"Zoological Record is published annually in separate sections. The first of these is Comprehensive Zoology, followed by sections recording a year's literature relating to a Phylum or Class of the Animal Kingdom. The final section contains the new genera and subgenera indexed in the volume." Each section of a volume lists the sections of that volume.

Abiotic Stress Adaptation and Tolerance Mechanisms in Crop Plants
 Mycobacteria are bacterial pathogens which cause diseases in

humans and non-human animals. This monograph will primarily cover the most important and widely researched groups of mycobacteria: members of the Mycobacterium tuberculosis complex (MTC) and Mycobacterium leprae, across a wide range of host species. M. tuberculosis and M. bovis are particularly relevant with the increasing drug resistance and co-infection with HIV associated with M. tuberculosis and the possible cross-infection of badgers and cattle associated with M. bovis. This book will provide a reference for researchers working in different fields creating a work which draws together information on different pathogens, and by considering the diseases in a zoonotic context provides a One Health approach to these important groups of diseases.

Carta D'Italia secondo la presento Costituzione

This new edition includes numerous printed Sanskrit texts and works and three Indian journeys the author had undertaken. All the words are arranged etymologically and philologically with special reference to cognate Indo-European languages.
