Since 1787, constituent assemblies have shaped politics. This book provides a comparative, theoretical framework for understanding them.

Permanently Online, Permanently Connected establishes the conceptual grounds needed for a solid understanding of the permanently online/permanently connected phenomenon, its causes and consequences, and its applied implications. Due to the diffusion of mobile devices, the ways people communicate and interact with each other and use electronic media have changed substantially within a short period of time. This megatrend comes with fundamental challenges to communication, both theoretical and empirical. The book offers a compendium of perspectives and theoretical approaches from leading thinkers in the field to empower communication scholars to

develop this research systematically, exhaustively, and quickly. It is essential reading for media and communication scholars and students studying new media, media effects, and communication theory.

This is the third book by Professor Franz Ruppert to be translated into English. In it he explores the relationship between our symbiotic interconnectedness and our ability to be autonomous in our lives. The relationship between these two aspects of being is absolutely influenced by early attachment trauma, what Ruppert has termed 'symbiotic trauma': the trauma of an infant attempting to connect with a mother who is herself already traumatised. Additionally Ruppert gives a detailed account of the 'Constellation of the Intention', the process he has devised for working with the psychological splits induced by trauma. This is a particular form of constellation that addresses issues of fragmentation. For those interested in trauma, and understanding how to work with it, this is truly groundbreaking work. Ruppert's thinking draws on many historical roots but is, even so, particularly unique. It takes us outside our normal ways of thinking about trauma,

attachment and what it means to be a human being.

Leadership styles in comparison. Effects of the three classic leadership styles as well as transactional and transformational leadership Oxford University Press

Zwischen der Einführung der Antibabypille in den 1960er Jahren und der aktuellen Diskussion um Social Freezing, Drei-Eltern-Kinder und Leihmutterchaft verschiebt sich die Wahrnehmung der Schwangerschaft: Individuelle Lebensentwürfe und gesellschaftliche Debatten rund um die Vereinbarkeit von Familie und Beruf bestimmen den Diskurs über sie ebenso wie medizinethische und biopolitische Überlegungen. Viele Menschen wünschen sich heute einen vermeintlich ganz ihren individuellen Lebensbedingungen angepassten Umgang mit der Kinderfrage und sind sich dabei gleichzeitig der Performativität ihres Körpers in seinen reproduktiven Eigenschaften sehr bewusst: Oft werden die eigene Fruchtbarkeit und ihr Produkt zum lebensgeschichtlichen Projekt stilisiert, dessen dokumentarische und selbstinszenatorische Aspekte ein menscheitsgeschichtlich allgemeines Phänomen radikal individualisieren und damit neu zu legitimieren suchen. Der schwangere Körper erweist sich als Kreuzungspunkt gesellschaftlicher Diskurse rund um Fragen der Lebensplanung, der Sterblichkeit und der Subjektbildung, aber auch der Ökonomisierung des Privaten und der Veröffentlichung des Geheimen.

Islamophobia in Higher Education Lindhardt og Ringhof

This book takes a look at how and why individuals display unethical behavior. It emphasizes the actual behavior of individuals rather than the specific business practices. It draws from work on psychology which is the scientific study of human behavior and thought processes. As Max Bazerman said, "efforts to improve ethical decision making are better aimed at understanding our psychological tendencies."

The book "Public Opinion" is a critical assessment of functional democratic government, especially of the irrational and often self-serving social perceptions that influence individual behavior and prevent optimal societal cohesion. The detailed descriptions of the cognitive limitations people face in comprehending their socio-political and cultural environments leading them to apply an evolving catalogue of general stereotypes to a complex reality, rendered Public Opinion a seminal text in the fields of media studies, political science, and social psychology. Walter Lippmann was an American writer, reporter, and political commentator famous for being among the first to

introduce the concept of Cold War, coining the term "stereotype" in the modern psychological meaning, and critiquing media and democracy in his newspaper column and several books.

Practical Friendship brings insights together from ancient and contemporary philosophy, theology, psychology and sociology to identify what good friendship means and how we can live it. Based on the analysis it proposes we adopt a role based view of friendship, that also can be used to analyse loneliness. Based on research and anecdotal evidence the book compiles a range of recommendations on how to maintain our friendships in good repair and how to foster friendship in old age. The book addresses an audience of professionals working to fight loneliness in our society as well as lay people wanting to reflect on how to improve the friendships in their lives. Additional sections are addressed at researchers in sociology and psychology who want to expand their understanding of friendship in order to tune their research to generate insight for loneliness-support.

Why Jane and John Couldn't Read--and how They Learned Edward Elgar Publishing

'A brilliant book' Daniel Kahneman, author of Thinking, Fast and Slow 'A book that can show you how to change your behaviour' Evening Standard A child is presented with a marshmallow and given a choice: Eat this one now, or wait and enjoy two later. What will she choose? And what does her decision say about the person she'll become? Walter Mischel's now iconic 'marshmallow test,' one of the most famous experiments in the history of psychology, proved that the ability to delay gratification is critical to living a successful and fulfilling life: self-control not only predicts higher marks in school, better social and cognitive functioning, and a greater sense of self-worth; it also helps us manage stress, pursue goals more effectively, and cope with painful emotions. But is willpower prewired, or can it be taught? In his groundbreaking new book, Dr. Mischel draws on decades of compelling research and life examples to explore the nature of willpower, identifying the cognitive skills and mental mechanisms that enable it and showing how these can be applied to challenges in everyday life--from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public policy and self-care, The Marshmallow Test will change the way we think about who we are and what we can be. And since, as Mischel argues, a life with too much self-control can be as unfulfilling as one with too little, this book will also teach you when it's time to ring the bell and enjoy that marshmallow. What readers are saying: ***** 'Accessible read that is both fascinating and has the potential to help change the way we approach self-control.' ***** 'Fascinating, empowering, a brilliant aid to taking ownership of your life.' ***** 'Encourages the reader that they have the power to change . . . thought-provoking.'

'The Diversity Scorecard' is designed to provide step-by-step instructions, worksheets and examples to help diversity executives and managers analyze and track the impact of their diversity initiatives to mobilize the organization for strategic culture change. Diversity is not a program; it is a systemic process of organizational change that requires measurement for organizational improvement and success. Measuring the progress and results of diversity initiatives is a key strategic requirement to demonstrate its contribution to organizational performance. Diversity executives, professionals and managers know they must begin to show how diversity is linked to the bottom-line in hard numbers or they will have difficulty maintaining funds, gaining support, and obtaining resources to generate progress. Many organizations collect some type of diversity-related data today, even if it focuses only on Affirmative Action statistics. "The Diversity Scorecard" focuses on tools and techniques to make sure diversity professionals are collecting and measuring the right type of data that will help ensure the organization's success both now and in the future. This book helps the reader spend some time thinking about what they currently measure and adding new measures to a database to track progress towards their diversity vision. The basic premises of this book are that it is important to develop measures that focus on the past, present, and future; and that measures need to consider the needs of the organization's diverse workforce, its work climate, diverse customers, the community, and shareholders. Part I of "The Diversity Scorecard" identifies the need for diversity measurement highlighting a business case for diversity and providing an introduction to diversity measurement. Part II of the book outlines the diversity return on investment (DROI) process taking you through step-by-step processes and techniques. Part III teaches you how to use measures in six key categories - Diversity Leadership Commitment, Workforce Profile Representation, Workplace Climate, Learning & Growth, Diverse Customer / Community Partnerships, and Financial Impact - to build a diversity scorecard that is aligned and linked with the business strategy of the organization. Finally, in Part IV, Dr. Hubbard discusses implementation issues involving strategic change procedures and techniques to avoid the pitfalls inherent in a diversity-based cultural transition process.

Council of Europe Charter on Education for Democratic Citizenship and Human Rights Education GRIN Verlag

This publication sets out the core competences needed by teachers to put democratic citizenship and human rights into practice in the classroom, throughout the school and in the wider community.
