A GRAPHIC BIOGRAPHY OF TINTIN'S CREATOR by Jose-Louis Bocquet and Jean-Luc Fromental, Illustrated by Stanislas Barthélémy
The Adventures of Hergé is a biographical comic about the world-renowned comics artist Georges

Prosper Remi, better known by his pen name, Hergé. Meticulously researched, with references to many of the Tintin albums and complete with a bibliography and mini-bios for each of the main "characters," the biography is appropriately drawn in Hergé's iconic clear line style as an homage to the Tintin adventures that have commanded the attention of readers across the world and of

many generations. Seven-year-old Hergé first discovered his love of drawing in 1914 when his mother gave him some crayons to stay out of trouble. He continued drawing in school when he fatefully met the editor of *XXe Siècle* magazine, where Tintin first appeared. His popularity skyrocketed from the 1930s through post-World War Two. Hergé was perceived by some to have aided the Nazi

government in Belgium by continuing to publish Tintin in a government-sanctioned magazine, and he was briefly imprisoned in the aftermath of the war and narrowly escaped execution. Also covered are his marriage troubles in the 1950s and subsequent affair with Fanny Vlamynck, who went on to become his lifelong partner; his late career in the 1960s, as his interest in Tintin waned

and he occasionally "disappeared" for weeks at a time as he contemplated giving up his career to become a fine-arts painter; and a recounting of a humorous encounter with Andy Warhol. The Last Roman BOOM! Studios Isshiki finally reveals his true form and takes the fight to Konoha village! His goal is to implant the Karma on Kawaki once again, but he'll have to find him first.

Aretha Franklin, the Rolling Stones, Ry Cooder, Duane Allman, Arlo Guthrie, and Albert King. With verve and wit, Dickinson (1941-2009) describes his trip to Blind Lemon's grave on the Texas flatlands as a college student and how that encounter inspired his return to Memphis. Back home, he looked up Gus Cannon and Furry Lewis, began staging plays, cofounded what would become the annual Memphis Blues Festival, and started recording. The blues, Elvis, and early rock "n" roll compelled Dickinson to reject racial barriers and spurred his contributions to the Memphis music and experimental art scene. He explains how the family yardman, WDIA, Dewey Phillips, Furry Lewis, Will Shade, and Howlin" Wolf shaped him and recounts how he went on to learn his craft at Sun, Ardent, American, Muscle Shoals, and Criteria studios from master producers Sam Phillips, John Fry, Chips Moman, and Jerry Wexler. Dickinson is a member of the Mississippi Music Hall of Fame and an inaugural inductee of the Memphis Music Hall of Fame. He has received the Lifetime Achievement Award for Engineering and Production from the Americana

Music Association, a Brass Note on the Beale Street Walk of Fame in Memphis, and a Heritage Marker on the Mississippi Blues Trail. This memoir recounts a love affair with Memphis, the blues, and rock "n" roll through Dickinson's captivating blend of intelligence, humor, and candor.

The interdisciplinary field of Astrobiology constitutes a joint arena where provocative discoveries are coalescing concerning,

e.g. the prevalence of exoplanets, the diversity and hardiness of life, and its increasingly likely chances for its emergence. Biologists, astrophysicists, biochemists, geoscientists and space scientists share this exciting mission of revealing the origin and commonality of life in the Universe. The members of the different disciplines are used to their own terminology and technical

language. In the interdisciplinary environment many terms either have redundant meanings or are completely unfamiliar to members of other disciplines. The Encyclopedia of Astrobiology serves as the key to a common understanding. Each new or experienced researcher and graduate student in adjacent fields of astrobiology will appreciate this reference

work in the quest to understand the big picture. The carefully selected group of active researchers contributing to this work and the expert field editors intend for their contributions, from an internationally comprehensive perspective, to accelerate the interdisciplinary advance of astrobiology.
