conceptual frameworks; empirically grounded constructs; intervention strategies and tactics; social systems; designs, assessment, and analysis; cross-cutting professional issues; and contemporary intersections with related fields such as violence prevention and HIV/AIDS.

Edward Elgar Publishing

Land Degradation and Desertification: Assessment, Mitigation, and Remediation reports research results in sustainable land management and land degradation status and mitigation in 36 countries around the world. It includes background papers with continental and international perspectives dealing with land degradation and desertification studies. The book assembles various topics of interest for a large audience. They include carbon sequestration and stocks, modern techniques to trace the trends of land degradation, traditional and modern approaches of resource-base conservation, soil fertility management, reforestation, rangeland rehabilitation, land use planning, GIS techniques in desertification risk cartography, participatory ecosystem management, policy analyses and possible plans for action. Various climatic domains in Africa, Asia, Europe and The Americas are covered. The book will be of interest to a variety of environmental scientists, agronomists, national and international policy makers and a number of organizations dealing with sustainable management of natural resources.

Quarterly Review of Distance Education Roma TrE-Press

Now in its second decade of publication, this landmark series draws together and critically reviews all the existing research in specific areas of nursing practice, nursing care delivery, nursing education, and the professional aspects of nursing. Volume 17 focuses on focus on complementary health and pain management and includes chapters by Mariah Snyder, Susan E. Auvil-Novak, Donna L. Algase, Beverly J. McElmurry, and Merle H. Mishel.

Evaluating Academic Legal Research in Europe FrancoAngeli

Social Influence, Power, and Multimodal Communication reveals how democratic leaders and dictators exploit multimodal communication to convince or seduce their audiences, using words, voice, gesture, face, gaze, and posture to boast about their merits or insult and ridicule rivals. Poggi and D'Errico explore questions such as what is charisma, and how do we perceive it in a leader? And

how do politicians display their dominance over opponents, or discredit them in TV debates and social media? Starting from a sociocognitive model of social interaction, observational studies reveal the rhetoric of words, hands, and faces, explaining how to see beyond their literal meanings, while experimental studies test their uses and persuasive effects. The authors affirm that multimodality helps others to influence us through displays of dominance, and by undermining our power through comments, insults, irony, ridicule, and parody. The devices of social influence and its multimodal management are illuminated, giving readers insight into how people influence others' lives by using body language and verbal communication, either explicitly or in subtle but inexorable ways. This fascinating text is a superb resource for students of psychology, communication, pragmatics, and political sciences, as well as for school teachers, politicians, spin doctors, active citizenship workers, and anyone seeking to understand how communicative power is managed, both in politics and everyday social contexts.

The Ecological Status of European Rivers: Evaluation and Intercalibration of Assessment Methods Springer Nature

This book examines very important issues in research evaluation in the Social Sciences and Humanities. It is based on recent experiences carried out in Italy (2011-2015) in the fields of research assessment, peer review, journal classification, and construction of indicators, and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities. Several chapters analyse original data made available through research assessment exercises. Other chapters are the result of dedicated and independent research carried out in 2014-2015 aimed at addressing some of the debated and open issues, for example in the evaluation of books, the use of Library Catalog Analysis or Google Scholar, the definition of research quality criteria on internationalization, as well as opening the way to innovative indicators. The book is therefore a timely and important contribution to the international debate.

Integrated Groundwater Management IAP

In one of its previous books, the EMES European Research Network traced the most significant developments in 'social entrepreneurship' emerging inside the third sector in Europe. Building upon that seminal work, this volume presents the results of an extensive research project carried out over a four-year period of a comparative analysis of 160 social enterprises across eleven EU countries. It breaks new ground in both its articulation of multidisciplinary theoretical frameworks and its rigorous analysis of empirical evidence based on a homogenized data collection methodology. Looking at work intergration, it is structured around a number of key themes (multiple goals and multiple stakeholders, multiple resources, trajectories of workers, public policies) developed through a transversal European analysis, and is illustrated with short country experiences that reflect the diversity of welfare models across Europe. With contributions from an impressive list of academics, all members of the EMES European Research Network, this rich follow-up volume to *The Emergence of Social Enterprise* is essential reading for academics, researchers and students in the fields of the third sector and social policies.

The critical review, or annals of literature Springer Science & Business Media

This volume contains the edited version of lectures and selected research contributions presented at the NATO ADVANCED STUDY INSTITUTE ON ADVANCES IN FATIGUE SCIENCE AND TECHNOLOGY. held in Alvor. Portugal, 4th to 15th of April 1988. and organized by CEMUL - Center of Mechanics and Materials of The Technical University of Lisbon. The Institute was attended by 101 participants, including 15 lecturers. from 14 countries. The participants were leading scientists and engineers from universities, research institutions and industry. and also Ph.D~ students. Some participants presented papers during the Institute reporting the state-of-art of their research projects. All the sessions we'l'e very active and quite extensive discussions on scientific aspects took place during the Institute. The Advanced Study Institute provided a forum for interaction among eminent scientists and engineers. from different schools of thought and young researchers. The Institute addressed the foundations and current state of the art of essential aspects related to fatigue science and technology, namely: Short Cracks, Metallurgical Aspects, Environmental Fatigue, Threshold Behaviour, Notch Behaviour. Creep and Fatigue Interactions at High Temperature, Multiaxial Fatigue, Low Cycle Fatigue, Methodology of Fatigue Testing, Variable Amplitude Fatigue, Fatigue of Advanced Materials. Elastic-Plastic Fatigue, and several engineering applications such as welded joints, energy systems, offshore structures, automotive industry, machine and engine components. This book is organized in three parts: Part I: Fundamentals of Fatigue Part II: Engineering Applications Part III: Research Contributions The research contributions covered most of the areas referred above.
