Enjoy 365 days of journaling the scriptures to find God's promises. How is a 365-day journal also a three-year journal? Each page in the journal has

room for three separate yearly entries. Start each day (January 1st or whatever day you start this journal) by putting the year (2018, 2019, 2020, etc.) in the provided blank. Go throughout the year, each day reading the suggested scripture and journaling what you feel God is saying to you about that verse. The next year, you'll start over on January 1st filling in the current year. Follow along each day until December 31st. On January 1st of the third year, you'll do the same. Each year on each day, look back at the entry you made the previous year(s) and see how God has spoken to you about His promises each time.

Over the past 50 years the global labour market is transforming from reliable employment to low-wage and unstable informal and precarious jobs. This ineluctable shift is a consequence of the concentrated application of neoliberalism since the 1980s, as capitalism is converting standardised labour markets in the developed Global North into contingent and informal

labour. Platform Labour and Global Logistics: A Research Companion examines the most important developments and features of global logistics and the emergence of the platform economy through historical comparative chapters and case studies. Part I surveys the logistics revolution and its impact on labour in key sectors of the global economy and probes the viability of the platform as a generator of economic and financial growth and innovation. The chapters of Part 1 offer a fulsome analysis and critique of the economic and technical reconfiguration brought on by neoliberal capitalism and the diffusion of the platform and logistics as a feasible model into the future. Part II examines labour restructuring from standardized to informal work through

the platform and information technology, and the political and environmental challenges to labour. Part III provides global case studies on the informal economy through case studies of crucial economies where the platform has become dominant, and Part IV examines how the platform has contributed to geographic mobility and labour migration, and the consequences on workers. Platform Labour and Global Logistics: A Research Companion presents a unique contribution to the political economy literature through highlighting the significance of the impact of the platform and logistics on the working class and potential challenges from labour across the world. This book is intended for academics, researchers and students studying

technological innovation, global supply chains, labour restructuring, and worker resistance.
