Part of the Pittsburgh Critical Care series, Continuous Renal Replacement Therapy provides concise, evidence-based, bedside guidance about this treatment modality, offering quick reference answers to clinicians' questions about treatments and situations encountered in daily practice. Continuous Renal Replacement Therapy - Google Books Abstract. Continuous renal replacement therapy (CRRT) is commonly used to provide renal support for critically ill patients with acute kidney injury, particularly patients who are hemodynamically unstable. A variety of techniques that differ in their mode of solute clearance may be used, including continuous venovenous hemofiltration with predominantly convective solute clearance, continuous venovenous hemodialysis with predominantly diffusive solute clearance, and continuous venovenous ...Continuous Renal Replacement Therapy: Who, When, Why, and How Continuous renal-replacement therapy for acute kidney injury. with mortality rates of 30% to 70%. Timing of initiation of dialysis in critically ill patients with acute kidney injury. Adding a dialysis dose to continuous hemofiltration increases survival in patients with acute renal failure.
