This study controversially suggests genius is made not born by tracing the lives of famous figures.

Notes on the Third Reich University of Michigan Press

This book assesses the impact of norms on decision-making. It argues that norms influence choices not by being causes for actions, but by providing reasons. Consequently it approaches the problem via an investigation of the reasoning process in which norms play a decisive role. Kratochwil argues that, depending upon the strictness the guidance norms provide in arriving at a decision, different styles of reasoning with norms can be distinguished. While the focus in this book is largely analytical, the argument is developed through the interpretation of the classic thinkers in international law (Grotius, Vattel, Pufendorf, Rousseau, Hume, Habermas).

Despite their differences - of temperament, spiritual emphasis, and storytelling style - what united them was much stronger: A shared vision that continues to inspire their millions of readers throughout the world."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. " With New Line Cinema's production of The Lord of the Rings film trilogy, the popularity of the works of J.R.R. Tolkien is unparalleled. Tolkien's books continue to be bestsellers decades after their original publication. An epic in league with those of Spenser and Malory, The Lord of the Rings trilogy, begun during Hitler's rise to power, celebrates the insignificant individual as hero in the modern world. Jane Chance's critical appraisal of Tolkien's heroic masterwork is the first to explore its "mythology of power"—that is, how power, politics, and language interact. Chance looks beyond the fantastic, self-contained world of Middle-earth to the twentieth-century parallels presented in the trilogy.

Worlds of Women is a groundbreaking exploration of the "first wave" of the international women's movement, from its late nineteenth-century origins through the Second World War. Making extensive use of archives in the United States, England, the Netherlands, Germany, and France, Leila Rupp examines the histories and accomplishments of three major transnational women's organizations to tell the story of women's struggle to construct a feminist international collective identity. She addresses questions central to the study of women's history—how can women across the world forge bonds, sometimes even through conflict, despite their differences?—and questions central to world history—is internationalism viable and how can its history be written? Rupp focuses on three major organizations that were technically open to all women: the broadly based and cautious International Council of Women, founded in 1888; the feminist International Alliance of Women, originally called the International Woman Suffrage Alliance, founded in 1904; and the vanguard Women's International League for Peace and Freedom, which grew out of the

International Congress of Women that met at The Hague in 1915. The histories of these organizations, and their stories of cooperation and competition, shed new light on the international women's movement. They also help us to understand the different but connected story of the second wave of international feminism that emerged from the ashes of World War II.

This is a user-friendly and practical guide for UK practitioners and those managing UK firms on the day-to-day legal issues that arise in the specialist field of partnerships and LLPs. The book is written by three authors: a leading partnership and LLP barrister with many years of litigation experience, a solicitor with specialist expertise in partnership and LLP structures and agreements, and a respected academic in the field. It provides clear and practical guidance on the main issues that arise time and again in UK partnerships and LLPs. While there are many important differences between traditional partnerships and LLPs, the practical issues that they face are often similar, and the book therefore tackle both areas. The focus is mainly on those areas that regularly cause difficulty in firms (be they traditional partnership or LLP). Subjects covered include: the legal nature and characteristics of partnerships and LLPs * factors influencing choice of legal entity * the essential elements of partnership and members' agreements * management structures including management boards and partnership councils * conduct of meetings * partnership/LLP property and profits and losses * accounts, taxation, and audit * partner and member retirements and expulsions * duties of partners and members * Equality Act implications * suspension and garden leave * personal liability issues * dissolution and winding-up * goodwill * disputes: mediation, arbitration, and court proceedings * mergers, acquisitions, and conversions.

Island of the Blue Dolphins Cambridge University Press

When we look at world politics through a different set of lenses—ones that reveal how the power of gender blinds us to the presence of women in international affairs—we begin to see what lies below the surface of the interstate power exchanges called international relations. Some women wield traditional international power as heads of state. There are also women in positions of less visible state and nonstate power, many of whom seek a more equal and just global order. And there are billions of women who bear, feed, clothe, and care for the world—whether as mothers, farmers, textile workers, electronics assemblers—yet have no formal political power. Global Gender Issues connects the inequalities between women and men with the “world politics” of power, security, economy, and ecology. Through history, visual imagery, theoretical analysis, and other narrative techniques, V. Spike Peterson and Anne Sisson Runyan alert us to gendered differences of power, violence, labor, and resources. In doing so, they suggest linkages between and among so-called women's issues and such world political matters as wars of secession, arms proliferation, global economic recession, and environmental degradation. At the same time, the authors hold out for us a clearly articulated, undogmatic hope for redefining and reorganizing gender relations and international relations as we begin to embrace difference, demand equality, and develop new standards of power and progress.
