Italian motorcycles have a place in history - and many enthusiasts' hearts - out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati's achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have been thousands. This is partly because there were so many engines available off the shelf - many of them English - as well as a thriving accessory and component industry. A-Z of Italian Motorcycle Manufacturers only deals briefly with the grand marques Ducati and Moto Guzzi because there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles. Design has an increasingly high profile - figures like Philippe Starck are as venerated and well known as more traditional artists. But where the literature on fine art is vast, design is still comparatively ill-served. This encyclopedia provides an account of the still largely unknown story of design.
