**DESCRIPTION** The number one benefit of Information Technology is that it empowers people to do what they want to do. It lets people be creative. It lets people be productive. It lets people learn things they didn't think they could learn before, and so in a sense it is all about potential. — Steve Ballmer Information Technology is all about using computers to store, retrieve, access or manipulate information which directly or indirectly affects our daily lives. Information Technology and business today are interwoven in a way that they cannot be talked about in isolation to each other and go hand in hand. Trackpad Information Technology series for Grade IX and X has covered CBSE recommended syllabus to ensure that all

the aspects from previous year are taken up in a continued manner. The series covers the topics with an aim of understanding with practical utilization and simple to learn methodology. There are activities involving brainstorming, which try to induce the readers to apply their learning into practice. The competency-based questions are guided by CBSE, and they ensure that students develop the capability to apply their learning to solve real-life issues that they come across. We would like to humbly acknowledge the support provided by our family, friends and Orange Education Pvt Ltd team to accomplish this noble task. We hope that this book will be used by the students to make their future ready to use Information Technology to the best in

their day-to-day life. Enjoy the journey of happy learning!! All your feedback and suggestions will always be wholeheartedly welcomed to improve and grow. This well-organized book emphasizes the various aspects of science education, viz. the use of computers in science education, software programs, the Internet, e-Learning, multimedia, concept mapping, and action research. It introduces students to the latest trends in the methods of teaching. The book also strives to foster science education

through non-formal approaches, such as distance education with special reference to commonwealth of learning model, or academic games. What distinguishes this text is its emphasis on making the teachers understand that learning students' psychology is the prerequisite for the success of any education programme. Keeping this view in mind, the text explains the well-known theories of learning of Piaget, Ausubel, Bruner and Gagne—which are closely related to science teaching. Primarily intended as a text for the undergraduate students (degree and diploma) of Education (B.Ed. and D.Ed.), this could serve as a source book for in-service teachers and science educators. In addition, curriculum developers and policy makers working in the field of

science education having an abiding faith in moulding youngsters to face the challenges of 21st century should find this book useful and stimulating. KEY FEATURES : Lays emphasis on inculcating values or the development of scientific temper in students. Cites a number of examples related to teaching methods from both urban and rural areas to illustrate the concepts discussed in the text.
