Problem Behaviour, Intelligence and Social Maturity are three factors which has a major and attractive role in social science researches. How the behaviour of children gets affected due to their level of intelligence is always a good topic for researchers. The aim of the study was to examine the effect of Intelligence on Social Maturity and Problem Behaviours. For carrying this study 40 children with different level of intelligence (severe, moderate and mild mentally retarded and average intelligence) were taken. In which 28 male and 12 female were included as sample. The data were collected from the General Services at NIMH, Secunderabad. Binet-Kamat Test of Intelligence and Malin Intelligence Scale for Indian Children, were used for Intelligence testing. For assessing the problem behaviour BASIC-MR, Part-B was used and for assessing the children s

maturity level Vineland Social Maturity Scale was used.

Cross-Linguistic Study of Acquired Reading Disorders Motilal Banarsidass Publ.

The book, in its new edition, continues to discuss the processes and problems of learning in the triadic framework of learner–curriculum–teacher. The purpose of the book is to help the educators develop newer insights into the nature and problems of the learner, and as a result, to enable them develop their own approaches to teaching so as to improve learning. The phenomenon and the process of learning has been looked at in a comprehensive and integrated manner in this book. The concept of learning is discussed by positing its meaning in the wider context of school curriculum and education. He attempts to answer the question ‘how people learn’ from the philosophical, physiological and psychological perspectives. Pedology and pedagogy are the two major components of educational theory. The chapter on ‘Creative Pedagogy’ outlines the conceptual and practical interrelationship between learning and teaching. This chapter also outlines the different modes of teaching, and discusses the teacher’s role in fostering creativity and teaching children how to learn. Learning disabilities particularly those related to reading, spelling and computation are also presented. Finally, the book envisions the future classrooms and strongly advocates liberated, creative, democratic, collaborative and humanistic classrooms. He recommends that Learning Resource Centres should be preferred to the traditional classrooms. This book is intended to be a useful handbook for the students of education and psychology, and for educators, at all levels. NEW TO THIS EDITION Sections on Language and Communication, Reading and Writing, Orthographic bases of Dyslexia and Dysgraphia and Collaborative Classrooms, are added to update the student with the latest developments in the field.

Examination is as old as education itself. The examination process is the past phase of teaching and learning. Traditionally, the examination, has been a very tough exercise, fearful enough for students. However, with changing times, the procedure of conventional examination has changed. Now, the modern concept of examination is quite progressive and scientific. The educationists have introduced new terms like evaluation and measurement. Under evaluation, the level of knowledge and learning is weighted and under measurement, a learner is gauged and allotted score of marks.
