 A famed British neurologist embarks on an expedition in Brazil to

follow the trail of Percy Fawcett, an occult-obsessed explorer who went missing in the Amazon rainforest and was the subject of the 2016 film *The Lost City of Z*. As a boy growing up near Liverpool in the 1950s, Andrew Lees would visit the docks with his father to watch the ships from Brazil unload their exotic cargo of coffee, cotton bales, molasses, and cocoa. One day, his father gave him a dog-eared book called *Exploration Fawcett*. The book told the true story of Lieutenant Colonel Percy Fawcett, a British explorer who in 1925 had gone in search of a lost city in the Amazon and never returned. The riveting story of Fawcett's encounters with deadly animals and hostile tribes, his mission to discover an Atlantean civilization, and the many who lost their own lives when they went in search of him inspired the young Lees to believe that there were still earthly places where one could "fall off the edge." Years later, after becoming a successful neurologist, Lees set off in search of the mysterious figure of Fawcett. What he found exceeded his wildest imaginings. With access to the cache of "Secret Papers," Lees discovered that Fawcett's quest was far stranger than searching for a lost city. There was a "greater mission," one that involved the occult and a belief in a community of evolved beings living in a hidden parallel plane in the Mato Grosso. Lees traveled to Manaus in Fawcett's footsteps. After a time-bending psychedelic experience in the forest, he understood that his yearning for the imaginary Brazil of his boyhood, like Fawcett's search for an earthly paradise, was a nostalgia for what never was. Part travelogue, part memoir, Lees paints a portrait of an elusive Brazil, and of a flawed explorer

whose doomed mission ruined lives.

The story of the notorious Jewish gangster who ascended from impoverished beginnings to the glittering Las Vegas strip "[A] brisk-reading chronicle of Siegel's life and crimes."—Tom Nolan, Wall Street Journal "Fast-paced and absorbing. . . . With a keen eye for the amusing, and humanizing detail, [Shnayerson] enlivens the traditional rise-and-fall narrative."—Jenna Weissman Joselit, New York Times Book Review In a brief life that led to a violent end, Benjamin "Bugsy" Siegel (1906-1947) rose from desperate poverty to ill-gotten riches, from an early-twentieth-century family of Ukrainian Jewish immigrants on the Lower East Side to a kingdom of his own making in Las Vegas. In this captivating portrait, author Michael Shnayerson sets out not to absolve Bugsy Siegel but rather to understand him in all his complexity. Through the 1920s, 1930s, and most of the 1940s, Bugsy Siegel and his longtime partner in crime Meyer Lansky engaged in innumerable acts of violence. As World War II came to an end, Siegel saw the potential for a huge, elegant casino resort in the sands of Las Vegas. Jewish gangsters built nearly all of the Vegas casinos that followed. Then, one by one, they disappeared. Siegel's story laces through a larger, generational story of eastern European Jewish immigrants in the early- to mid-twentieth century.

India will be the world's most populous country by 2024 and its third largest economy by 2028. But the size of our population and a sense of historical greatness alone are insufficient to guarantee we will fulfil our ambition to become a global power. Our approach to realize this vision needs more than just planning for economic growth. It requires a shift in attitudes. In *Making India Great*, Aparna Pande examines the challenges we face in the areas of social, economic, military and foreign policy and strategy. She points to the dichotomy that lies at the heart of the nation: our belief in becoming a global power and the reluctance to implement policies and take actions that would help us achieve that goal. The New India holds all the promise of greatness many of its citizens dream of. Can it become a reality? The book delves into this question.

A concise history of how American law has shaped—and been shaped by—the experience of contagion“Contrarians and the civic-minded alike will find Witt's legal survey a fascinating

resource”—Kirkus, starred review “Professor Witt's book is an original and thoughtful contribution to the interdisciplinary study of disease and American law. Although he covers the broad sweep of the American experience of epidemics from yellow fever to COVID-19, he is especially timely in his exploration of the legal background to the current disaster of the American response to the coronavirus. A thought-provoking, readable, and important work.”—Frank Snowden, author of *Epidemics and Society* From yellow fever to smallpox to polio to AIDS to COVID-19, epidemics have prompted Americans to make choices and answer questions about their basic values and their laws. In five concise chapters, historian John Fabian Witt traces the legal history of epidemics, showing how infectious disease has both shaped, and been shaped by, the law. Arguing that throughout American history legal approaches to public health have been liberal for some communities and authoritarian for others, Witt shows us how history's answers to the major questions brought up by previous epidemics help shape our answers today: What is the relationship between individual liberty and the common good? What is the role of the federal government, and what is the role of the states? Will long-standing traditions of government and law give way to the social imperatives of an epidemic? Will we let the inequities of our mixed tradition continue?

You will have the opportunity to read the words of people who have long since left this world. The words they have left, as prophecies and instructions to us poor and fools are greatly valuable in strengthening our faith and instruction and confirmation of the authenticity and truthfulness of the Orthodox Christianity as a true path to God. Some of the translations of the texts contain specific prophecies related with the lands of Serbia, Russia and Greece. However, many of them apply to all of us, modern Orthodox Christians, as well as to all people on earth. Their words are a warning of a bleak future that awaits us and our descendants.

From an Ivy League dean and a college admissions expert, a guide to help parents support their children as they navigate their way to college **The College Conversation** is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded. Rather than adding to the existing canon of "How to Get In" college guides or rankings, Eric Furda and Jacques Steinberg provide a step-by-step approach to having the tough conversations on this topic with less stress and more success. The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid--beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions--with a final section that includes advice on the first year of college. The topics include preliminary conversations about the search, and specifically how parents can think about their children's interests and what kind of college would best suit them; choosing a college (based on its curriculum, culture, and community); writing the most effective essays; assessing acceptances, including considerations of finances and aid; and making the transition from high school to college life. **The College Conversation** will provide parents, students, and counselors with the credible, level-headed information often missing in this process, as well as a much-needed dash of perspective borne of experience.

A spirited critique of the cultural politics of the tourist age. Or, why we are all tourists who hate tourists We've all been tourists at some point in our lives. How is it we look so condescendingly at people taking selfies in front of the Tower of Pisa? Is there really much to distinguish the package holiday from hipster city-breaks to Berlin or Brooklyn? Why do we engage our free time in an activity we profess to despise? **The World in a Selfie** dissects a global cultural phenomenon. For Marco D'Eramo, tourism is not just the most important industry of the century, generating huge waves of people and capital, calling forth a dedicated infrastructure, and upsetting and repurposing the architecture and topography of our cities. It also encapsulates the problem of modernity: the search for authenticity in a world of ersatz pleasures. D'Eramo retraces the grand tours of the first globetrotters - from Francis Bacon and Samuel Johnson to Arthur de Gobineau and Mark Twain - before assessing the cultural meaning of the beach holiday and the 'UNESCO-cide' of major heritage sites. The tourist selfie will never look the same again.

"The thrilling history of the torso murderer. The tale of the 'Untouchable' who got Al Capone but failed to solve his goriest case." —Dan Jones, *The Sunday Times* In the spirit of *Devil in the White City* comes a true detective tale of the highest standard: the haunting story of Eliot Ness's forgotten final case—his years-long hunt for "The Mad Butcher of Kingsbury Run," a serial killer who terrorized Cleveland through the Great Depression. "After helping to put Al Capone behind bars, lawman Eliot Ness came to Cleveland, where he did battle with a vicious killer. ... Even Ness was stumped trying to apprehend the 'torso murderer' responsible for a series of ghoulish killings. ... The authors have done Ness justice." —*Wall Street Journal* In 1934, the nation's most legendary crime-fighter—fresh from taking on the greatest gangster in American history—arrived in Cleveland, a corrupt and dangerous town about to host a world's fair. It was to be his coronation, as well as the city's. Instead, terror descended, as headless bodies started turning up. The young detective, already battling the mob and crooked cops, found his drive to transform American policing subverted by a menace largely unknown to law enforcement: a serial murderer. Eliot Ness's greatest case had begun. Now, Max Allan Collins and A. Brad Schwartz—the acclaimed writing team behind *Scarface* and the *Untouchable*—uncover this lost crime epic, delivering a gripping and unforgettable nonfiction account based on decades of groundbreaking research. Ness had risen to fame in 1931 for leading the "Untouchables," which helped put Chicago's Al Capone behind bars. As Cleveland's public safety director, in charge of the police and fire departments, Ness offered a radical new vision for better law enforcement. Crime-ridden and devastated by the Depression, Cleveland was preparing for a star-turn itself: in 1936, it would host the "Great Lakes

Exposition," which would be visited by seven million people. Late in the summer of 1934, however, pieces of a woman's body began washing up on the Lake Erie shore—first her ribs, then part of her backbone, then the lower half of her torso. The body count soon grew to five, then ten, then more, all dismembered in gruesome ways. As Ness zeroed in on a suspect—a doctor tied to a prominent political family—powerful forces thwarted his quest for justice. In this battle between a flawed hero and a twisted monster—by turns horror story, political drama, and detective thriller—Collins and Schwartz find an American tragedy, classic in structure, epic in scope.
