Rapports: Inland navigation. Question 1. The role of inland waterway transport.

Question 2. Evolution of types of propulsion and control of single craft and trains of

barges. Question 3. New means of utilising the hydraulic energy of navigable waterways. Comm. 1. Means of dealing with large differences in head in order to facilitate the passage of vessels on inland waterways. Comm. 2. Means of making watertight the beds and dikes of navigable canals and rivers. Comm. 3. Influence of ice on navigable waterways and on sea- and inland ports

This report sets out the recommendations of the 7th expert consultation together with papers presented, which was held within the framework of the Co-operative Research Programme on Fish Technology in Africa. Issues considered relating to post-harvest fish utilisation in Africa included fresh fish

markets, fish processing, quality assurance, marketing and socio-economic issues.

Originaire de Dompierre

(FR), André Musy obtient

en 1970 son diplôme

d'ingénieur EPFL en génie rural et géomètre, suivi

d'une maîtrise en

hydrologie, en statistique

et d'un doctorat de l'EPFL

dans le domaine de la

physique du sol. Il

continue sa formation

dans diverses universités

américaines, à Davis notamment, avant de revenir à l'EPFL où il est chargé de cours en hydrologie et chef de travaux à l'Institut de génie rural. Il est aussi chargé de cours dans plusieurs universités étrangères. De 1978 à 1983, il dirige des projets en hydrologie et aménagements de l'Organisation météorologique mondiale et du Programme des Nations Unies pour le Développement en Afrique subsaharienne principalement. Dès 1983,

il est professeur à l'EPFL, titulaire de la chaire de génie rural. Actuellement, il dirige l'Institut des Sciences et Technologies de l'Environnement et le laboratoire Hydrologie et Aménagements. Il est expert auprès de nombreuses organisations internationales.

Rapport Et Documents Présentés À la Septième Consultation D'experts FAO Sur la Technologie Du Poisson en Afrique, Saly-Mbour, République Du Sénégal, 10-12

Décembre 2001 BoD – Books on Demand Progress in Refrigeration Science and Technology, Volume III is a compilation of papers presented during the 11th International Congress of Refrigeration, held at Munich, Germany in 1963. This volume is divided into three parts discussing various aspects of refrigeration science and technology. Part I deals with refrigerated transport by land and by air. This part is further divided into sections that cover refrigerated vehicles,

testing of equipment for refrigerated vehicles, and the transport of foods. The second part is about refrigerated transport by water, with sections covering subjects on marine air-conditioning and fishing boats. Part III tackles education in the area of refrigeration. Research and education in refrigeration locker plants and education in refrigeration are elucidated under this section. Mechanical engineers and those concerned in the production, transport, and

manufacturing of perishable goods will find great use of this book. *European Glacial Landscapes* Cambridge University Press
A contribution to the International Hydrological Decade. Papers presented at the Symposia on properties and processes and measurement and forecasting.
Physique Du Mouvement de la Glace
Food & Agriculture Org. European Glacial Landscapes: The Holocene presents the current state of

knowledge on glacial landscapes of Europe and nearby areas over the Holocene to deduce the influence of atmospheric and oceanic currents and the insolation forcing variability and volcanic activity on Holocene paleoclimates, the existence of asynchronies in the timing of occurrence of glacier expansion and shrinkage during the Holocene, time lags between the identification of oceanic and atmospheric changes and those occurring in glacial extension during

the Holocene, the role of Holocene glaciers on the climate of Europe, and on sea level variability, and the delimitation of landscapes that need special protection. Students, academics and researchers in Geography, Geology, Environmental Sciences, Physics and Earth Science departments will find this book provides novel findings of all the major European Regions in a single publication, with updated information about Holocene glacial geomorphology and

paleo-climatology and clear figures that model the landscapes covered. Provides a synthesis and summary of glacial processes in Europe over the Holocene period Features research from experts in palaeo-climatology, palaeo-oceanography and palaeo-glaciology Includes access to a companion website with an interactive map, photos of glacial features, and geospatial data related to European Glacial Landscapes
Journals [Geneva] :

Unesco-WMO-IAHS
This volume is an integrated overview and synthesis of available data relating to the Quaternary evolution of the River Trent. It provides detailed descriptions of the Pleistocene sedimentary records from the Trent, its tributaries and related drainage systems - a sedimentary record that spans a period of approximately half a million years - and the biostratigraphical and archaeological material preserved therein.

Significant new data are presented from recently discovered sites of geological and archaeological importance, including previously unrecognised fluvial deposits, as well as novel analyses, such as mathematical modelling of fluvial incision as recorded by the river terrace deposits. In combination with a thorough review of the literature on the Trent, these new data have contributed to revised chronostratigraphical and palaeogeographical

frameworks for central England and revealed the complexity of the Pleistocene fluvial and glacial records in this region. The fragmentary Trent terrace sequence is an important element of wider reconstructions of Pleistocene palaeodrainage in Britain, providing a link between the records preserved in the English Midlands and those in East Anglia. **Science progrès, la nature** Elsevier
