Many people across the country claim they have been "Saturnized," thanks to the company's renowned style of conducting business that keeps their customers happy and coming back to purchase again and again. Marketing expert Vicki Lenz explores how Saturn built its exceptional customer service reputation, using their successful methods as a role model to demonstrate how any company can create positive relationships with their customers, fulfill their needs, and turn one-time buyers into repeat-purchasing, loyal clients. Lenz, a satisfied Saturn customer, focuses on why Saturn buyers are so loyal, letting the reader hear directly from the customers themselves and extrapolating lessons from their feedback that are useful in any industry. She covers the steps companies can take to gain customer loyalty, including how to create interest, how to help customers feel welcome, how to solve problems, and how to communicate after the sale. In the spirit of *The Nordstrom Way*, Lenz offers managers, owners, and entrepreneurs alike sound advice that will show them how to stay ahead in the all-important race to catch, and keep, the customer.

 Created as an aid for the astronauts training for Skylab missions, this Skylab Saturn IB Flight Manual is a comprehensive reference that contains descriptions of ground support interfaces, prelaunch operations, and emergency procedures. It also summarizes mission variables and constraints, mission control monitoring and data flow during launch and flight. Launch vehicle SL-2 (SA-206; first Skylab manned mission) was used as the baseline for the manual, but the material is also representative of the SL-3 and SL-4 launch vehicles. Also known as the "Uprated Saturn I," Saturn IB was first launched in 1966. The IB replaced the Saturn I's S-IV second stage with the more powerful S-IVB, allowing it to carry a partially fueled Apollo Command / Service Module or fully fueled Lunar Module into low Earth orbit. The Saturn IB allowed critical testing of the Apollo Program's systems to be conducted long before the Saturn V was ready. It also flew one orbital mission without a payload, with the extra fuel used to demonstrate that the S-IVB's J-2 engine could be restarted in zero gravity - a critical operation for translunar injection. The Saturn IB had a height of 141.6 feet and a mass of 1.3 million pounds without payload. It produced thrust equivalent to 1.6 million pounds force, and could carry 46,000 pounds of payload to low Earth orbit. Saturn IB flew nine times, including three Skylab missions and for the Apollo-Soyuz Test Project. Complete with many informative diagrams and photos, this manual is a

wonderful reference for the museum docent, researcher, or anyone who ever wondered how these mighty rockets were designed and built.

Despite a solid GPA, several glowing letters of recommendation, and being named "Outstanding News-Editorial Graduate" by his journalism professors, no one seemed to care about Joel Frey after he completed his undergraduate studies. With no employer seeking his "semi-professional" services, he left school behind and crashed with his mom and dad. He worked a couple of jobs that did not require a degree. He drank too much and escaped to the comfort of old friends whenever the opportunity arose. Most of all, he wondered what it was going to take to shake off the desire to be nothing more than a carefree college kid. TWO SIDES OF A CYPRESS WALL is a bittersweet story of coping with the discovery that life in your early twenties is more than just finding a real job.
