"This volume addresses the religious, sociocultural, and political context of colonial society. Sor Juana lived in a convent, a community of women whose lives were strictly regulated by the rules of their order (in her case, the Hieronymites). She was subject to the authority of the bishop and other clerics. She lived in the capital of an enormously wealthy colonized region whose vast territory and many inaccessible rural areas created governance nightmares. She participated in a highly stratified colonial society in which class, race, religion, and gender determined performative behaviors to a great extent. She was subject to a power struggle between the secular and religious arms of government, as well as internecine church conflicts. Her ability to throw off some of the weight of restrictions and limitations on a woman of her temperament, vocation, and family background remains truly remarkable"--Emilie L. Bergmann and Stacey Schlau, Preface, p. xii.

One of a series of environmental education (EE) units intended for use by workshop facilitators who help teachers explore ways to integrate EE techniques and concepts into their teaching. Three strategies are described: offering class-ready activities, developing activities and units that complement existing curriculum content, and using EE to teach process skills such as critical thinking.

The second edition of *Cognitive Therapy in Groups* by Michael Free has been completely rewritten as a 25-session, structured programme of cognitive therapy in five modules. It is designed in

an easy-to-present psycho-educational format that is intended for groups, but can also be used with individuals. It is sufficiently flexible for clinicians to use and adapt the resources for their own practice, and sufficiently specific to be used verbatim with a wide range of people suffering from emotional and behavioural problems. Web-based support resources include assessment tools, handouts and PowerPoint slides.

Selected as a book of the year 2017 by The Times and Sunday Times What is it about Adam and Eve's story that fascinates us? What does it tell us about how our species lives, dies, works or has sex? The mythic tale of Adam and Eve has shaped conceptions of human origins and destiny for centuries. Stemming from a few verses in an ancient book, it became not just the foundation of three major world faiths, but has evolved through art, philosophy and science to serve as the mirror in which we seem to glimpse the whole, long history of our fears and desires. In a quest that begins at the dawn of time, Stephen Greenblatt takes us from ancient Babylonia to the forests of east Africa. We meet evolutionary biologists and fossilised ancestors; we grapple with morality and marriage in Milton's *Paradise Lost*; and we decide if the Fall is the unvarnished truth or fictional allegory.

A pioneering marine biologist takes us down into the deep ocean in this 'thrilling blend of hard science and high adventure' (New York Times) **LONGLISTED FOR THE SNHN NATURAL HISTORY**

BOOK PRIZE Edith Widder grew up determined to become a marine biologist. But after complications from a surgery during college caused her to go temporarily blind, she became fascinated by light as well as the power of optimism. *Below the Edge of Darkness* explores the depths of the planet's oceans as Widder seeks to understand bioluminescence, one of the most important and widely used forms of communication in nature. In the process, she reveals hidden worlds and a dazzling menagerie of behaviours and animals. Alongside Widder, we experience life-and-death equipment malfunctions and witness breakthroughs in technology and understanding, all of it set against a growing awareness of the deteriorating health of our largest and least understood ecosystem. 'A vivid account of ocean life' ROBIN MCKIE, GUARDIAN BOOK OF THE DAY 'Edie's story is one of hardscrabble optimism, two-fisted exploration and groundbreaking research. She's done things I dream of doing' JAMES CAMERON 'A book of marvels, marvellously written' RICHARD DAWKINS
