DECKER HEAVEN

Sailing Made Easy Lin and
Larry Pardey

A fun and exciting guide
to the world of living out
at sea. This book will
teach you what you need

to know in order to live
safely, economically and
cheaply when spending
months at sea. If nothing
else, this book will send
you chasing for your
dreams, whether it be to
take an adventure at sea
or just about anything
else. This is the first of a
four-book series which

begins on the journey that
Lin and Larry Pardey
began 34 years ago in
their self-built 24-foot
engineless cutter,
Seraffyn. In this journey,
we explore places such as
Mexico, Central America,
the Caribbean, and the
Islands of the Atlantic
ocean. Throughout the

book, we learn about people and customs, we learn about the tricks of boating, we learn about survival. This 25th anniversary edition includes a new forward, new appendixes, and a color photo album showing Lin, Larry and the Serraffyn during those months at sea.

Cruising in Serraffyn

American Sailing Sailing Made Easy is the first step in a voyage that will last you the rest of your life. It is a gift from a group of dedicated sailing professionals who have

committed their lives to sharing their art, their skill, and their passion for this wonderful activity. This book, which Sailing Magazine called "best in class" upon its release in 2010, is the most comprehensive education and boating safety learn-to-sail guide to date. It is also the official textbook for the ASA Basic Keelboat Standard (ASA 101). Incorporated in the textbook are useful illustrations and exceptional photographs of complex sailing concepts. The text's most

distinguishing feature is its user friendly "spreads" in which instructional topics are self-contained on opposing pages throughout the book. There are also chapter end quizzes and a glossary to help those new to sailing to navigate their way through the extensive nautical terminology. McGraw Hill Professional SAVE TIME AND MONEY WITH THIS STATE-OF-THE-ART GUIDE TO THE LATEST, MOST ADVANCED DIAGNOSTIC EQUIPMENT AND TECHNIQUES "Ed

Sherman is one of America's great teachers and communicators of marine technology."--Tim Murphy, Executive Editor, Cruising World Whether you are a marine electronics professional or a boatowner, Advanced Marine Electrics and Electronics Troubleshooting helps you understand the new, more powerful methods of troubleshooting marine electrical and electronic

systems. A modern boat's sophisticated installations and networked electronics can stretch the traditional diagnostic methods based on trouble lights and multimeters past their useful limits. This book will show you how to: Use microprocessor-based diagnostic tools and techniques from the automotive and communications sectors, adapted for boats for the

first time Diagnose the most difficult AC and DC problems Protect communications and navigation electronics from interference and lightning Seek out and eliminate stray-current sources and galvanic corrosion
